\$337K

Costs Eliminated

10M+

Users Served

3

Companies Founded

Senior backend engineer with 13+ years building distributed, event-driven systems for 10M+ users. Led a 3-team Search Platform revamp at Beekeeper (indexing and ranking redesign, measurable engagement lift), architected the Employee Referral System behind \$1.5M+ in revenue at 99.99% SLA, and ran global on-call across Grafana, Datadog, Logz.io. Now Lead AI Engineer at LumApps building event-driven agent workflows on GCP Pub/Sub. Deep on TypeScript, PostgreSQL, Elastic Search, Kafka, AWS, and incident triage in complex production codebases.

WORK EXPERIENCE

LumApps · Lead AI Engineer (Backend & Event-Driven Systems)

03/2026 - Present

TypeScript Python GraphQL REST APIs Event-Driven Architecture GCP Pub/Sub Neo4j Vector Databases FastAPI
Observability LangSmith Performance Tuning On-Call

- Built event-driven backend for AI Brain: temporal knowledge graph on Graphiti and Neo4j, event ingest over GCP Pub/Sub from 5+ upstream systems (Salesforce, HubSpot, Pendo, transcripts, product usage) with typed per-source contracts, freshness layer for stale-data detection, and per-agent query and write-back APIs.
- Shipped production Python + TypeScript services (FastAPI, LangGraph, Google ADK) on GCP with LangSmith tracing, cost-per-request telemetry, evals, and on-call. Same shape as high-throughput backend + observability, applied to LLM traffic.
- Report directly to C-level on outcomes. 2x open rates, 2x approved opportunities, \$1M forecast in quarterly revenue for the outbound product built on this platform.

Beekeeper AG · Senior Software Engineer (Technical Lead)

03/2020 - 02/2026

Java TypeScript Vue Node.js Tooling PostgreSQL Elastic Search Kafka ClickHouse Kubernetes AWS Docker
GitHub Actions Jenkins Grafana Datadog Logz.io Search & Ranking Incident Triage On-Call

- Led Search Platform revamp across 3 teams: redesigned indexing and ranking pipelines on Elastic Search to surface what users mean, not just what they typed. Measurable engagement lift. Same shape as feed and discovery work.
- Architected Employee Referral System end to end (Java, Vue, PostgreSQL, Elastic Search on Kubernetes). Became the platform's top revenue channel: \$1.5M+ revenue, \$500K ARR. Designed for 99.99% SLA at high traffic, integrated with third-party job boards over event-driven scraping.
- Designed a distributed templating engine (Java, Kafka event streaming) that cut customer setup time 90%. Powers 15% of all assets for 10M+ users. Projection cache + event-driven invalidation for sub-100ms preview.
- Ran observability and global on-call (Grafana, Datadog, Logz.io) for high-traffic production. Diagnosed and triaged incidents across service, DB, and infra layers; enforced comprehensive unit, integration and E2E test coverage on critical flows.

Dronistics · Founding Engineer

08/2018 - 03/2020

Java Vue PostgreSQL AWS Terraform Docker CI/CD Real-time APIs Infrastructure as Code

- Founding engineer for an EPFL spin-off. Shipped the full autonomous drone delivery platform (Vue/Java/PostgreSQL) that powered 500+ real-world deliveries. Built the backend, real-time flight control APIs, and logistics optimization from scratch.
- Built AWS infrastructure (EC2, S3, Terraform IaC) and CI/CD pipeline from scratch. Enterprise-grade reliability that enabled a Unilever partnership and a CES showcase.

PulseView - AI Market Intelligence · <https://pulse-view.anand-creations.com>05/2025 - Present

Founder & Builder

Real-time market intelligence platform for retail traders. TypeScript backend, event-driven ingest from live technical and news feeds, personalized signal generation with an explainability layer. Serves live users on real-time streams; if the model can't justify the signal, it doesn't ship.

Anand Creations - Forward Deployed Engineering Practice · <https://anand-creations.com>06/2024 - Present

Founder & Principal

Independent practice, home for AI products I design, build, and run myself (PulseView, Proplab, SwissNRI). Every backend, event pipeline, and observability layer shipped solo. Same rigor I bring to team production work.

Proplab - AI for Real Estate · <https://proplab.io>09/2025 - Present

Founder & AI Product Builder

AI-native MVP for property inspections. Vision pipeline extracts structured signals from photos into queryable, AI-readable data; LLM agents turn records into multilingual listings. One workflow, zero copy-paste from photo to published listing.
