- Automation Workflows

Summary

Seasoned technical leader with 10+ years delivering scalable, production-grade systems and AI-powered solutions across startups and enterprise settings. Expert in Java/Python, distributed architectures, and cloud-native automation. Drove \$1.5M+ revenue, architected customer-centric integrations, reduced operational costs by \$337K, and regularly translated real-world deployment insights into robust platform improvements.

Work Experience

Beekeeper AG 08/2022 - Present
Senior Software Engineer (Technical Lead)

Technical Lead steering deployment of scalable, production-grade solutions for millions of users and driving customer-centric platform innovation. Owned delivery of high-impact AI-powered integrations while mentoring engineers and translating customer needs into robust software architecture.

- Architected Employee Referral System (99.99% SLA), enabling customer-specific integrations and generating \$1.5M+ revenue, including \$500K ARR
- Built LLM-powered template translation pipeline leveraging OpenAI APIs and GitHub Actions—automated 12K+ translations, saving \$337K and accelerating delivery for customer requirements
- Designed distributed templating engine serving 10M+ users—reduced customer onboarding and setup time by 90%, adapting platform assets to diverse workflows
- Led GenAI demo template system that auto-generates personalized content from Salesforce data for sales teams, boosting demo speed, accuracy, and customer relevance
- Spearheaded Search Platform Revamp, guiding teams of 2-4 engineers in delivering scalable, production-ready architectures optimized for real-time user engagement
- Developed Agentic AI onboarding specialist with multi-step reasoning to automate customer setup, scaling personalized guidance to 100% of signups and reducing time-to-value
- Acted as technical hiring manager for AI roles and deputy tech lead—mentored engineers, advanced developer velocity, and ensured high-quality production code in evolving requirements

Tenity 06/2024 - Present
Startup Mentor & Technology Evaluation Panelist

Mentor and Technology Evaluation Panelist supporting deep-tech startups in prototyping, scalability, and technical roadmap planning. Advised early-stage teams on architecting production-ready software and effective technical execution.

- Conducted technical evaluations and feedback sessions for seed-to-VC startups, helping shape product-market fit and engineering best practices
- Mentored multiple teams—including Opt Alpha—on scalable system design, AI adoption, and building robust, production-grade APIs

Dronistics 08/2018 - 03/2020
Founding Engineer

Founding Engineer building and deploying an autonomous drone delivery platform used in 500+ live last-mile deployments with enterprise and research partners.

- Built and shipped full-stack autonomous drone delivery system (Vue/Java/PostgreSQL), powering 500+ real-world deliveries
- Delivered scalable cloud infrastructure and CI/CD pipeline—enabled enterprise partnerships and field deployment for Unilever and CES showcases
- Engineered real-time flight control APIs and optimization algorithms, reducing delivery times by 40% and achieving a 99.5% operational safety record

EPFL — Laboratory of Intelligent Systems (Robogen) 08/2016 - 07/2018
Research Engineer

Engineering lead for Robogen, creating open-source AI and automation tools for evolutionary robotics, and supporting real-world research and student projects.

- Led migration and deployment of the Robogen platform to AWS, improving scalability and reliability for applied robotics research
- Collaborated directly with student researchers and supervised 20+ master's projects on production-quality robotics code and cloud-based automation
- Spearheaded open-source platform engineering—featured on AWS Research Blog for impact in real-world research environments

Customer & Stakeholder Collaboration

- Customer Solutions
- Technical Integrations
- Product Ownership
- Stakeholder Management
- Cross-functional Collaboration
- Mentoring
- Requirement Analysis
- Technical Strategy

Leadership & Innovation

- Technical Leadership
- Team Leadership
- Startup Mentoring
- Innovation Practices
- Product Roadmaps
- Problem Solving
- Prototyping
- Go-to-Market
- Revenue Generation
- Strategic Decision Making

Languages

English (Professional Working)
German (Beginner)

Certificates

- Building Modern Java Applications - AWS
- Build LLM Apps with LangChain - DeepLearning.AI
- Microsoft Certified Professional (MCPS) - Microsoft
- MongoDB for Java Developers - MongoDB University

Entrepreneurial Projects

PulseView - AI Market Intelligence · <https://pulse-view.anand-creations.com>

05/2025 - Present

Founder & AI Product Builder

- Built a real-time stock market analysis platform leveraging AI agents to generate and explain trading signals.
- Integrated technical and news-based data pipelines for comprehensive, automated market insights.
- Developed explainable AI features to provide clarity and speed in financial analysis, improving user decision-making.
- Launched public-facing platform benefiting retail traders and investors with transparent analytics.

Proplab - AI Real Estate Tools · <https://proplab.io>

09/2025 - Present

Founder & AI Product Builder

- Designed and deployed MVP for a fully digitalized property inspection system, automating manual workflows through structured, image-backed protocols.
- Currently leading development of an AI-powered marketing assistant to automate listing creation and optimize multichannel property visibility.
- Built production-grade systems integrating AI, image processing, and marketing automation for real-world property workflows.

SwissNRI - Cross-border Fintech Platform · <https://www.swissnri.com>

01/2024 - Present

Co-Founder & Technical Lead

- Launched an innovative SaaS platform solving complex cross-border financial challenges for Indian nationals in Switzerland.
- Led end-to-end product development from concept to MVP in under 3 months with early customer adoption via strategic partnerships.
- Built compliance-first infrastructure addressing dual-jurisdiction financial regulations (FEMA, DTAA, Swiss laws).
- Drove product iteration based on customer feedback, resulting in a 40% increase in user satisfaction.

Education

Quantic School of Business and Technology

2019 - 2020

MBA Business Administration

EIT Digital

2014 - 2016

Master (Programme) Innovation & Entrepreneurship

Eindhoven University of Technology (TU/e)

2015 - 2016

MSc (Netherlands) Embedded Networking

KTH Royal Institute of Technology

2014 - 2015

MSc (Sweden) Embedded Systems

Amrita Vishwa Vidyapeetham

2010 - 2014

Bachelor of Engineering Electronics and Communication

Blog Posts & Talks

Agentic AI: Simple ReAct Agent

04/2025

The Compounding Curiosity (Substack)

Technical tutorial series introducing practical implementation of ReAct (Reasoning + Acting) agents, demonstrating how to build autonomous AI systems that combine reasoning capabilities with actionable decision-making for real-world applications.

From Infinite possibilites to finite Results

AI for the rest of Us, UK (Talk)

Strategic framework presentation on transforming unlimited AI potential into measurable business outcomes through systematic implementation and practical constraint design.

From Idea to Product

01/2022

Dev Innovation Summit 2022, USA (Talk)

Comprehensive methodology presentation on accelerating product development cycles through lean validation, rapid prototyping, and data-driven decision making in startup environments.
