---

Dear founding team,

Two lifelong strengths, one convergence. I have shipped production AI for 13+ years and, in parallel, run a personal portfolio at 30.57% XIRR for the same 13 years, with systematic and algo trading in the hours after the day job. I already build the shape of system you describe, and I already think in P&L, size and risk.

Your technical spine (agentic layer, proprietary intelligence platform, learning loop) is the spine I ship at LumApps today. I built AI Brain: a Graphiti and Neo4j temporal knowledge graph unifying 5+ silos into one time-aware memory every agent reads and writes. On top: multi-agent workflows in Python, LangGraph and Google ADK (ReAct, self-reflection, hierarchical delegation), tools over MCP, state streamed over AG-UI, evals and cost-per-request telemetry from day one. 2x open rates, 2x approved opportunities, \$1M forecast quarterly revenue. Rebind the entities from account/opportunity to counterparty/cargo/port/price-curve and it is the trading cockpit you want.

Zero-to-one is not theoretical. At Dronistics I shipped the full autonomous drone delivery stack solo before hiring: 500+ deliveries, 40% faster, 99.5% safety, Unilever partnership, CES. At Beekeeper I killed a \$337K vendor contract with an in-house LLM pipeline in 6 weeks and architected the Employee Referral System into the platform's top revenue channel (\$1.5M+, \$500K ARR). Founded three AI companies on the side, most relevantly PulseView, an explainable AI market-intelligence agent I built for my own portfolio first: if the model cannot explain the signal, it does not ship. That principle carries straight into pricing and executing a physical flow with a human in control.

Honest note: I do not have commodities domain from day one. What I have is the willingness to sit with traders, ride flows, and translate what I see into systems that map to trader P&L logic. With 15+ years of physical trading in the CEO seat, my job is to compound that on a platform that scales beyond his headcount. Based between Zurich and Olten, glad to co-work in Switzerland and be in the trading regions as often as the work needs.

Would love to build this from zero to live flow with you.

Thanks for reading,  
Anand Bhaskaran
