Generative AI & Conversational Systems

- Generative AI
- Conversational AI
- LLM Applications
- RAG Pipelines
- Agentic Platforms
- OpenAI APIs
- AI Product Design
- AI Agents
- Template Translation
- Sentiment Analysis

Backend & Full-Stack Engineering

- Python
- Java
- Vue.js
- API Development
- Microservices
- PostgreSQL
- Elastic Search
- Kafka
- Distributed Systems
- Scalable Architecture

Summary

AI-focused software engineer and technical lead with 10+ years' experience architecting and deploying GenAI-powered systems, including LLM-based virtual agents that delivered \$1.5M+ revenue and \$337K cost savings. Led engineering teams building production-grade automation, established developer and security standards, and drove business adoption through user-centric innovation in regulated environments.

Work Experience

Beekeeper AG

08/2022 - Present

Senior Software Engineer (Technical Lead)

Technical Lead delivering scalable, AI-driven solutions for millions of users. Spearheaded innovation in Generative AI, cross-functional platforms and customer-facing automation to optimize business value and reliability.

- Architected Employee Referral System (99.99% SLA), generating \$1.5M+ revenue and \$500K ARR for enterprise automation
- Built LLM-powered template translations with GitHub Actions and OpenAI APIs—translated 12K+ key-value pairs, saving \$337K and accelerating go-to-market
- Designed distributed templating engine serving 10M+ users—reduced setup time by 90%; powers 15% of all platform assets
- Developed Agentic AI Onboarding specialist utilizing multi-step reasoning to automate user setup—scaled personalized high-touch guidance to 100% of signups and reduced time-to-value
- Led GenAI demo template system for sales—auto-generates custom content from Salesforce data, boosting demo speed and personalization
- Directed Search Platform Revamp, leading teams of 2-4 engineers; delivered scalable architecture enhancing user engagement and satisfaction
- Acted as hiring manager for AI roles and mentored engineering teams, raising team standards and delivering robust, compliant AI modules

Tenity

06/2024 - Present

Startup Mentor & Technology Evaluation Panelist

Mentor and technology evaluation panelist, guiding startups in scaling AI, automation, and engineering excellence for business impact.

- Conducted thorough evaluations of emerging technologies for seed-to-VC startups, supporting robust AI adoption
- Advised startups on technical hiring, GenAI best practices, and building scalable, reliable automation solutions

Dronistics

08/2018 - 03/2020

Founding Engineer

Founding engineer designing and deploying autonomous drone delivery systems used in 500+ last-mile deliveries, enabling operational excellence through automation.

- Built end-to-end autonomous delivery platform (Vue/Java/PostgreSQL), powering 500+ mission-critical, real-world deliveries
- Delivered complete cloud and DevOps pipeline, enabling scalable production deployments and enterprise partnerships
- Engineered real-time logistics and control APIs—reduced delivery times by 40% while maintaining a 99.5% safety record

EPFL — Laboratory of Intelligent Systems (Robogen)

08/2016 - 07/2018

Research Engineer

Research engineer leading Robogen—an open-source platform for evolutionary AI robotics, with hands-on development of GenAI approaches and knowledge sharing.

- Led engineering of Robogen, enabling AI-based co-evolution of robot morphologies and control systems
- Spearheaded platform migration to AWS, securing research credits and showcasing at AWS Research Blog
- Supervised 20+ master's students and served as Teaching Assistant for Evolutionary Robotics, driving adoption of advanced AI methods

DevOps & Cloud Infrastructure

- CI/CD
- Kubernetes
- AWS
- Docker
- GitHub Actions
- Monitoring & Observability
- Deployment Automation
- Cloud-Native Operations
- Security & Compliance
- ClickHouse

Technical Leadership & Collaboration

- Technical Strategy
- Team Leadership
- Mentoring
- Cross-functional Collaboration
- Stakeholder Management
- Engineering Excellence
- Knowledge Sharing
- Hiring
- Product Ownership
- Strategic Roadmaps

Product & Business Innovation

- Go-to-Market
- A/B Testing
- Revenue Generation
- Solution Design
- Business Value
- Startup Mentoring
- Innovation Practices
- User Adoption
- Customer-Centric Design
- Lean Validation

Entrepreneurial Projects

PulseView - AI Market Intelligence · <https://pulse-view.anand-creations.com> 05/2025 - Present
Founder & AI Product Builder

- Developed real-time AI agent-powered platform for stock analysis, generating explainable trading signals with integrated technical and news insights.
- Built production-ready AI systems from MVP to public launch, focusing on speed, clarity, and explainable financial analysis.
- Applied automation, LLM-like explainability and advanced technical frameworks to enhance transparency and user adoption.
- Strong experience with React, AI Agents, and automation tooling in a regulated, data-driven environment.

Proplab - AI Real Estate Tools · <https://proplab.io> 09/2025 - Present
Founder & AI Product Builder

- Designed and built property inspection automation tool, digitizing manual workflows with structured, image-backed, and timestamped protocols.
- Leading development of AI-powered marketing assistant to automate listing creation and maximize market visibility.
- Implemented end-to-end GenAI use cases for real-world automation and measurable business value.
- Experience in applying AI to optimize large-scale business processes and create user-centric solutions.

SwissNRI - Cross-border Fintech Platform · <https://www.swissnri.com> 01/2024 - Present
Co-Founder & Technical Lead

- Spearheaded zero-to-one SaaS development of a cross-jurisdiction fintech platform using agile, compliance-first design.
- Implemented automation and customer feedback loops, increasing user satisfaction by 40% and addressing complex regulatory challenges.
- Demonstrated expertise in product ideation, stakeholder management, and delivering operationally stable, compliant software.
- Applied cloud technologies, SaaS architecture, and robust compliance systems aligned with market and regulatory needs.

Education

Quantic School of Business and Technology 2019 - 2020
MBA Business Administration

EIT Digital 2014 - 2016
Master (Programme) Innovation & Entrepreneurship

Eindhoven University of Technology (TU/e) 2015 - 2016
MSc (Netherlands) Embedded Networking

KTH Royal Institute of Technology 2014 - 2015
MSc (Sweden) Embedded Systems

Amrita Vishwa Vidyapeetham 2010 - 2014
Bachelor of Engineering Electronics and Communication

Certificates

- Building Modern Java Applications - AWS
- Build LLM Apps with LangChain - DeepLearning.AI
- Microsoft Certified Professional (MCPS) - Microsoft
- MongoDB for Java Developers - MongoDB University

Interests

- Agentic AI Systems
- Conversational AI
- AI & Creativity
- Startup Mentoring
- Microfrontends
- Scalable Platform Design

Awards

- AWS Cloud Credits for Research - Amazon Web Services (2020)
- KTH Opportunities Fund - KTH Royal Institute of Technology
- TI India Analog Design Contest Winner - Texas Instruments

Blog Posts & Talks

- Agentic AI: Simple ReAct Agent 04/2025
The Compounding Curiosity (Substack)
Technical tutorial series introducing practical implementation of ReAct (Reasoning + Acting) agents, demonstrating how to build autonomous AI systems that combine reasoning capabilities with actionable decision-making for real-world applications.
- From Infinite possibilites to finite Results
AI for the rest of Us, UK (Talk)
Strategic framework presentation on transforming unlimited AI potential into measurable business outcomes through systematic implementation and practical constraint design.
- Visualizing AI Embeddings with Heatmap
TowardsDev
Data visualization methodology article presenting innovative techniques for interpreting high-dimensional AI embeddings through interactive heatmap visualizations for enhanced model interpretability.
