MBA-trained senior operator who architects GTM systems and ships them. At LumApps I built the AI-driven revenue automation that Sales and RevOps depend on (2x conversions, \$1M forecast quarterly) and report to C-level on outcomes. Prior 6 years co-owning cross-functional GTM launches at Beekeeper with Sales, PM and RevOps (\$1.5M+ in revenue shipped, top platform channel). MBA (93.2%) at Quantic, Startup Mentor at Tenity advising 20+ founders per year on GTM readiness for VC decisions, and 3 AI products founded solo through Anand Creations. Deep bias for AI and automation as the step-change lever, and for turning complexity into narratives executives can act on.

WORK EXPERIENCE

LumApps · Lead AI Engineer (GTM Automation) [▶ Watch demo](#) 03/2026 - Present

GTM Automation Revenue Motions Cross-Functional Program Leadership Executive Reporting Salesforce HubSpot Pendo
Product-Usage Signals Governance & Adoption Metrics AI/LLM Strategy C-Level Advisory

- Architected AI-driven revenue automation across Sales, RevOps and CS. Multi-agent workflows on Python + LangGraph unify Salesforce, HubSpot, Pendo, and product-usage signals into one auditable time-aware store (AI Brain). Step-change outcomes: 2x open rates, 2x approved opportunities, 2 to 3 hours per rep per day, \$1M forecast quarterly.
- Lead the transition to AI-native GTM operating models. Cross-functional program spanning Product, Sales, RevOps and Finance; C-level executive updates that synthesise complex data into actions.
- Own the governance and eval layer: safety cases, HITL gates, cost-per-request tracing, adoption metrics. Turned one-off wins into reusable patterns the rest of the org builds on.
