Personal Portfolio XIRR (13y)	AI Agent Revenue Forecast	Vendor Cost Eliminated	AI Companies Founded

Two lifelong strengths, one convergence: 13+ years shipping production AI, and 13+ years running a personal portfolio at 30.57% XIRR with algo trading in the remaining hours. The exact combination an AI-native trading operating system needs. At LumApps I built the AI Brain, a Graphiti and Neo4j temporal knowledge graph that unifies 5+ silos into one time-aware memory every agent reads and writes, the shape needed to represent counterparties, flows and market context. Founded three AI companies on the side, including PulseView, an explainable AI market-intelligence agent shipped from my own trading portfolio first. Founding engineer DNA: zero to production, solo, before hiring.

WORK EXPERIENCE

LumApps · Lead AI Engineer · Watch demo · 03/2026 - Present

PythonTypeScriptGCPVertex AILangGraphGoogle ADKMCPAG-UIMulti-Agent SystemsReActSelf-ReflectionRAGNeo4jGraphitiTemporal Knowledge GraphsVector DatabasesEvaluation PipelinesLangSmithPub/SubSalesforceOn-Call

- Designed AI Brain, a Graphiti and Neo4j temporal knowledge graph that unifies 5+ silos (Salesforce, HubSpot, Pendo, transcripts, product usage) into one time-aware memory every agent reads and writes. Event-driven ingest, per-agent query/write-back contracts, freshness layer. Same shape needed for counterparties, flows and market context.
- Built production multi-agent workflows on Python, LangGraph and Google ADK over Vertex AI (ReAct, self-reflection, hierarchical delegation), tools over MCP, state streamed to UI over AG-UI. 2x open rates, 2x approved opportunities, 2-3 hours saved per rep per day, \$1M forecast quarterly revenue.
- Owned end to end: agent architecture, eval pipelines, tracing (LangSmith), tool-selection tuning, cost-per-request telemetry, on-call. Report to C-level on outcomes.

Beekeeper AG · Senior Software Engineer (Technical Lead) · 03/2020 - 02/2026

JavaPythonTypeScriptVueKubernetesAWSOpenAIClaudeLangChainCrewAISTRANDS AGENTSLangfuseKafkaPostgreSQLElastic SearchClickHouseGrafanaDatadogOn-CallGTM

- Replaced \$337K annual vendor translation contract with an in-house LLM pipeline in 6 weeks (GitHub Actions + OpenAI). 12K+ assets translated; unit economics first, model choice second.
- Architected Employee Referral System end to end as tech lead (reporting to CIO). Platform's top revenue channel: \$1.5M+ generated, \$500K ARR, 99.99% SLA. Co-owned GTM with Sales and PM.
- Co-owned GTM launches with Product and Sales. Every feature shipped with instrumentation so we knew within a week if it moved the needle; killed the ones that did not.

Tenity · Startup Mentor & Technology Evaluation Panelist · 06/2024 - Present

Algorithmic TradingAI StrategyStartup EvaluationTechnical Due DiligenceScalability

- Mentored Opt Alpha on scaling high-frequency algorithmic trading systems in production: infra, risk controls, and the engineering tradeoffs specific to live trading.
- Evaluated 20+ fintech and AI startups on architecture, scalability and AI readiness to inform seed-to-VC investment decisions.

Dronistics (EPFL spin-off) · Founding Engineer · 08/2018 - 03/2020

VueJavaPostgreSQLAWSDockerCI/CDReal-time SystemsFlight Control APIsLogistics OptimizationZero-to-One

- Shipped end-to-end autonomous drone delivery platform solo before hiring: full stack, cloud infra, real-time flight-control APIs, logistics optimization. 500+ real-world deliveries, 40% faster, 99.5% safety record, zero incidents.
- Built the cloud + CI/CD from scratch to enterprise-grade reliability. Enabled Unilever partnership and CES Las Vegas showcase. Zero to live, ambiguity-friendly, physical-world messy.

C++PythonAWSGenetic AlgorithmsNeural NetworksEvolutionary AIRoboticsSimulation

- Engineered Robogen, open-source platform for co-evolution of robot bodies and brains via genetic algorithms. Foundational applied ML (optimization under noise, search over huge state spaces, learning-from-environment loops), the primitives underneath modern agentic systems.
- Migrated the simulation pipeline to AWS for large-scale parallel evolution runs. Secured AWS Cloud Credits for Research; work featured on the AWS Public Sector Blog.

ENTREPRENEURIAL PROJECTS

PulseView - Explainable AI Market Intelligence · <https://pulse-view.anand-creations.com>05/2025 - Present

Founder & Builder

Real-time market intelligence built for my own trading portfolio first, then opened to retail traders. AI agents generate AND justify signals from technical and news data. Core principle: if the model cannot explain the signal, it does not ship. The template for an agentic layer that keeps a human in control of every priced decision.

Personal Investing & Algorithmic Trading (13+ years)01/2012 - Present

Solo Portfolio Manager & Systematic Trader

13+ year track record as a private investor, 30.57% XIRR compounded through cycles. Systematic and algo trading in parallel: signal design, backtesting, execution automation, live risk and P&L monitoring. Where the reflex to check risk before size comes from.

Anand Creations - Forward Deployed Engineering Practice · <https://anand-creations.com>06/2024 - Present

Founder & Principal Forward Deployed Engineer

Independent practice, home for the AI products I design, build and run solo (PulseView, SwissNRI, Proplab). Zero-to-production playbook: multi-agent systems, RAG grounding, eval pipelines and observability, shipped by one engineer with commercial ownership.

SwissNRI - AI Cross-border Fintech · <https://www.swissnri.com>01/2024 - Present

Co-Founder & Technical Lead

AI-native cross-border tax and compliance platform. RAG-grounded assistant answers DTAA/FEMA/Swiss tax questions with citations back to the regulation. Compliance-first agentic design flags risk before users act, the same posture required for flows that must be risk-checked before execution.

EDUCATION	CERTIFICATES	AWARDS
Quantic School of Business and Technology2019 - 2020 MBA Business Administration	Knowledge Graphs for RAGNeo4j	AWS Cloud Credits for ResearchAmazon Web Services (2020)
