

Anand Bhaskaran

Founding Engineer & Full-Stack AI Builder / 3x Founder / Production LLM Systems / Fintech

📍 Zurich, Switzerland · ✉ anandbaskaran3193@gmail.com · 📞 +41763043193 · in anandb3 · 🌐 anandbhaskaran · 🌐 anand-creations.com

3	\$1.5M+	10M+	13+
Companies Founded	Revenue Shipped	Users Served	Years Full-Stack

Founding-engineer instinct with 13+ years shipping full-stack + AI in production. Founding Engineer at Dronistics (empty repo to 500+ real-world deliveries), 3 AI products founded on the side (SwissNRI cross-border fintech, PulseView explainable market intelligence, Proplab). Lead AI Engineer at LumApps building production multi-agent workflows on Python and TypeScript with OpenAI, Anthropic, and Vertex AI: 2x conversions, \$1M forecast quarterly. Own the full stack: TS/React, Python, LLM pipelines, K8s, AWS/GCP, observability, on-call. Commercial instinct sharpened by MBA, revenue accountability at Beekeeper (\$1.5M+ shipped), and running my own products with real users.

WORK EXPERIENCE

LumApps · Lead Full-Stack AI Engineer [▶ Watch demo](#) 03/2026 - Present

Python TypeScript React LangGraph Google ADK MCP OpenAI Anthropic Gemini Vertex AI GCP RAG
Multi-Agent Systems Evaluation Pipelines LangSmith Neo4j Observability On-Call

- Shipped production multi-agent workflows on Python and TypeScript using LangGraph, Google ADK, OpenAI, Anthropic and Vertex AI. Tools over MCP, state streamed to the UI over AG-UI. 2x open rates, 2x approved opportunities, \$1M forecast quarterly.
- Built AI Brain, a temporal knowledge graph on Graphiti/Neo4j that unifies 5+ silos (Salesforce, HubSpot, Pendo, product usage) into one time-aware memory. Data modeling and API design that grounds RAG so agents stop hallucinating.
- Own the reliability layer: evals, LangSmith tracing, cost-per-request instrumentation, fallback/retry for LLM and tool failures, and on-call for global production. Reliable AI features, not demos.

Beekeeper AG · Senior Software Engineer (Technical Lead) 03/2020 - 02/2026

TypeScript Vue Node.js Java Python Kubernetes AWS Docker Terraform OpenAI Claude LangChain
PostgreSQL Elastic Search Kafka ClickHouse GitHub Actions Grafana Datadog

- Replaced \$337K/yr in vendor translation costs with an in-house LLM pipeline shipped in 6 weeks (GitHub Actions + OpenAI). 12K+ assets translated; product team ships in new languages without a gatekeeper.
- Architected Employee Referral System end to end (TypeScript/Vue, Java, PostgreSQL). Became the platform's top revenue channel: \$1.5M+ generated, \$500K ARR. Enterprise customers on the other end.
- Designed a distributed templating engine (Kafka, Elastic Search, microfrontends) that cut customer setup time 90% and powers 15% of all assets on the platform (10M+ users).
- Ran observability and global on-call (Grafana, Datadog, Logz.io). Hired and mentored the AI engineering cohort; engineers now lead features independently.

Dronistics (EPFL spin-off) · Founding Engineer 08/2018 - 03/2020

Founding Engineer Full-Stack Vue Java PostgreSQL AWS Docker Terraform CI/CD Real-time Systems
Enterprise Partnerships Zero-to-One

- Founding engineer for an autonomous drone delivery startup. Shipped full stack (Vue, Java, PostgreSQL, real-time APIs, AWS/Docker/Terraform infra) from empty repo to 500+ real-world deliveries.
- Talked to Unilever and other partners directly, turned prototypes into signed opportunities, and delivered a CES Las Vegas showcase. 99.5% safety record, zero incidents.

SwissNRI - AI Cross-border Fintech · <https://www.swissnri.com>01/2024 - Present

Co-Founder & Technical Lead

AI-native cross-border tax and compliance platform for Swiss-Indian families, replacing spreadsheets and expensive advisors. RAG-grounded assistant answers DTAA, FEMA and Swiss tax questions with citations back to the regulation; compliance-first agentic design flags risk before users file. Zero-to-MVP in 3 months, 40% uplift in satisfaction.

PulseView - Explainable AI Market Intelligence · <https://pulse-view.anand-creations.com>05/2025 - Present

Founder & Builder

Real-time market intelligence for retail traders. AI agents generate AND justify trading signals from technical and news data; if the model cannot explain the signal, it does not ship. Built solo end to end and shipped to live users on real-time feeds.

Anand Creations - AI Products & Forward Deployed Engineering · <https://anand-creations.com>06/2024 - Present

Founder & Principal Builder

Independent studio and home for the AI-native products I design, build, and ship on my own (SwissNRI, Proplab, PulseView). Full-stack, concept to real customers.
