Companies Founded

Applied AI engineer who lives inside the revenue stack. At LumApps I ship the AI-native GTM systems the JD describes: multi-agent workflows over HubSpot, Salesforce and Pendo that 2x outbound conversions and forecast \$1M/quarter. I own the data-integrity layer behind them (temporal knowledge graph unifying 5+ silos, freshness checks, evals, cost telemetry). Prior 6 years at Beekeeper covered GenAI demo systems from Salesforce data, LLM pipelines, and co-owning GTM launches with Sales and PM. MBA-trained (Quantic, 93.2%), founder mindset, comfortable being the single accountable owner without a playbook.

WORK EXPERIENCE

LumApps · Lead Applied AI Engineer [▶ Watch demo](#) 03/2026 - Present

Applied AI GTM Systems HubSpot Salesforce Pendo Attribution AI Agents Automation Python SQL REST APIs Webhooks OAuth GCP Vertex AI LangChain LangGraph MCP LangSmith Monitoring

- Built and shipped AI-native GTM systems: multi-agent workflows over HubSpot, Salesforce and Pendo (Python + LangGraph + Google ADK on GCP) that 2x open rates, 2x approved opportunities, save reps 2 to 3 hours/day, forecast \$4M/quarter in opportunities and \$1M/quarter in revenue.
- Own the data-integrity layer: designed AI Brain, a temporal knowledge graph on Graphiti and Neo4j unifying 5+ silos (Salesforce, HubSpot, Pendo, transcripts, product usage) into one time-aware source. Freshness checks flag stale fields; ingestion runs event-driven on Pub/Sub.
- Own monitoring on top: eval pipelines (LangSmith), cost-per-request telemetry, tool-selection tuning, on-call for global production. Nothing in this stack needs a human to check by hand.

Beekeeper AG · Senior Software Engineer (Technical Lead) 03/2020 - 02/2026

GTM Systems Salesforce Applied AI Data Pipelines Attribution Automation Python SQL PostgreSQL ClickHouse Elastic Search REST APIs OpenAI LangChain AWS Kubernetes Grafana Datadog

- Built GenAI demo system for Sales: prompts fed by Salesforce data auto-generate per-customer pitch content. Improved demo speed and close rates on real deals. Applied AI to a classic RevOps problem end-to-end.
- Co-owned GTM launches with Sales, PM, and Customer Success (Seasonal Templates, Re-ignite Revenue, Sentiment Analysis). Each shipped with instrumentation so we knew within a week if it moved the needle. Employee Referral System became top revenue channel (\$1.5M+ generated, \$500K ARR).
- Replaced \$337K in annual vendor translation costs with an in-house Python + OpenAI pipeline shipped in 6 weeks. Diagnosed the recurring spend, decided to automate, built the fix.
- Ran observability and on-call for global production (Grafana, Datadog, Logz.io, Langfuse): dashboards, alerting, pipeline health. Fix-it procedures documented so a break did not require me.

Tenity · Startup Mentor & Technology Evaluation Panelist 06/2024 - Present

Consultant Communication GTM Advisory AI Strategy Startup Evaluation System Selection

- Evaluated 20+ startups on architecture, scalability, and AI readiness for seed-to-VC investment decisions. Presented consultant-style recommendations to investment committees.
- Advised portfolio founders on GTM system choices, AI adoption, and building revenue infrastructure that scales.

Dronistics · Founding Engineer 08/2018 - 03/2020

Single-Owner Systems Enterprise Integrations Vue Java PostgreSQL AWS Docker REST APIs Real-time Systems

- Founding engineer for EPFL spin-off drone delivery. Shipped end-to-end platform (Vue, Java, PostgreSQL, AWS) powering 500+ real-world deliveries. Closed Unilever partnership and CES Las Vegas showcase.
- Owned the full system as single accountable owner: architecture, integrations, data workflows, on-call, and the customer conversations behind them.

Anand Creations - Forward Deployed Engineering Practice · <https://anand-creations.com>06/2024 - Present

Founder & Principal Forward Deployed Engineer

Independent forward deployed engineering practice: embed with a team, run technical discovery, build the integrations, automations, and agent workflows that make the revenue stack scale. Home for the AI products I design, build, and run on my own (SwissNRI, Proplab, PulseView).

SwissNRI - AI Cross-border Fintech · <https://www.swissnri.com>01/2024 - Present

Co-Founder & Technical Lead

AI-native cross-border tax platform for Swiss-Indian families. Ran discovery with real users, built RAG-grounded assistant answering DTAA, FEMA and Swiss tax questions with citations to source regulation. Zero-to-MVP in 3 months, 40% uplift in user satisfaction.

PulseView - AI Market Intelligence · <https://pulse-view.anand-creations.com>05/2025 - Present

Founder & Builder

Real-time market intelligence platform for retail traders. AI agents generate AND justify trading signals with explainability built in: if the model can't explain the signal, it doesn't ship.
