AI & Machine Learning

- Generative AI
- LLM Applications
- RAG Pipelines
- Langchain
- Machine Learning Deployment
- Scikit-Learn
- AI Agents

Technical Leadership

- System Architecture
- Technical Strategy
- Startup Mentoring
- Cross-functional Collaboration
- Trusted Advisor
- Customer Engagement

DevOps & Infrastructure

- AWS
- Kubernetes
- CI/CD
- Deployment Automation
- Amazon SageMaker
- Monitoring & Observability

Summary

AI-focused Senior Software Engineer with 10+ years of experience developing and deploying large-scale systems in production. Architected revenue-generating, AI-powered features and optimized workflows, achieving \$1.5M+ in revenue. Proven experience in startup engagement, mentoring teams, supporting tech initiatives, and driving cloud-based solutions.

Work Experience

Beekeeper AG08/2022 - Present

Senior Software Engineer (Technical Lead)

As a Technical Lead, I drive innovations with GenAI implementations and scalable systems that enhance platform reliability and user engagement.

- Architected Employee Referral System (99.99% SLA) primarily in AWS — generated \$1.5M+ revenue including \$500K ARR
- Built LLM-powered template translations using GitHub Actions and Sagemaker APIs — translated 12K+ key-value pairs, saved \$337K and accelerated go-to-market
- Designed distributed templating engine serving 10M+ users — reduced setup time by 90%, powers 15% of all platform assets
- Led GenAI template system for sales team — auto-generates customized content from Salesforce data, boosting demo speed and personalization
- Spearheaded Search Platform Revamp — led teams of 2-4 engineers delivering scalable architecture for enhanced user engagement
- Technical hiring manager for AI roles and deputy tech lead — mentored engineers while owning end-to-end delivery of core modules
- Drove cross-functional GTM initiatives — Seasonal Templates, Re-ignite Revenue, Sentiment Analysis, resulting in streamlined sales pipeline

Tenity06/2024 - Present

Startup Mentor & Technology Evaluation Panelist

Guiding startups through technical strategy and innovation, enabling impactful adoption of GenAI models and cloud technologies.

- Conducted thorough evaluations of emerging technologies for seed-to-VC startups, enhancing their competitive approach to innovation.
- Advised multiple startups on technical hiring, AI adoption, and scalable solution development using AWS Activate credits, fostering growth and efficiency.

Dronistics08/2018 - 03/2020

Founding Engineer

As a founding engineer, I developed an autonomous drone delivery system, optimizing logistics with real-time data processing.

- Built end-to-end autonomous drone delivery platform — architected full-stack solution (AWS/Vue/Java/PostgreSQL) powering 500+ successful deliveries.
- Delivered complete cloud infrastructure and DevOps pipeline in AWS — enabled scalable operations for enterprise partnerships with Unilever and CES showcase.
- Engineered real-time flight control APIs and logistics optimization algorithms — reduced delivery times by 40% while maintaining 99.5% safety record.

EPFL — Laboratory of Intelligent Systems (Robogen)08/2016 - 07/2018

Research Engineer

Led the development of an open-source AI & robotics platform, harnessing evolving algorithms to improve machine learning effectiveness.

- Robogen — AI & Robotics Research Platform: Led engineering of Robogen, an open-source platform for the co-evolution of robot morphologies and control systems.
- Spearheaded its migration to AWS, securing AWS Research Credits, and featured on the AWS Research Blog.
- Supervised 20+ master's students at EPFL, enhancing their understanding of AI implementation in robotics.

Full Stack & Backend

Java

Python

API Development

Microservices

PostgreSQL

Kafka

Product & Business

Product Ownership

Revenue Generation

Go-to-Market

Strategic Roadmaps

Stakeholder Management

Innovation Practices

Languages

English (Professional Working)
German (Beginner)

Certificates

- Building Modern Java Applications - AWS
- Build LLM Apps with LangChain - DeepLearning.AI
- Microsoft Certified Professional (MCPS) - Microsoft
- MongoDB for Java Developers - MongoDB University

Interests

- AI & Creativity
- MLOps
- Generative AI
- Startup Mentoring

Awards

- AWS Cloud Credits for Research - Amazon Web Services (2020)
- KTH Opportunities Fund - KTH Royal Institute of Technology
- TI India Analog Design Contest Winner - Texas Instruments

Entrepreneurial Projects

PulseView - AI Market Intelligence · <https://pulse-view.anand-creations.com>

05/2025 - Present

Founder & AI Product Builder

- Developed a real-time stock market analysis platform leveraging AI agents for trading signals.
- Implemented Explainable AI to enhance transparency in financial decision-making.
- Transitioned the platform from a personal tool to a public offering for retail traders and investors.
- Utilized technologies such as React and automation to optimize user experience.

Proplab - AI Real Estate Tools · <https://proplab.io>

09/2025 - Present

Founder & AI Product Builder

- Spearheaded the development of an MVP for a fully digital property inventory inspection system.
- Introduced AI-driven marketing tools to automate property listing creation, enhancing visibility.
- Implemented structured image-backed protocols for efficient property inspections.
- Leveraged AI capabilities to streamline real estate processes and improve operational efficiency.

Education

Quantic School of Business and Technology

2019 - 2020

MBA Business Administration

EIT Digital

2014 - 2016

Master (Programme) Innovation & Entrepreneurship

Eindhoven University of Technology (TU/e)

2015 - 2016

MSc (Netherlands) Embedded Networking

KTH Royal Institute of Technology

2014 - 2015

MSc (Sweden) Embedded Systems

Amrita Vishwa Vidyapeetham

2010 - 2014

Bachelor of Engineering Electronics and Communication

Blog Posts & Talks

EPFL designs robots through artificial evolution

11/2018

AWS Public Sector Blog

RoboGen, an open-source platform from EPFL, use AWS and artificial evolution (AI) to co-evolve robot bodies and brains. To power its demanding, distributed experiments, the project relies on AWS Cloud for dynamic scaling. This allows researchers and students to rapidly design, test, and manufacture the unique, evolved robots in the real world.

From Infinite possibilities to finite Results

AI for the rest of Us, UK (Talk)

Strategic framework presentation on transforming unlimited AI potential into measurable business outcomes through systematic implementation and practical constraint design.

AI and creativity

Front Conference (Talk)

Keynote presentation exploring the intersection of artificial intelligence and human creativity, demonstrating how AI can augment rather than replace creative processes in product development.

From Idea to Product

01/2022

Dev Innovation Summit 2022, USA (Talk)

Comprehensive methodology presentation on accelerating product development cycles through lean validation, rapid prototyping, and data-driven decision making in startup environments.

Agentic AI: Simple ReAct Agent

04/2025

The Compounding Curiosity (Substack)

Technical tutorial series introducing practical implementation of ReAct (Reasoning + Acting) agents, demonstrating how to build autonomous AI systems that combine reasoning capabilities with actionable decision-making for real-world applications.
