| AI Products Founded | Enterprise Revenue | Users Served | Costs Eliminated |

Forward Deployed Engineer by practice. Run Anand Creations as an independent FDE practice: embed with teams, run discovery, ship production agentic AI end to end. At LumApps I own a production multi-agent system on the employee experience platform (integrates Salesforce, HubSpot, Pendo via a temporal knowledge graph, MCP-authored tool servers, evals + on-call). Prior 6 years at Beekeeper, the frontline workforce platform: multi-tenant SaaS serving 10M+ users, enterprise SLA, cross-team integrations. Remote-native since 2018, comfortable overlapping with customer time zones anywhere.

WORK EXPERIENCE

LumApps · Lead AI Engineer

03/2026 - Present

PythonTypeScriptLangGraphGoogle ADMCP (Authored)AG-UIGCPVertex AIAPIs & Webhooks

OAuth / Service AccountsEvent-Driven (Pub/Sub)IdempotencyRAGEvaluation PipelinesLangSmithNeo4jOn-Call

- Shipped production multi-agent workflows on Python, LangGraph and Google ADK over GCP Vertex AI. Tools over MCP servers I authored; integrations into Salesforce, HubSpot, and Pendo via OAuth/service accounts; idempotent write-back with retry and audit log. 2x conversions, \$1M forecast quarterly.
- Designed AI Brain, a temporal knowledge graph on Graphiti/Neo4j unifying 5+ silos into one auditable time-aware store. Grounds RAG so agents stop hallucinating; event-driven ingest over Pub/Sub.
- Own reliability, observability, evals, and on-call: golden suites with behavioral assertions, LangSmith tracing so every run reconstructs from its log, cost-per-request instrumentation, fallback paths. Report to C-level on outcomes.

Beekeeper AG · Senior Software Engineer (Technical Lead)

03/2020 - 02/2026

TypeScriptVueNode.jsJavaPythonKubernetesAWSDockerTerraformMulti-Tenant SaaSRBAC & Data Privacy

Enterprise SLAOpenAILangChainCrewAIPostgreSQLElastic SearchKafkaGitHub ActionsOn-Call

- Multi-tenant SaaS for a frontline workforce platform (HR-adjacent, 10M+ users). Architected Employee Referral System end to end (Java, Vue, PostgreSQL); became the platform's top revenue channel: \$1.5M+ generated, \$500K ARR. Direct engagement with enterprise customers.
- Replaced \$337K/yr in vendor translation costs with an in-house LLM pipeline shipped in 6 weeks (GitHub Actions + OpenAI). Concept to production, then transitioned ownership to product team.
- Ran observability and global on-call across K8s + AWS (Grafana, Datadog, Logz.io, Langfuse). Enterprise SLA (99.99%), data privacy by design.
- Read, debugged, and improved codebases across 3 teams. Hired and mentored the AI engineering cohort; engineers now lead features independently.

Tenity · Startup Mentor & Technology Evaluation Panelist

06/2024 - Present

Technical DiscoveryEnterprise AdvisoryAI AdoptionCompliance

- Interviewed and evaluated 20+ startups on architecture, scalability, and AI readiness for seed-to-VC decisions. Structured discovery is the whole job.
- Advised portfolio companies on production AI adoption, compliance constraints, and shipping in enterprise contexts.

Dronistics (EPFL spin-off) · Founding Engineer

08/2018 - 03/2020

Founding EngineerEnterprise PartnershipsDiscovery to ProductionVueJavaPostgreSQLAWSDockerTerraform

- Founding engineer at a startup. Shipped full stack (Vue, Java, PostgreSQL, real-time APIs, AWS/Docker/Terraform infra) from empty repo to 500+ deliveries.
- Direct engagement with enterprise partners (Unilever). Ran structured discovery with each partner and turned prototypes into signed opportunities and a CES showcase.

Anand Creations - Forward Deployed Engineering Practice · <https://anand-creations.com>06/2024 - Present

Founder & Principal Forward Deployed Engineer

Independent Forward Deployed Engineering practice. Embed with teams, run technical discovery, resolve adoption blockers, ship production agentic AI end to end. Home for 3 AI products I ship solo (SwissNRI, Proplab, PulseView). Every engagement produces a reusable playbook, not a one-off.

SwissNRI - AI Cross-border Compliance · <https://www.swissnri.com>01/2024 - Present

Co-Founder & Technical Lead

Compliance-first AI-native platform for cross-border tax and finance. RAG-grounded assistant with citations back to the regulation; risk-flagging agents built before features. Zero-to-MVP in 3 months, 40% uplift in satisfaction. Direct experience with compliance constraints, security posture, and data privacy by design.

PulseView - Explainable AI Market Intelligence · <https://pulse-view.anand-creations.com>05/2025 - Present

Founder & Builder

Real-time AI agents that generate AND justify trading signals. Live users on real-time feeds. Solo end to end, evals baked in from day one.
