Companies Founded

Senior AI engineer who sits with clients, maps the real problem, and ships production systems that hold up. Lead AI Engineer at LumApps, building multi-agent workflows on GCP that 2x outbound conversions and forecast \$1M in quarterly revenue. Also run Anand Creations, my forward deployed practice, including SwissNRI, an AI compliance product for regulated Swiss-Indian cross-border tax and financial rules. 13+ years shipping to real users on cloud-native stacks, with LLM observability, RAG grounding, and knowledge graph memory as day-job craft. Zurich-based, entrepreneurial, ship-focused.

WORK EXPERIENCE

LumApps · Lead AI Engineer

▶ Watch demo

03/2026 - Present

Python LLMs Multi-Agent Systems LangGraph Google ADK GCP Vertex AI MCP RAG Knowledge Graphs Neo4j Graphiti LangSmith LLM Observability Evaluation Pipelines Docker CI/CD

- Prototype to production for multi-agent workflows on Python, LangGraph and Google ADK over GCP Vertex AI, with tools over MCP and state streamed to the UI over AG-UI. 2x open rates, 2x approved opportunities, 2 to 3 hours saved per rep per day, \$1M forecast in quarterly revenue.
- Designed AI Brain, a temporal knowledge graph on Graphiti and Neo4j that unifies 5+ silos into one time-aware memory every agent reads and writes. Grounds RAG, cuts hallucinations, and gives observability into what the agent actually knew when it acted.
- Own the full lifecycle: architecture, eval pipelines, tracing (LangSmith), cost-per-request telemetry, cloud-native deployment on GCP, and on-call for global production. Report directly to C-level on outcomes.

Beekeeper AG · Senior Software Engineer (Technical Lead)

03/2020 - 02/2026

Python Java TypeScript Kubernetes AWS OpenAI Claude LangChain CrewAI Langfuse PostgreSQL Elastic Search Kafka ClickHouse Grafana Datadog GitHub Actions On-Call

- Replaced a \$337K annual vendor translation contract with an LLM pipeline (GitHub Actions + OpenAI APIs) shipped in 6 weeks. 12K+ assets translated. Classic prototype-to-production motion.
- Ran observability and global on-call (Grafana, Datadog, Logz.io, Langfuse for LLM traces): logs, metrics, dashboards, alerting. Diagnosed and fixed production issues across model, service, and infra layers.
- Architected Employee Referral System end to end (Java, Vue, PostgreSQL, Elastic Search on Kubernetes). Became the platform's top revenue channel: \$1.5M+ revenue, \$500K ARR. Designed for 99.99% SLA.
- Co-owned GTM launches with Product and Sales (Seasonal Templates, Re-ignite Revenue, Sentiment Analysis). Sat with the customer, translated pain into scoped features, shipped with instrumentation.

Dronistics · Founding Engineer

08/2018 - 03/2020

Vue Java PostgreSQL AWS Docker CI/CD Real-time Systems Client-facing Delivery

- Founding engineer for an EPFL spin-off. Shipped the full autonomous drone delivery platform (Vue/Java/PostgreSQL) that powered 500+ real-world last-mile deliveries. Sat with clients, translated ops pain into working software.
- Built cloud infrastructure and CI/CD pipeline from scratch on AWS. Enterprise-grade reliability that enabled a Unilever partnership and a CES showcase. 40% faster deliveries, 99.5% safety, zero incidents.

SwissNRI - AI Cross-border Fintech (Regulated) · <https://www.swissnri.com>01/2024 - Present

Co-Founder & Technical Lead

AI-native cross-border tax and compliance platform for Swiss-Indian families. RAG-grounded assistant answers DTAA, FEMA and Swiss tax questions in plain language with citations back to the regulation; compliance-first agentic design flags risk before users file, with regulatory guardrails built before features. Zero-to-MVP in 3 months, 40% uplift in satisfaction. Directly parallels ekona's regulated-industry work.

Anand Creations - Forward Deployed Engineering Practice · <https://anand-creations.com>06/2024 - Present

Founder & Principal Forward Deployed Engineer

My independent forward deployed practice and the home for AI products I ship myself (SwissNRI, Proplab, PulseView). Open to client engagements: embedding with a team, running technical discovery, and shipping production agentic AI end to end. Same playbook, whether the client is mine or someone else's.

Proplab - AI for Real Estate · <https://proplab.io>09/2025 - Present

Founder & AI Product Builder

AI-native MVP for property inspections. Vision pipeline extracts structured signals (room type, condition, defects) from photos; LLM agents turn those records into multilingual, marketing-ready listings end to end. One workflow, zero copy-paste from photo to published listing.

EDUCATION

- Quantic School of Business and Technology

2019 - 2020

MBA Business Administration
- EIT Digital

2014 - 2016

Master (Programme) Innovation & Entrepreneurship
- Eindhoven University of Technology (TU/e)

2015 - 2016

MSc (Netherlands) Embedded Networking
- KTH Royal Institute of Technology

2014 - 2015

MSc (Sweden) Embedded Systems
- Amrita Vishwa Vidyapeetham

2010 - 2014

Bachelor of Engineering Electronics and Communication

CERTIFICATES

- Knowledge Graphs for RAG

Neo4j
- AI Agents in LangGraph

LangChain & Tavily
- Build LLM Apps with LangChain

DeepLearning.AI

AWARDS

- AWS Cloud Credits for Research

Amazon Web Services (2020)
- Appreciation from John T. Chambers (ex-CEO, Cisco Systems)

Cisco Systems

Recognized for contributions to strategic projects within Cisco's ecosystem
- TI India Analog Design Contest Winner

Texas Instruments
