

Anand Bhaskaran

Senior AI Engineer / Production Agents, RAG & MCP / LangChain / LangGraph / CrewAI / Open Source

📍 Zurich, Switzerland · ✉ anandbaskaran3193@gmail.com · 📞 +41763043193 · in anandb3 · 🌐 anandbhaskaran · 📄 anand-creations.com

3	\$1.5M+	10M+	4,600+
AI Products Founded	Revenue Shipped	Users Served	OSS Module Users

Senior AI engineer shipping production agents that real users depend on. Lead AI Engineer at LumApps: multi-agent workflows on Python with LangChain, LangGraph and Google ADK; tools over MCP servers I authored; RAG grounded by a temporal knowledge graph (Graphiti/Neo4j); LangSmith tracing and cost-per-request instrumentation. 2x conversions, \$1M forecast quarterly. Prior LLM shipping at Beekeeper (LangChain, CrewAI, \$337K/yr saved on translation). Founded 3 AI products solo through Anand Creations. Open source: Robogen (AI research at EPFL, featured on AWS blog) and a Terraform module on the Registry with ~4,600 users. Fully remote-native since Obermatt in 2018.

WORK EXPERIENCE

LumApps · Lead AI Engineer [▶ Watch demo](#) 03/2026 - Present

Python

LangChain

LangGraph

Google ADK

MCP (Authored)

AG-UI

GCP

Vertex AI

OpenAI

Anthropic

RAG

Vector Search

Neo4j

Graphiti

LangSmith

Evaluation Pipelines

Fault-Tolerant AI Services

On-Call

- Architected and deployed a production multi-agent system on Python with LangChain, LangGraph, and Google ADK over GCP Vertex AI. Tools exposed over MCP servers I authored, agent state streamed over AG-UI. High-performance, fault-tolerant AI service with fallback/retry and on-call. 2x conversions, \$1M forecast quarterly.
- Designed AI Brain, a temporal knowledge graph on Graphiti/Neo4j that unifies 5+ silos (Salesforce, HubSpot, Pendo, product usage) into one time-aware store grounding all RAG retrieval.
- Own the observability and evaluation layer: LangSmith tracing on every run, golden suites, judge rubrics, safety cases, cost-per-request instrumentation. No agent ships without evals.

Beekeeper AG · Senior Software Engineer (Technical Lead) 03/2020 - 02/2026

Python

TypeScript

Java

LangChain

CrewAI

Strands Agents

Langfuse

OpenAI

Kubernetes

AWS

Docker

Terraform

PostgreSQL

Elastic Search

Kafka

GitHub Actions

On-Call

- Replaced \$337K/yr in vendor translation costs with an in-house LLM pipeline shipped in 6 weeks (GitHub Actions + OpenAI + LangChain). 12K+ assets translated; product team ships in new languages without a gatekeeper.
- Built AI Onboarding Specialist and a GenAI demo generator using LangChain + CrewAI. LLM-powered features shipped end to end (prompts, orchestration, UI, evals). Improved demo speed and close rates.
- Designed a distributed templating engine that cut customer setup time 90% and powers 15% of all assets on the platform (10M+ users). High-performance backend for 10M+ users.
- Ran observability and global on-call across K8s + AWS (Grafana, Datadog, Logz.io, Langfuse). Hired and mentored the AI engineering cohort.

Dronistics (EPFL spin-off) · Founding Engineer 08/2018 - 03/2020

Founding Engineer

Backend Services

Vue

Java

PostgreSQL

AWS

Docker

Terraform

CI/CD

Real-time Systems

- Founding engineer at a startup. Shipped full stack (Vue, Java, PostgreSQL, real-time APIs, AWS/Docker/Terraform infra) from empty repo to 500+ real-world deliveries. Backend built for fault tolerance from day one.
- Direct engagement with enterprise partners (Unilever) and CES Las Vegas showcase.

EPFL, Laboratory of Intelligent Systems (Robogen) · AI Research Engineer & Open Source Maintainer 08/2016 - 03/2020

Open Source

Python

Pandas

NumPy

AWS

Neural Networks

Genetic Algorithms

Hugging Face (adjacent)

- Built and open-sourced Robogen, a platform for co-evolution of robot bodies and brains via genetic algorithms. Featured on the AWS Public Sector Blog.
- Data manipulation and scientific computing (Pandas, NumPy) for large-scale AWS parallel evolution runs. Secured AWS Cloud Credits for Research.

Anand Creations - AI Products, Open Source & Forward Deployed Engineering · <https://anand-creations.com>06/2024 - Present

Founder & Principal Builder

Independent studio and home for 3 AI-native products I ship solo (PulseView, Proplab, SwissNRI). Plus open source that people actually use: a Terraform URL-shortener module on the Terraform Registry with ~4,600 users, and Robogen from EPFL featured on the AWS Public Sector Blog.

PulseView - Explainable AI Market Intelligence · <https://pulse-view.anand-creations.com>05/2025 - Present

Founder & Builder

Real-time AI agents that generate AND justify trading signals. Live users on real-time feeds. RAG + explainability by design; if the model cannot explain the signal, it does not ship.

Proplab - AI-Native Property Workflows · <https://proplab.io>09/2025 - Present

Founder & AI Product Builder

Vision pipeline turns inspection photos into structured records; LLM agents compose multilingual, marketing-ready listings end to end. One flow, zero copy-paste.
