Companies Founded

AI transformation practitioner who moves companies from AI curiosity to measurable adoption. At LumApps I own AI transformation end to end: identifying high-impact use cases with product and sales, prototyping fast, shipping to production, and reporting outcomes to C-level (2x conversions, \$1M quarterly forecast). At Beekeeper I built and mentored the AI engineering cohort, replaced a \$337K vendor with an in-house LLM pipeline in 6 weeks, and co-owned GTM adoption with Sales and Product. MBA-trained, comfortable translating LLMs into business value across technical and non-technical teams. Zurich-based, hybrid-ready.

WORK EXPERIENCE

LumApps · Lead AI Engineer & AI Transformation Lead [▶ Watch demo](#) 03/2026 - Present

AI Transformation Use Case Discovery Python LLMs OpenAI MCP Multi-Agent Systems Prompt Engineering RAG
Vector Databases Knowledge Graphs Neo4j Evaluation Pipelines LangSmith Responsible AI Cross-functional Delivery
Stakeholder Management

- Own group-wide AI transformation end to end: run use-case discovery with Sales, Product, and RevOps; prioritize the roadmap; turn use cases into working prototypes and then production systems. Report adoption and outcomes directly to C-level.
- Shipped a production multi-agent workflow for outbound sales on Python, LangGraph, Google ADK, with tools exposed over MCP and state streamed to the UI over AG-UI. 2x open rates, 2x approved opportunities, 2 to 3 hours saved per rep per day, \$1M forecast in quarterly revenue. Prompt engineering, eval pipelines, and cost-per-request telemetry built in.
- Designed AI Brain, a temporal knowledge graph on Graphiti and Neo4j that unifies 5+ silos (Salesforce, HubSpot, Pendo, transcripts, product usage) into one time-aware memory for RAG. Grounds retrieval, cuts hallucinations, and enforces access control and data governance across the AI stack.

Beekeeper AG · Senior Software Engineer (Technical Lead, AI Adoption) 03/2020 - 02/2026

AI Adoption Change Management Training & Enablement Java Python TypeScript OpenAI Claude LangChain CrewAI
Langfuse Prompt Engineering A/B Testing PostgreSQL Kubernetes AWS GitHub Actions Cross-functional GTM

- Replaced a \$337K annual vendor translation contract with an in-house LLM pipeline (GitHub Actions + OpenAI APIs) shipped in 6 weeks. 12K+ assets translated. Ran the adoption motion so the product team could iterate without external gatekeepers.
- Built and mentored the AI engineering cohort as acting hiring manager. Hired for craft and curiosity, ran onboarding and hands-on training, grew engineers who now lead AI features independently.
- Co-owned GTM launches with Product and Sales (Seasonal Templates, Re-ignite Revenue, Sentiment Analysis, GenAI Demo System). Each shipped with adoption metrics and impact reporting so we knew within a week if it moved the needle.
- Built AI Onboarding Specialist: personalized, high-touch guidance for every new signup. 100% of customers guided through setup, time-to-first-value cut without adding headcount. Prompt engineering, eval loops, and responsible-use guardrails.

Tenity · Startup Mentor & Technology Evaluation Panelist 06/2024 - Present

AI Strategy AI Readiness Stakeholder Advisory Technical Mentoring

- Evaluated 20+ startups on architecture, scalability, and AI readiness for seed-to-VC investment decisions. Same lens I bring to internal AI use-case scoring.
- Advised portfolio companies on AI strategy, adoption, and building engineering cultures that ship.

Dronistics · Founding Engineer 08/2018 - 03/2020

Vue Java PostgreSQL AWS Docker CI/CD Zero-to-One Product

- Founding engineer for an EPFL spin-off. Shipped the full autonomous drone delivery platform (Vue/Java/PostgreSQL) that powered 500+ real-world deliveries.
- Built cloud infra and CI/CD on AWS. Enterprise reliability that enabled a Unilever partnership and a CES Las Vegas showcase.

Anand Creations - Forward Deployed AI Practice · <https://anand-creations.com>06/2024 - Present

Founder & Principal

Independent AI practice, home for AI products I design, build, and run myself (SwissNRI, Proplab, PulseView). Same playbook I bring to organizational AI transformation: pick the highest-leverage use case, ship the MVP fast, wire in evals and telemetry, measure adoption, iterate.

SwissNRI - AI Compliance Platform · <https://www.swissnri.com>01/2024 - Present

Co-Founder & Technical Lead

AI-native cross-border tax and compliance platform for Swiss-Indian families. RAG-grounded assistant answers regulatory questions with citations back to the source; compliance-first agentic design flags risk before users file, with responsible-AI guardrails built before features. Zero-to-MVP in 3 months, 40% uplift in satisfaction.

Proplab - AI for Real Estate · <https://proplab.io>09/2025 - Present

Founder & AI Product Builder

AI-native MVP for property inspections. Vision pipeline extracts structured signals from photos; LLM agents turn those records into multilingual, marketing-ready listings end to end. One workflow, zero copy-paste.
