Companies Founded

AI product engineer who ships agents that real users actually rely on. At LumApps I own production multi-agent workflows on LangGraph + Google ADK with tools exposed over MCP (2x conversions, \$1M forecast quarterly revenue). On the side I built Proplab, an AI-native product for real estate inspections and multilingual listings, and SwissNRI, an AI-native cross-border tax and compliance product (evals, refusals, and guardrails-before-features are default). 13+ years shipping to 10M+ users. Zurich-based, comfortable sitting with advisors for an afternoon and shipping the first agent in weeks.

WORK EXPERIENCE

LumApps · Lead AI Product Engineer [▶ Watch demo](#) 03/2026 - Present

Python TypeScript LangGraph Google ADK MCP AG-UI Multi-Agent Systems RAG Evaluation Pipelines Guardrails Refusal Patterns Prompt Engineering LangSmith Streaming UIs Product Ownership

- Took AI outbound from prototype to production: multi-agent workflows on Python, LangGraph, Google ADK with tools exposed over MCP and state streamed to the UI over AG-UI. Reps use it daily. 2x open rates, 2x approved opportunities, 2 to 3 hours saved per rep per day, \$1M forecast in quarterly revenue.
- Built the MCP layer over domain APIs: thin, well-designed tool wrappers agents act through. Same pattern the Necho JD describes; I was the first and most demanding consumer of our own API-first architecture.
- Own the reliability layer: eval pipelines that reflect real usage, LangSmith tracing, cost-per-request telemetry, verification loops, refusal patterns, human-in-the-loop draft-before-send. Report directly to C-level.

Beekeeper AG · Senior Software Engineer (Technical Lead) 03/2020 - 02/2026

Python Java TypeScript Vue Kubernetes AWS OpenAI Claude LangChain CrewAI Langfuse GitHub Actions PostgreSQL Elastic Search Discovery Product Instrumentation

- Replaced a \$337K annual vendor contract with an in-house LLM pipeline shipped in 6 weeks (GitHub Actions + OpenAI). 12K+ assets translated. Classic prototype-to-production motion the Necho role calls for.
- Built AI Onboarding Specialist: personalized high-touch guidance for every new signup. 100% of customers guided through setup, time-to-first-value cut without adding headcount. Discovery with product + CS, evals from day one.
- Co-owned GTM launches with Product and Sales. Each shipped with instrumentation so we knew within a week if it moved the needle, and killed the ones that didn't.
- Architected Employee Referral System end to end (Java, PostgreSQL, Elastic Search on Kubernetes). Became the platform's top revenue channel: \$1.5M+ revenue, \$500K ARR at 99.99% SLA.

Dronistics · Founding Engineer 08/2018 - 03/2020

Vue Java PostgreSQL AWS Docker CI/CD Discovery Zero-to-One Product

- Founding engineer for an EPFL spin-off. Shipped the full autonomous drone delivery platform (Vue/Java/PostgreSQL) that powered 500+ real-world deliveries. Sat with ops teams, mapped messy human workflows, turned them into working software.
- Built AWS infrastructure and CI/CD pipeline from scratch. Enterprise-grade reliability that enabled a Unilever partnership and a CES showcase.

Proplab - AI for Real Estate · <https://proplab.io>09/2025 - Present

Founder & AI Product Builder

Property inspections run on paper, clipboards, and WhatsApp photos. Built an AI-native MVP that removes the toil end to end: a vision pipeline extracts structured signals (room type, condition, defects) from inspection photos, and LLM agents turn those records into multilingual, marketing-ready property listings in one workflow. Direct parallel to Neho's mandate: remove manual work so experts spend time on the moments that matter.

SwissNRI - AI Cross-border Fintech (Regulated) · <https://www.swissnri.com>01/2024 - Present

Co-Founder & Technical Lead

AI-native cross-border tax and compliance platform for Swiss-Indian families. RAG-grounded assistant answers DTAA, FEMA and Swiss tax questions with citations back to regulation; compliance-first agentic design with refusal patterns and guardrails built before features. Zero-to-MVP in 3 months, 40% uplift in satisfaction. Same regulated, document-heavy discipline the Neho role calls for.

Anand Creations - Forward Deployed AI Practice · <https://anand-creations.com>06/2024 - Present

Founder & Principal

My independent practice and the home for AI products I ship myself. Same playbook I'd bring to Neho: discovery, prototype in weeks, evals from day one, ship to real users, measure, iterate.
