Companies Founded

Forward deployed AI engineer who owns the customer's outcome, not a slice of a roadmap. Currently Lead AI Engineer at LumApps building production multi-agent systems on Python, LangGraph and GCP Vertex AI with evals, LangSmith tracing and cost-per-request telemetry designed for stochastic behavior. Delivered 2x sales conversions and \$1M/quarter forecast revenue. Founder of Anand Creations, my forward-deployed practice embedding with teams to run discovery, ship PoCs and productionize agents on top of their live data. 6 years at Beekeeper shipping AI-native features to 10M+ users under GDPR and strict reliability constraints; co-founded SwissNRI, a compliance-first regulated fintech. Comfortable in enterprise data silos, on-call for global production, and in front of the customer.

WORK EXPERIENCE

LumApps · Lead AI Engineer

▶ Watch demo

03/2026 - Present

Python SQL Multi-Agent Systems LangGraph Google ADK MCP Vertex AI GCP Evaluation Pipelines LangSmith
Stochastic Systems Data Pipelines Knowledge Graphs Neo4j Graphiti

- Ship production multi-agent workflows against live enterprise data (Salesforce, HubSpot, Pendo, transcripts, product usage) using Python, LangGraph, Google ADK on GCP Vertex AI, with MCP tool servers and AG-UI. 2x open rates, 2x approved opportunities, \$1M/quarter revenue forecast. Own the discovery-to-production loop and the ROI conversation with C-level.
- Built the eval, LangSmith tracing and cost-per-request layer that turns stochastic agent behavior into a system you can ship, measure and trust. Same pattern I apply when the answer changes every call.
- Architected AI Brain, a temporal knowledge graph on Graphiti and Neo4j that unifies 5+ enterprise silos into one queryable, time-aware layer with per-agent contracts and a freshness guard on retrieval. A working analog of an AI-first data platform.

Beekeeper AG · Senior Software Engineer (Technical Lead)

03/2020 - 02/2026

Python SQL PostgreSQL Kafka Elastic Search ClickHouse AWS Kubernetes OpenAI LangChain GDPR
Data Pipelines Enterprise Delivery PoC

- Replaced \$337K in annual vendor cost with an in-house LLM pipeline shipped in 6 weeks (Python, OpenAI, GitHub Actions). Ruthless ROI framing, direct P&L impact, product team unblocked from external gatekeepers.
- Ran the full data plumbing under 10M+ frontline users on AWS: PostgreSQL, Kafka pipelines, Elastic Search, ClickHouse. GDPR-sensitive workloads, 99.99% SLA on the top revenue channel (\$1.5M+ generated, \$500K ARR).
- Shipped AI-native customer flows (AI Onboarding Specialist, GenAI demo generator on Salesforce data). Built with evals, tracing and human-in-the-loop from day one; measured impact within a week of launch.
- Ran discovery and PoCs with Product, Sales and CIO; mentored the AI cohort; global on-call. Comfortable moving between engineering, data, GTM and the customer conversation.

Tenity · Startup Mentor & Technology Evaluation Panelist

06/2024 - Present

Discovery PoC Fintech AI Strategy Enterprise Advisory Stakeholder Translation

- Ran discovery-style diligence on 20+ fintech and AI startups: business models, data architecture, moats and ROI framing. Translated between engineers, founders and non-technical LPs.
- Mentored Opt Alpha on scaling algorithmic trading in production; advised multiple portfolio companies on where AI genuinely creates leverage and where it does not.

Dronistics · Founding Engineer

08/2018 - 03/2020

Founding Engineer Enterprise PoC AWS Vue Java PostgreSQL Docker Terraform CI/CD Real-Time Systems

- Founding engineer at an EPFL spin-off. Built the commercial platform (Vue/Java/PostgreSQL on AWS) end-to-end and ran the enterprise sales conversations that landed a Unilever partnership and a CES showcase.
- 500+ real-world deliveries, 40% faster, 99.5% safety record. Every output verifiable, every deployment auditable: the same bar regulated enterprise customers demand.

Anand Creations - Forward Deployed Engineering Practice · <https://anand-creations.com>06/2024 - Present

Founder & Principal Forward Deployed Engineer

Independent FDE practice. I embed with teams, run technical discovery, ship PoCs, and take agents from zero to production over the customer's live data with evals, tracing and cost telemetry from day one. Same operating model the JD describes: bridge, close, build, embed. Home for the AI products I run myself (SwissNRI, PulseView, Proplab).

SwissNRI - Compliance-First Regulated Fintech · <https://www.swissnri.com>01/2024 - Present

Co-Founder & Technical Lead

Live production platform for Swiss-Indian cross-border tax and financial compliance. RAG-grounded assistant answers DTAA, FEMA and Swiss tax with citations back to the regulation; agentic layer flags risk before users act. Compliance-first design (PII, GDPR-adjacent, regulator-verifiable outputs) built before features. Zero-to-MVP in 3 months, 40% uplift in user satisfaction.

PulseView - AI Market Intelligence on Live Data · <https://pulse-view.anand-creations.com>05/2025 - Present

Founder & Builder

Production AI platform ingesting real-time price and news time series, computing indicators and running agents that generate AND justify trading signals with cited evidence: if the model cannot explain the signal, it does not ship. Explainability, evaluation and back-testing baked in. A working example of turning noisy live data into verifiable, ROI-oriented AI output.

EDUCATION

Quantic School of Business and Technology	2019 - 2020
<i>MBA Business Administration</i>	
EIT Digital	2014 - 2016
<i>Master (Programme) Innovation & Entrepreneurship</i>	
Eindhoven University of Technology (TU/e)	2015 - 2016
<i>MSc (Netherlands) Embedded Networking</i>	
KTH Royal Institute of Technology	2014 - 2015
<i>MSc (Sweden) Embedded Systems</i>	
Amrita Vishwa Vidyapeetham	2010 - 2014
<i>Bachelor of Engineering Electronics and Communication</i>	

CERTIFICATES

Knowledge Graphs for RAG
Neo4j
AI Agents in LangGraph
LangChain & Tavily
Build LLM Apps with LangChain
DeepLearning.AI

AWARDS

AWS Cloud Credits for Research
Amazon Web Services (2020)
Appreciation from John T. Chambers (ex-CEO, Cisco Systems)
Cisco Systems
KTH Opportunities Fund
KTH Royal Institute of Technology
