| AI Products Founded | Users Served | Startups Advised | OSS Module Users |

Systems engineer with dual Embedded Systems MSc (KTH, TU/e) and 3+ years of production C++ on Linux at EPFL (Robogen). Built real-time flight-control APIs as founding engineer at Dronistics and large-scale distributed data systems at Beekeeper (Kafka, ClickHouse, Elastic Search, PostgreSQL for 10M+ users). Current Lead AI Engineer at LumApps, where I ship production ML systems on GCP with cost and latency tracing. Trading domain interest: mentored Opt Alpha at Tenity on scaling high-frequency algorithmic trading in production, and run PulseView (my own real-time market intelligence product with live users). Zurich-based; Zug commutable.

WORK EXPERIENCE

LumApps · Lead AI Engineer [▶ Watch demo](#) 03/2026 - Present

PythonGCPVertex AIML SystemsLatency & Throughput InstrumentationConcurrencyEvent-Driven ArchitectureNeo4jPub/SubOn-Call

- Own a production multi-agent ML system on Python + GCP Vertex AI: instrumentation for latency, cost per request, and throughput. Report to C-level on outcomes; on-call for global production.
- Designed AI Brain, a temporal knowledge graph on Graphiti/Neo4j unifying 5+ data sources into one time-aware store. Event-driven ingest over Pub/Sub, concurrent read/write patterns, and freshness tracking.

Beekeeper AG · Senior Software Engineer (Technical Lead) 03/2020 - 02/2026

Distributed SystemsKafkaClickHouseElastic SearchPostgreSQLKubernetesAWSJavaPythonPerformance OptimizationObservabilityOn-Call

- Large-scale distributed data systems for 10M+ users: Kafka event streams, ClickHouse analytics, Elastic Search indexing, PostgreSQL, K8s on AWS. Performance tuning across the stack.
- Ran observability and global on-call across production systems (Grafana, Datadog, Logz.io). Debugged and optimized system behavior end to end.
- Read, debugged, and improved codebases in Java, TypeScript, Python, and Vue across 3 teams. Comfortable diving into unfamiliar code and closing decisions.

Tenity · Startup Mentor & Technology Evaluation Panelist 06/2024 - Present

Algorithmic Trading AdvisoryHFT ArchitectureLatency BudgetsSystem DesignFintech

- Mentored Opt Alpha on scaling high-frequency algorithmic trading systems in production. Direct exposure to HFT architecture, latency budgets, and exchange connectivity concerns.
- Evaluated 20+ startups on architecture, scalability, and system design for seed-to-VC investment decisions.

Dronistics (EPFL spin-off) · Founding Engineer 08/2018 - 03/2020

Real-Time SystemsFlight Control APIsJavaAWSDockerTerraformSafety-Critical SystemsLatency-Sensitive Optimization

- Engineered real-time flight-control APIs and logistics optimization algorithms. 500+ autonomous deliveries, 99.5% safety record, zero incidents.
- Built full-stack (Vue, Java, PostgreSQL) and cloud infra (AWS, Docker, Terraform) from empty repo. Deep exposure to real-time constraints and system reliability.

EPFL, Laboratory of Intelligent Systems (Robogen) · AI Research Engineer (C++ / Linux) 08/2016 - 03/2020

C++Linux / UnixAlgorithmsConcurrencyMemory ManagementGenetic AlgorithmsNeural NetworksStatisticsAWS EC2Grid-Style ComputeOpen Source

- 3+ years shipping C++ in a Linux/Unix environment. Engineered Robogen, an open-source platform for co-evolution of robot bodies and neural controllers via genetic algorithms.
- Migrated the simulation pipeline to AWS for large-scale parallel evolution runs. Grid-computing-style workloads across EC2; secured AWS Cloud Credits for Research.
- Foundational CS work: algorithms, memory models, concurrency, neural networks, statistics, and large-scale data. Featured on the AWS Public Sector Blog.

PulseView - Explainable AI Market Intelligence · <https://pulse-view.anand-creations.com>05/2025 - Present

Founder & Builder

Real-time market intelligence for retail traders. AI agents generate AND justify trading signals from technical and news data on real-time feeds. Solo end to end. Built for my own trading portfolio first; direct interest in market microstructure and execution.

Anand Creations - AI Products & Open Source · <https://anand-creations.com>06/2024 - Present

Founder & Principal Builder

Independent studio and home for 3 products I ship solo (PulseView, Proplab, SwissNRI). Plus a Terraform URL-shortener module on the Registry with ~4,600 users I keep maintaining.
