

Anand Bhaskaran

Senior Full-Stack Engineer & AI Builder / TypeScript, Node.js / 3x Founder / Open Source

📍 Zurich, Switzerland · ✉ anandbaskaran3193@gmail.com · 📞 +41763043193 · in anandb3 · 🌐 anandbhaskaran · 🌐 anand-creations.com

10M+

Users Served

\$1.5M+

Enterprise Revenue

3

Companies Founded

13+

Years Full-Stack

Senior full-stack engineer shipping TypeScript, Node.js, and Vue in production at scale. 13+ years across enterprise-grade systems: distributed templating engine at Beekeeper powers 15% of all assets for 10M+ users, Employee Referral System became the platform's top revenue channel (\$1.5M+ generated). Lead AI Engineer at LumApps applying agentic AI to real customer workflows (2x conversions, \$1M forecast quarterly), including novel applications of LLMs to enterprise data infrastructure. Founding engineer at Dronistics, 3 AI products founded solo through Anand Creations, and open-source contributor since Robogen at EPFL. Bias to action; comfortable on customer calls and in code the same afternoon.

WORK EXPERIENCE

LumApps · Lead Full-Stack AI Engineer [▶ Watch demo](#) 03/2026 - Present

TypeScript Node.js Python React (adjacent) LangGraph Google ADK MCP OpenAI Anthropic Multi-Agent Systems
Enterprise AI Evaluation Pipelines Observability On-Call

- Shipped production multi-agent workflows on Python and TypeScript (LangGraph, Google ADK, MCP, AG-UI). Novel application of agentic AI to enterprise CRM data: 2x open rates, 2x approved opportunities, \$1M forecast quarterly.
- Designed AI Brain, a temporal knowledge graph on Graphiti/Neo4j that unifies 5+ silos (Salesforce, HubSpot, Pendo, product usage) into one secure, time-aware store agents read and write to. Data modeling and API design for infrastructure that has to be trustworthy.
- Own the reliability layer: evals, LangSmith tracing, cost-per-request instrumentation, fallback paths, and on-call. Communicate directly with senior stakeholders and C-level on outcomes.

Beekeeper AG · Senior Software Engineer (Technical Lead) 03/2020 - 02/2026

TypeScript Vue Node.js React (adjacent) Java Python Kubernetes AWS Docker Terraform PostgreSQL
Elastic Search Kafka GitHub Actions CI/CD Enterprise Customers

- Architected Employee Referral System end to end (TypeScript, Vue, Node.js, Java, PostgreSQL). Became the platform's top revenue channel: \$1.5M+ generated, \$500K ARR. Direct engagement with enterprise customers from discovery through post-launch.
- Designed a distributed templating engine (Kafka, Elastic Search, microfrontends) that cut customer setup time 90% and powers 15% of all assets on the platform (10M+ users). Product Owner; full-stack ownership.
- Replaced \$337K/yr in vendor translation costs with an in-house LLM pipeline shipped in 6 weeks (GitHub Actions + OpenAI). Bias to action, calculated risk, iterate in production.
- Ran observability and global on-call (K8s, AWS, Grafana, Datadog, Logz.io). Hired and mentored the AI engineering cohort; engineers now lead features independently.

Dronistics (EPFL spin-off) · Founding Engineer 08/2018 - 03/2020

Founding Engineer Vue Node.js Java PostgreSQL AWS Docker Terraform CI/CD Real-time Systems
Enterprise Customers

- Founding engineer at a startup. Shipped full stack (Vue, Node.js, Java, PostgreSQL, real-time APIs, AWS/Docker/Terraform infra) from empty repo to 500+ real-world deliveries.
- Direct engagement with enterprise partners (Unilever) and CES Las Vegas showcase. Turned prototype demos into signed opportunities.

EPFL, Laboratory of Intelligent Systems (Robogen) · AI Research Engineer & Open Source Maintainer 08/2016 - 03/2020

Open Source C++ Python AWS Neural Networks Genetic Algorithms Robotics Webots

- Built and open-sourced Robogen, a platform used by researchers and students to design, evolve, and 3D-print real robots. Featured on the AWS Public Sector Blog.
- Migrated the simulation pipeline to AWS for large-scale parallel evolution; secured AWS Cloud Credits for Research.
- TA for Evolutionary Robotics; supervised 20+ master's students on optimization, neural networks, and embodied learning.

Anand Creations - AI Products & Forward Deployed Engineering · <https://anand-creations.com>06/2024 - Present

Founder & Principal Builder

Independent studio and home for 3 AI-native products I design, build, and ship on my own (SwissNRI, Proplab, PulseView). Full-stack (TS/Node.js), AI at the core, concept to real customers. Founder track record.

PulseView - Explainable AI Market Intelligence · <https://pulse-view.anand-creations.com>05/2025 - Present

Founder & Builder

Real-time market intelligence for retail traders. AI agents generate AND justify trading signals; if the model cannot explain the signal, it does not ship. Full-stack TypeScript/Node.js, live users on real-time feeds, secure API design for market data.

Proplab - AI-Native Property Workflows · <https://proplab.io>09/2025 - Present

Founder & AI Product Builder

Vision pipeline extracts structured signals from inspection photos; LLM agents then compose multilingual, marketing-ready listings end to end. One flow, zero copy-paste. Full-stack solo build.
