Cross-functional operator who bridges strategy, data, and execution. At LumApps I built the single source of truth for GTM: a temporal knowledge graph unifying Salesforce, HubSpot, Pendo and product-usage signals into one auditable store, feeding pipeline forecasting and executive reporting. Prior GTM ownership at Beekeeper: co-owned launches with Sales/PM/RevOps that shipped \$1.5M+ in revenue, all with instrumentation to prove impact within a week. MBA (93.2%) and 3 AI products founded solo, each requiring end-to-end GTM design (positioning, funnel, activation, expansion). SQL-comfortable, developer-native, remote-native.

GTM Data Strategy Single Source of Truth Pipeline Forecasting Salesforce HubSpot Pendo Product Usage Signals (PLG) SQL
Cross-Functional (Sales/RevOps/Finance) Executive Reporting Segmentation & Personalization Instrumentation

- Designed AI Brain, the single source of truth for GTM: a temporal knowledge graph unifying Salesforce, HubSpot, Pendo, and product-usage signals into one auditable store. Feeds pipeline health, forecasting, and executive reporting; queryable directly (SQL/Cypher) so any team can dispute a metric with data instead of an opinion.
- Own the AI outbound platform that Sales and RevOps depend on daily. Segmentation and personalization from CRM + product-usage data; instrumentation on top-of-funnel conversion, open rates, and approved-opportunity conversion. 2x conversions, \$1M forecast quarterly.
- Cross-functional with Sales, RevOps, Product, and Finance on rollout and outcomes. Report to C-level on what is working and what is not, with the query, not the summary.

GTM Launches Revenue Ownership Sales Enablement SQL & Data Warehouse Queries Salesforce Data Coverage & Segmentation
Pipeline Instrumentation Cross-Functional Leadership Enterprise B2B SaaS

- Co-owned cross-functional GTM launches with Sales, PM, and RevOps: Seasonal Templates, Re-ignite Revenue, Sentiment Analysis, Employee Lifecycle. Every launch shipped with instrumentation so we knew within a week if it moved pipeline.
- Architected the Employee Referral System and ran its GTM end to end. Became the platform's top revenue channel: \$1.5M+ generated, \$500K ARR. Owned coverage, activation, and post-launch expansion in partnership with Sales leadership.
- Built GenAI demo tooling that auto-produced personalized content per account from Salesforce data. Direct sales enablement impact; the same personalization playbook translated into email and outbound sequences.
- Wrote SQL and warehouse queries daily to answer product and GTM questions myself before pulling an analyst. Built dashboards, computed conversion metrics, and diagnosed pipeline anomalies from raw data.
