Users Served

3

Companies Founded

Full-stack product engineer who ships end to end and cares about how it feels. 13+ years building for 10M+ users, from Beekeeper's Employee Referral System (\$1.5M+ revenue, top platform channel) to AI outbound at LumApps (2x conversions, \$1M forecast). TypeScript across the stack, observability and debug UX baked in from day one, product decisions grounded in customer conversations, not vibes. Also run Anand Creations, my own practice where I design, build, and ship developer-facing AI products (PulseView, Proplab, SwissNRI) solo. Remote-native, default to action.

WORK EXPERIENCE

LumApps · Lead AI Engineer [▶ Watch demo](#) 03/2026 - Present

Python TypeScript AG-UI MCP React (via AG-UI) Observability Debug UX Evaluation Pipelines LangSmith GCP
Product Instrumentation Customer Conversations

- Own AI outbound end to end: agent architecture on Python and TypeScript, UI streamed over AG-UI, tools over MCP, and the debug/trace experience reps use to see exactly what the agent did and why. 2x open rates, 2x approved opportunities, \$1M forecast in quarterly revenue.
- Built the observability layer for AI in production: LangSmith tracing, cost-per-request telemetry, and eval pipelines that reflect real usage. Same craft that turns opaque model calls into something reps and PMs can actually understand.
- Report directly to C-level on outcomes. Talk to reps and PMs weekly, turn ambiguous complaints into shippable UI and API changes.

Beekeeper AG · Senior Software Engineer (Technical Lead, Product) 03/2020 - 02/2026

TypeScript Vue Microfrontends Module Federation Java PostgreSQL Elastic Search Kubernetes AWS Kafka Grafana
Datadog Product Ownership UX Design End-to-End Feature Delivery

- Architected Employee Referral System end to end (TypeScript/Vue frontend, Java backend, PostgreSQL, Elastic Search on Kubernetes). Became the platform's top revenue channel: \$1.5M+ revenue, \$500K ARR. Owned product thinking, UX, launch, and iteration.
- Designed distributed templating engine that cut customer setup time 90%. Powers 15% of all assets for 10M+ users. Zero-to-live in minutes, not days, because the UX was designed for it.
- Ran observability and global on-call (Grafana, Datadog, Logz.io): logs, metrics, dashboards, alerting. Built the debug experience I wanted product engineers to have.
- Co-owned GTM launches with Product and Sales (Seasonal Templates, Re-ignite Revenue, Sentiment Analysis). Each shipped with instrumentation so we knew within a week if it moved the needle.

Dronistics · Founding Engineer 08/2018 - 03/2020

Vue Java PostgreSQL AWS Docker CI/CD Real-time APIs Product Design Zero-to-One Product

- Founding engineer for an EPFL spin-off. Shipped the full autonomous drone delivery platform (Vue frontend, Java backend, PostgreSQL, real-time APIs) that powered 500+ real-world deliveries. Every screen designed by me, tested with real ops teams.
- Built AWS infra and CI/CD from scratch. Enterprise reliability that enabled a Unilever partnership and a CES Las Vegas showcase.

Anand Creations - Forward Deployed Engineering Practice · <https://anand-creations.com>06/2024 - Present

Founder & Principal

My independent practice and the home for AI products I design, build, and run myself (SwissNRI, Proplab, PulseView). Every screen, API, and email flow shipped by me solo. Same standards I bring to Resend-scale product surfaces: clarity, speed, and observability the user actually sees.

PulseView - AI Market Intelligence · <https://pulse-view.anand-creations.com>05/2025 - Present

Founder & Builder

Real-time market intelligence for retail traders. TypeScript across the stack, live-streaming UI, and an explainability layer that shows exactly why each trading signal fired. If the model can't justify the signal in the UI, it doesn't ship.

Proplab - AI for Real Estate · <https://proplab.io>09/2025 - Present

Founder & AI Product Builder

AI-native MVP for property inspections. Vision pipeline extracts structured signals from photos; LLM agents turn them into multilingual, marketing-ready listings. One workflow from photo capture to published listing, zero copy-paste. Full product surface designed and shipped solo.

EDUCATION

Quantic School of Business and Technology	2019 - 2020
MBA Business Administration	
EIT Digital	2014 - 2016
Master (Programme) Innovation & Entrepreneurship	
Eindhoven University of Technology (TU/e)	2015 - 2016
MSc (Netherlands) Embedded Networking	
KTH Royal Institute of Technology	2014 - 2015
MSc (Sweden) Embedded Systems	
Amrita Vishwa Vidyapeetham	2010 - 2014
Bachelor of Engineering Electronics and Communication	

CERTIFICATES

Build LLM Apps with LangChain
DeepLearning.AI
AI Agents in LangGraph
LangChain & Tavily
Building Modern Java Applications
AWS

AWARDS

AWS Cloud Credits for Research
Amazon Web Services (2020)
Appreciation from John T. Chambers (ex-CEO, Cisco Systems)
Cisco Systems
Recognized for contributions to strategic projects within Cisco's ecosystem
TI India Analog Design Contest Winner
Texas Instruments
