

Anand Bhaskaran

Founding Engineer & Agentic AI Builder / Production Systems for Investors (PulseView) / 3x Founder / MBA

Zurich, Switzerland · anandbaskaran3193@gmail.com · +41763043193 · in anandb3 · anandbhaskaran · anand-creations.com

3	20+	10M+	4,600+
AI Products Founded	Startups Advised	Users Served	OSS Module Users

Agency, ownership, and production scars. I built and run the LumApps multi-agent outbound system in production (Python on GCP Vertex AI, tools over MCP I authored, evals + on-call), and I was there every time it broke. Founding engineer at Dronistics before that (empty repo to 500+ deliveries), and 3 AI products founded solo through Anand Creations. Deep investment-domain relevance: PulseView (my AI market intelligence product, live users), Tenity mentor evaluating 20+ startups per year for seed-to-VC decisions. Open source that people actually use (Terraform module, ~4,600 users). Zurich-based, Switzerland-native, ready to own the first technical seat.

WORK EXPERIENCE

LumApps · Lead AI Engineer [▶ Watch demo](#) 03/2026 - Present

Python GCP Vertex AI LangGraph Google ADK MCP (Authored) AG-UI Claude & Claude Code OpenAI Anthropic
Evaluation Harness LangSmith Multi-Agent Systems Production On-Call Neo4j

- Built and shipped a production multi-agent system that real users (Sales, RevOps) depend on daily. Python on GCP Vertex AI, LangGraph + Google ADK, tools over MCP servers I authored, agent state streamed over AG-UI. I was on-call every time it broke and own the postmortems. 2x conversions, \$1M forecast quarterly.
- Own the evaluation and quality harness: golden suites, judge rubrics, safety cases per agent, LangSmith tracing so every run reconstructs from its log. Rigorous on anything a user touches; fast and rough on experiments.
- Designed AI Brain, a temporal knowledge graph on Graphiti/Neo4j that unifies 5+ silos (Salesforce, HubSpot, Pendo, product usage) into one auditable context store. Closed the architecture decision solo; report to C-level on outcomes.

Beekeeper AG · Senior Software Engineer (Technical Lead) 03/2020 - 02/2026

Python TypeScript Java Kubernetes AWS Docker Terraform OpenAI Claude LangChain CrewAI PostgreSQL
Elastic Search Kafka GitHub Actions On-Call Multi-Codebase

- Ran observability and global on-call across production systems used by 10M+ users (K8s, AWS, Grafana, Datadog, Logz.io). Was there when it broke; provisioned, deployed, rolled back systems end to end.
- Replaced \$337K/yr in vendor translation costs with an in-house LLM pipeline shipped in 6 weeks (GitHub Actions + OpenAI). Concept to production, no gatekeepers.
- Architected Employee Referral System end to end. Became the platform's top revenue channel: \$1.5M+ generated, \$500K ARR.
- Read, debugged, and improved codebases I did not write across 3 teams. Hired and mentored the AI engineering cohort.

Tenity · Startup Mentor & Technology Evaluation Panelist 06/2024 - Present

VC Advisory Investment Diligence Startup Evaluation Algorithmic Trading AI Strategy

- Technology Evaluation Panelist for a VC / seed accelerator. Evaluated 20+ startups on architecture, scalability, and AI readiness for seed-to-VC investment decisions.
- Mentored Opt Alpha on scaling high-frequency algorithmic trading systems in production; advised multiple portfolio companies on AI strategy.

Dronistics (EPFL spin-off) · Founding Engineer 08/2018 - 03/2020

Founding Engineer Zero-to-One Vue Java PostgreSQL AWS Docker Terraform Solo Architecture Decisions

- Founding engineer at a startup. Shipped full stack from empty repo to 500+ real-world deliveries (Vue, Java, PostgreSQL, real-time APIs, AWS/Docker/Terraform infra).
- Closed every architecture decision solo. Built partnerships with Unilever and a CES showcase.

PulseView - Explainable AI Market Intelligence · <https://pulse-view.anand-creations.com>05/2025 - Present

Founder & Builder

AI product for investors: real-time AI agents that generate AND justify trading signals from technical and news data. Built for my own portfolio first, opened to live users. Direct-domain adjacent to Khare's professional-investor focus. Solo end to end (product, agent stack, UI, live users on real-time feeds).

Anand Creations - AI Products & Open Source · <https://anand-creations.com>06/2024 - Present

Founder & Principal Builder

Independent studio and home for 3 AI-native products I ship solo (PulseView, Proplab, SwissNRI). Plus open source that people actually use: a Terraform URL-shortener module on the Terraform Registry with ~4,600 users, and Robogen from EPFL featured on the AWS Public Sector Blog.

SwissNRI - AI Cross-border Fintech · <https://www.swissnri.com>01/2024 - Present

Co-Founder & Technical Lead

AI-native cross-border tax and compliance platform. RAG-grounded assistant with citations back to the regulation; compliance-first agentic design flags risk before users file. Zero-to-MVP in 3 months, 40% uplift in satisfaction.
