Companies Founded

Lead engineer who sets technical direction across multiple concurrent AI initiatives, not just one project end to end. At LumApps I architect production multi-agent systems (LangGraph, Google ADK, MCP tool servers) with eval pipelines, agent tracing (LangSmith), and on-call ownership, so regressions get caught before customers see them. At Beekeeper I owned architecture across five production systems at once (Employee Referral, Templater, Forms, Manager Hub, Artifacts) while running observability and on-call for 10M+ users, and built the hiring pipeline for an AI engineering team that now ships independently. 13+ years building production software; every system I design has an evaluation loop and a metric attached, not just a demo.

WORK EXPERIENCE

LumApps · Lead Software Engineer

03/2026 - Present

LangGraph Google ADK MCP Vertex AI GCP Python TypeScript Multi-Agent Systems ReAct Evaluation Pipelines
LangSmith Observability On-Call RAG Vector Databases Neo4j Graphiti Salesforce AG-UI FastAPI

- Built and deployed production multi-agent workflows on Python, LangGraph and Google ADK over GCP Vertex AI, using ReAct, self-reflection and hierarchical delegation, with tools exposed over MCP servers (agent-to-tool integration) and agent state streamed to the UI over AG-UI. 2x open rates, 2x approved opportunities, \$1M forecast in quarterly revenue.
- Led technical discovery through production: agent architecture, eval pipelines, agent tracing (LangSmith), tool-selection tuning, and cost-per-request instrumentation, with on-call for global production systems, catching regressions before they reach customers.
- Designed AI Brain, a temporal knowledge graph on Graphiti and Neo4j that unifies 5+ silos (Salesforce, HubSpot, Pendo, conversation transcripts, product usage) into one time-aware memory every agent reads and writes, with a freshness layer that flags stale facts and grounds RAG retrieval to cut hallucinations.

Beekeeper AG · Senior Software Engineer (Technical Lead)

03/2020 - 02/2026

Kubernetes AWS Kafka PostgreSQL Elastic Search ClickHouse Observability Grafana Datadog Logz.io On-Call
OpenAI LangChain CrewAI Strands Agents Langfuse Claude Java Python TypeScript Vue Jenkins GitHub Actions

- Owned architectural design across five concurrent production systems at once (Artifacts, Forms, Employee Referral, Templater, Manager Hub), keeping each robust and modular by design while initiatives moved in parallel.
- Architected Employee Referral System end-to-end. Became the platform's top revenue channel (\$1.5M+ generated, \$500K ARR). Designed for 99.99% SLA because customer trust is measured in uptime.
- Acting hiring manager for AI engineering roles. Hired for craft and curiosity, mentored engineers who now lead features independently, raising the technical bar for the team.
- Ran observability and on-call for global production systems (Grafana, Datadog, Logz.io): logs, metrics, dashboards, and alerting for everything the team shipped.

Dronistics · Founding Engineer

08/2018 - 03/2020

AWS Docker Terraform Infrastructure as Code CI/CD Real-time Systems Flight Control APIs Logistics Optimization Vue
Java PostgreSQL

- Shipped end-to-end autonomous drone delivery platform (Vue/Java/PostgreSQL). 500+ successful deliveries in the real world.
- Built cloud infrastructure and CI/CD from scratch. Enabled enterprise partnerships with Unilever and a CES showcase.

EPFL, Laboratory of Intelligent Systems (Robogen) · AI Research Engineer

08/2016 - 03/2020

AI Research Genetic Algorithms Neural Networks AWS Distributed Simulation Python C++

- Engineered Robogen, an open-source AI platform for co-evolution of robot bodies and brains via genetic algorithms, a rare research direction where morphology and neural control evolve together.
- Migrated the simulation pipeline to AWS for large-scale parallel evolution runs impractical on local hardware. Secured AWS Cloud Credits for Research, featured on the AWS Public Sector Blog.

Anand Creations - Forward Deployed Engineering Practice · <https://anand-creations.com>06/2024 - Present

Founder & Principal Forward Deployed Engineer

Independent forward deployed engineering practice, currently the home for the AI products I design, build, and run on my own (SwissNRI, Proplab, PulseView). Open to forward-deployed client engagements: embedding with a team, running technical discovery, and shipping production agentic AI end to end. Take my own products from zero to production end to end: multi-agent systems, RAG grounding, eval pipelines, and observability, the same playbook I bring to any engagement.

SwissNRI - AI Cross-border Fintech · <https://www.swissnri.com>01/2024 - Present

Co-Founder & Technical Lead

AI-native cross-border tax and compliance platform for Swiss-Indian families, replacing spreadsheets and expensive advisors. RAG-grounded assistant answers DTAA, FEMA and Swiss tax questions in plain language with citations back to the regulation; compliance-first agentic design flags risk before users file, with regulatory guardrails built before features. Zero-to-MVP in 3 months, 40% uplift in satisfaction.

Proplab - AI for Real Estate · <https://proplab.io>09/2025 - Present

Founder & AI Product Builder

Property inspections run on paper, clipboards, and WhatsApp photos. Built an AI-native MVP: vision pipeline extracts structured signals (room type, condition, defects) from inspection photos; LLM agents turn those records into multilingual, marketing-ready listings end to end, zero copy-paste from photo to published listing.

EDUCATION

Quantic School of Business and Technology	2019 - 2020
<i>MBA Business Administration</i>	
EIT Digital	2014 - 2016
<i>Master (Programme) Innovation & Entrepreneurship</i>	
Eindhoven University of Technology (TU/e)	2015 - 2016
<i>MSc (Netherlands) Embedded Networking</i>	
KTH Royal Institute of Technology	2014 - 2015
<i>MSc (Sweden) Embedded Systems</i>	
Amrita Vishwa Vidyapeetham	2010 - 2014
<i>Bachelor of Engineering Electronics and Communication</i>	

CERTIFICATES

Building Modern Java Applications
AWS
Build LLM Apps with LangChain
DeepLearning.AI
Knowledge Graphs for RAG
Neo4j
AI Agents in LangGraph
LangChain & Tavily
Microsoft Certified Professional (MCPS)
Microsoft
MongoDB for Java Developers
MongoDB University

AWARDS

Appreciation from John T. Chambers (ex-CEO, Cisco Systems)
Cisco Systems
Recognized for contributions to strategic projects within Cisco's ecosystem
AWS Cloud Credits for Research
Amazon Web Services (2020)
TI India Analog Design Contest Winner
Texas Instruments
KTH Opportunities Fund
KTH Royal Institute of Technology
