

Anand Bhaskaran

Staff Backend Engineer & AI Systems Lead / Python, PostgreSQL, AWS/GCP / Production LLM Pipelines with Evals & Decision Traces

📍 Zurich, Switzerland · ✉ anandbaskaran3193@gmail.com · 📞 +41763043193 · in anandb3 · 🔗 anandbhaskaran · 🌐 anand-creations.com

\$1.5M+	\$337K	10M+	3
Revenue Shipped	Costs Eliminated	Users Served	Companies Founded

Staff-level backend engineer with 13+ years shipping reliable systems around fragmented, high-value data. Currently Lead AI Engineer at LumApps: services, data models, async pipelines and evaluation loops for production multi-agent systems on Python + GCP (Pub/Sub, LangGraph, LangSmith tracing, cost-per-request telemetry). Six years at Beekeeper on AWS (Python/Java, PostgreSQL, Kafka, Elastic Search, Kubernetes) at 99.99% SLA under GDPR for 10M+ users, including an LLM pipeline that eliminated \$337K in vendor cost in 6 weeks. Founder of SwissNRI, a compliance-first regulated fintech: comfortable where explainability, audit trails and long-horizon correctness matter as much as latency.

WORK EXPERIENCE

LumApps · Lead AI Engineer 03/2026 - Present

Python

Async Workflows

Data Pipelines

Pub/Sub

LangGraph

GCP

Vertex AI

PostgreSQL

Evaluation Loops

LangSmith

LLMs

Distributed Systems

Knowledge Graphs

Neo4j

- Design services, data models and async pipelines on Python + GCP for production multi-agent workflows (LangGraph, Google ADK on Vertex AI). Event-driven ingest over Pub/Sub with automated cleaning, deduplication and versioning across 5+ enterprise data sources; 2x conversions, \$1M/quarter revenue forecast.
- Built the evaluation loop that makes stochastic AI behavior debuggable and explainable: LangSmith tracing, evals-as-tests, tool-selection tuning and cost-per-request telemetry. Same discipline the JD calls out for making decisions transparent.
- Architected AI Brain, a temporal knowledge graph on Graphiti and Neo4j that captures every agent read/write as a timestamped, cited decision trace. A working intelligence layer over fragmented enterprise data.

Beekeeper AG · Senior Software Engineer (Technical Lead) 03/2020 - 02/2026

Python

Java

PostgreSQL

Kafka

Elastic Search

ClickHouse

AWS

Lambda

EC2

Kubernetes

Async Workflows

Distributed Systems

GDPR

OpenAI

LangChain

On-Call

- Owned production backend infrastructure on AWS for 10M+ frontline users: Python/Java services on Kubernetes, PostgreSQL, Kafka pipelines, Elastic Search, ClickHouse, Lambda / EC2. GDPR-sensitive workloads at 99.99% SLA on the platform's top revenue channel (\$1.5M+ generated, \$500K ARR).
- Replaced \$337K in annual vendor cost with an in-house LLM pipeline shipped in 6 weeks (Python + OpenAI + GitHub Actions). Rigorous measurement, direct P&L impact, product team unblocked.
- Architected the Employee Referral System end-to-end: services, PostgreSQL data model, async job workflows and cross-team GTM. Same design lens applied to Search Platform revamp across 3 teams.
- Global on-call, observability (Grafana, Datadog, Logz.io); mentored the AI engineering cohort; proactive stakeholder communication with Product, Sales and CIO.

Tenity · Startup Mentor & Technology Evaluation Panelist 06/2024 - Present

System Design Review

Fintech

Async Systems

Algorithmic Trading

Stakeholder Communication

AI Strategy

- Ran discovery-style diligence on 20+ fintech and AI startups: system design, data architecture, moats and ROI framing. Direct, honest, challenge-the-idea communication with founders and CFOs.
- Mentored Opt Alpha on scaling asynchronous algorithmic trading systems in production; advised portfolio companies on where AI creates real leverage.

Dronistics · Founding Engineer 08/2018 - 03/2020

Backend from Scratch

Java

PostgreSQL

AWS

Docker

Terraform

CI/CD

Real-Time Systems

Founding Engineer

- Founding engineer at an EPFL spin-off. Built the backend from scratch (Java, PostgreSQL, AWS, Docker, Terraform, CI/CD) for a live commercial platform that ran 500+ real-world deliveries.
- Engineered real-time telemetry, flight-control APIs and logistics optimization. Enterprise-grade reliability that landed Unilever partnership and a CES showcase: every output auditable, every deployment verifiable.

SwissNRI - Compliance-First Regulated Fintech · <https://www.swissnri.com>01/2024 - Present

Co-Founder & Technical Lead

Production platform for Swiss-Indian cross-border tax and compliance decisions. Python + PostgreSQL backend, RAG-grounded assistant answering DTAA, FEMA and Swiss tax with citations back to the regulation, and an agentic layer that flags risk before users act. Compliance-first design with regulator-verifiable outputs, PII controls and audit trails baked in from day one. Zero-to-MVP in 3 months, 40% uplift in user satisfaction.

Anand Creations - Forward Deployed Engineering Practice · <https://anand-creations.com>06/2024 - Present

Founder & Principal Forward Deployed Engineer

Independent practice building production AI on customers' live data end-to-end: services, pipelines, evaluations and observability. Same operating model I would bring to Kalepa's core backend: own the problem, ship the fix, keep the decision explainable.

PulseView - Live-Data AI Decision Engine · <https://pulse-view.anand-creations.com>05/2025 - Present

Founder & Builder

Production platform ingesting real-time price and news time series (Python, async workers, structured storage), computing indicators and running agents that generate AND justify signals with cited evidence: if the model cannot explain the decision, it does not ship. Explainability, evaluation and back-testing built in.

EDUCATION

- Quantic School of Business and Technology

2019 - 2020

MBA Business Administration
- EIT Digital

2014 - 2016

Master (Programme) Innovation & Entrepreneurship
- Eindhoven University of Technology (TU/e)

2015 - 2016

MSc (Netherlands) Embedded Networking
- KTH Royal Institute of Technology

2014 - 2015

MSc (Sweden) Embedded Systems
- Amrita Vishwa Vidyapeetham

2010 - 2014

Bachelor of Engineering Electronics and Communication

CERTIFICATES

- Knowledge Graphs for RAG

Neo4j
- AI Agents in LangGraph

LangChain & Tavily
- Build LLM Apps with LangChain

DeepLearning.AI

AWARDS

- AWS Cloud Credits for Research

Amazon Web Services (2020)
- Appreciation from John T. Chambers (ex-CEO, Cisco Systems)

Cisco Systems
- KTH Opportunities Fund

KTH Royal Institute of Technology
