\$1.5M+	\$337K	10M+	3
Revenue Shipped	Costs Eliminated	Users Served	Companies Founded

Lead AI engineer who builds agents that ship revenue, not slides. At LumApps I own the AI-native GTM stack: multi-agent workflows over HubSpot, Salesforce and Pendo that 2x outbound conversions and forecast \$1M/quarter. I decide build vs buy, wire the integrations, run the evals, and instrument cost per request. Prior 6 years at Beekeeper covered a GenAI demo builder for Sales fed by Salesforce data, an in-house LLM pipeline that killed a \$337K/year vendor, and co-owning GTM launches with Sales, PM, and Marketing. MBA-trained, founder mindset, comfortable moving from a marketer's brief to a shipped agent without a heavy process.

WORK EXPERIENCE

LumApps · Lead AI GTM Engineer [▶ Watch demo](#) 03/2026 - Present

AI Agents Agentic Workflows GTM Systems HubSpot Salesforce Pendo Marketing Automation Build vs Buy AI Evals

Cost Optimization Python Claude LangChain LangGraph Google ADK MCP GCP REST APIs Webhooks OAuth

- Built and shipped AI-native GTM workflows: multi-agent systems (Python, LangGraph, Google ADK on GCP) that turn a rep's brief into researched, personalized outbound at scale over HubSpot, Salesforce and Pendo. 2x open rates, 2x approved opportunities, 2 to 3 hours saved per rep per day, \$1M/quarter forecast revenue.
- Own the AI economics: eval pipelines on LangSmith, cost-per-request telemetry, token budgets per agent, and build vs buy calls between LangChain, Google ADK, MCP, and off-the-shelf platforms. Nothing ships without a number attached.
- Designed AI Brain, a temporal knowledge graph on Graphiti and Neo4j unifying 5+ silos (Salesforce, HubSpot, Pendo, transcripts, product usage) into one time-aware source every agent reads and writes. Grounds outputs, kills hallucinations.

Beekeeper AG · Senior Software Engineer (Technical Lead) 03/2020 - 02/2026

AI Agents GenAI for Marketing Salesforce GTM Systems Marketing Automation Python OpenAI LangChain CrewAI

Langfuse REST APIs PostgreSQL ClickHouse Elastic Search AWS Kubernetes

- Built GenAI demo system for Sales and Marketing: prompts fed by Salesforce data auto-generate per-customer pitch content and demo streams. Turned a manual per-deal task into a self-serve agent workflow; improved demo speed and close rates on real deals.
- Co-owned GTM launches with Sales, PM and Marketing (Seasonal Templates, Re-ignite Revenue, Sentiment Analysis). Every launch shipped with instrumentation so we knew within a week if it moved the needle. Employee Referral System became top revenue channel (\$1.5M+ generated, \$500K ARR).
- Replaced \$337K in annual vendor translation costs with an in-house Python + OpenAI pipeline shipped in 6 weeks. Full build-vs-buy call: diagnosed the recurring spend, evaluated vendors, built the fix, killed the contract.
- Built AI Onboarding Specialist: prompt-driven guide that turns new-signup context into personalized, high-touch setup. 100% of customers guided through onboarding without added headcount.

AI Platform Evaluation Build vs Buy GTM Advisory AI Strategy Startup Evaluation

- Evaluated 20+ startups on architecture, scalability, and AI readiness for seed-to-VC investment decisions. Consultant-style recommendations to investment committees.
- Advised portfolio founders on AI/GTM platform selection, agent design, and building revenue infrastructure that scales.

Dronistics · Founding Engineer 08/2018 - 03/2020

Single-Owner Systems Enterprise Integrations Vue Java PostgreSQL AWS Docker REST APIs Real-time Systems

- Founding engineer for EPFL spin-off drone delivery. Shipped end-to-end platform (Vue, Java, PostgreSQL, AWS) powering 500+ real-world deliveries. Enterprise integrations enabled Unilever partnership and CES Las Vegas showcase.
- Owned the full system as single accountable owner: architecture, integrations, data workflows, on-call, and the customer conversations behind them.

Anand Creations - Forward Deployed Engineering Practice · <https://anand-creations.com>06/2024 - Present

Founder & Principal Forward Deployed Engineer

Independent forward deployed engineering practice: embed with a team, run technical discovery, build the integrations, automations, and agent workflows that make the revenue stack scale. Home for the AI products I design, build, and run on my own (SwissNRI, Proplab, PulseView).

Proplab - AI for Real Estate · <https://proplab.io>09/2025 - Present

Founder & AI Product Builder

AI-native platform for property teams. Vision pipeline extracts structured signals from inspection photos; LLM agents turn those records into multilingual, marketing-ready listings end-to-end. One workflow, zero copy-paste, exactly the campaign-builder pattern the Hostaway JD describes.

SwissNRI - AI Cross-border Fintech · <https://www.swissnri.com>01/2024 - Present

Co-Founder & Technical Lead

AI-native cross-border tax platform for Swiss-Indian families. Ran discovery with real users, built RAG-grounded assistant answering DTAA, FEMA and Swiss tax questions with citations to source regulation. Zero-to-MVP in 3 months, 40% uplift in user satisfaction.
