Companies Founded

Forward deployed engineer and team lead who ships production LLM agents for real clients, not demos. At LumApps I own agent delivery end to end: tool-calling multi-agent systems on LangGraph and MCP, eval pipelines, and on-call for what's live. At Beekeeper I led the Incubation team reporting to the CIO, hired and mentored the AI engineering cohort, and co-owned GTM delivery with Sales and Product for a platform used by 10M+ users. Financial services is not new ground either: I mentor a high-frequency trading team on production systems, invest directly in AI and prediction markets (OpenAI, Anthropic, Polymarket), and built a fintech compliance platform and a market-intelligence agent system myself.

WORK EXPERIENCE

LumApps · Lead Software Engineer

03/2026 - Present

MCP LangGraph Google ADK Vertex AI GCP Python TypeScript Multi-Agent Systems Evaluation Pipelines LangSmith
Observability On-Call RAG Neo4j Graphiti Salesforce AG-UI FastAPI ReAct

- Built and deployed production multi-agent workflows on Python, LangGraph and Google ADK over GCP Vertex AI, with tools exposed over MCP servers (tool calling) and agent state streamed to the UI over AG-UI. 2x open rates, 2x approved opportunities, \$1M forecast in quarterly revenue.
- Led technical discovery through production: agent architecture, eval pipelines, agent tracing (LangSmith), tool-selection tuning, and cost-per-request instrumentation, with on-call for global production systems: designing, deploying, operating, and evaluating agentic systems end to end.
- Designed AI Brain, a temporal knowledge graph on Graphiti and Neo4j that unifies 5+ silos (Salesforce, HubSpot, Pendo, conversation transcripts, product usage) into one time-aware memory every agent reads and writes, grounding RAG retrieval to cut hallucinations.

Beekeeper AG · Senior Software Engineer (Technical Lead)

03/2020 - 02/2026

OpenAI LangChain Java Python TypeScript Vue Salesforce Kubernetes AWS Kafka PostgreSQL Elastic Search
ClickHouse CrewAI Strands Agents Langfuse Claude Observability Grafana Datadog Logz.io On-Call Jenkins
GitHub Actions

- Acting hiring manager for AI engineering roles: staffed and grew the AI engineering cohort, hired for craft and curiosity, mentored engineers who now lead features independently.
- Architected Employee Referral System end-to-end as Tech Lead of the Incubation team, reporting to CIO. Built the team and ran the GTM with Sales and PM. Became the platform's top revenue channel (\$1.5M+ generated, \$500K ARR), designed for 99.99% SLA.
- Replaced \$337K in annual vendor translation costs with an LLM pipeline built in 6 weeks (prototype to production). 12K+ assets translated, product team now iterates without external gatekeepers.
- Built GenAI demo system for sales that auto-generates personalized content from Salesforce data, translating each customer's requirements into a tailored pitch. Improved demo speed and close rates.

Tenity · Startup Mentor & Technology Evaluation Panelist

06/2024 - Present

Technical Mentoring Algorithmic Trading AI Strategy Startup Evaluation Scalability

- Mentored Opt Alpha on scaling high-frequency algorithmic trading systems in production, direct financial-services engineering exposure.
- Advised multiple portfolio companies on technical hiring, AI strategy, and building engineering cultures that actually ship.

Dronistics · Founding Engineer

08/2018 - 03/2020

Vue Java PostgreSQL AWS Docker Terraform Infrastructure as Code CI/CD Real-time Systems Flight Control APIs
Logistics Optimization

- Shipped end-to-end autonomous drone delivery platform (Vue/Java/PostgreSQL). 500+ successful deliveries, every flight a live production test for autonomous systems.
- Built cloud infrastructure and CI/CD pipeline from scratch. Enterprise-grade reliability that enabled partnerships with Unilever and a CES showcase, delivering for enterprise clients end to end.

Anand Creations - Forward Deployed Engineering Practice · <https://anand-creations.com>06/2024 - Present

Founder & Principal Forward Deployed Engineer

Independent forward deployed engineering practice, currently the home for the AI products I design, build, and run on my own (SwissNRI, Proplab, PulseView). Open to forward-deployed client engagements: embedding with a team, running technical discovery, and shipping production agentic AI end to end.

- Take my own products from zero to production end to end: multi-agent systems, RAG grounding, eval pipelines, and observability, the same playbook I bring to any client engagement.

SwissNRI - AI Cross-border Fintech · <https://www.swissnri.com>01/2024 - Present

Co-Founder & Technical Lead

AI-native cross-border tax and compliance platform for Swiss-Indian families, replacing spreadsheets and expensive advisors. RAG-grounded assistant answers DTAA, FEMA and Swiss tax questions in plain language with citations back to the regulation; compliance-first agentic design flags risk before users file, with regulatory guardrails built before features. Zero-to-MVP in 3 months, 40% uplift in satisfaction.

PulseView - AI Market Intelligence · <https://pulse-view.anand-creations.com>05/2025 - Present

Founder & Builder

Real-time market intelligence built for my own trading portfolio first, then opened to retail traders. AI agents generate AND justify trading signals from technical and news data, with explainability and evaluation built in: if the model can't explain the signal, it doesn't ship. Now serving live users on real-time feeds.
