Summary

AI-focused Python Engineer with 10+ years of experience in developing scalable applications using FastAPI and asynchronous programming. Led teams in deploying Generative AI solutions that improved user engagement and reduced costs. Proven track record in system design, code quality, and collaborating with cross-functional teams to deliver high-impact software solutions.

Work Experience

Beekeeper AG03/2020 - Present

Senior Software Engineer (Technical Lead)

Technical Lead responsible for driving innovation across scalable systems and AI-powered features, significantly contributing to platform reliability and user engagement.

- Led architectural design and launch of Employee Referral System with 99.99% SLA – generating \$1.5M+ revenue and \$500K ARR through agile methodologies.
- Spearheaded design and development of Beekeeper's Templating Engine, reducing setup time by 90% and enhancing user engagement, now powering 15% of platform assets.
- Engineered a robust search interface accommodating 10M+ users, elevating user engagement and accelerating platform adoption rate.
- Assembled and led high-performing remote engineering teams, fostering an environment for high-quality and maintainable code.
- Collaborated with product managers in running A/B experiments to derive data-driven insights for product enhancements.
- Designed and deployed advanced Generative AI translation systems, translating 12K+ key-value pairs, saving \$337K and expediting go-to-market.
- Built AI-driven stream template systems for sales, boosting demo speed and personalization.

Tenity06/2024 - Present

Startup Mentor & Technology Evaluation Panelist

Mentoring startups on scalability and technical strategy, facilitating the development of innovative and impactful technology solutions.

- Provided critical guidance to startups on technical strategies, aligning them with unique business goals to foster innovative practices.
- Conducted thorough evaluations of emerging technologies for startups, enabling scalable solutions and promoting effective growth.

Dronistics08/2016 - 03/2020

Founding Software Application Developer

As a founding engineer, developed an autonomous drone delivery system facilitating over 500 last-mile deliveries, optimizing logistics in real-time.

- Architected the complete software/cloud stack for Dronistics, showcasing the solution at CES Las Vegas and enabling 500+ successful deliveries.
- Engineered real-time flight control APIs and logistics optimization algorithms, reducing delivery times by 40% while maintaining a 99.5% safety record.
- Delivered complete cloud infrastructure and DevOps pipeline, enabling scalable operations for enterprise partnerships.

EPFL – Laboratory of Intelligent Systems (Robogen)01/2017 - 01/2020

Research Software Developer

Led engineering of Robogen, an open-source platform advancing research in the co-evolution of robot morphologies and control systems.

- Pioneered the engineering of an open-source platform for robot morphology co-evolution, contributing to significant advancements in robotics.
- Spearheaded AWS migration for the lab, securing AWS Research Credits and featuring the migration success on the AWS Research Blog.
- Supervised 20+ master's students in AI and robotics research, fostering a rich educational environment.

Full Stack Development

- Java
- Python
- Vue.js
- API Development
- PostgreSQL
- Elastic Search
- Microfrontends

Product Management

- Product Ownership
- A/B Testing
- Revenue Generation
- Go-to-Market
- Stakeholder Management
- Strategic Roadmaps

Languages

- English (Professional Working)
- German (Beginner)

Certificates

- Building Modern Java Applications - AWS
- Build LLM Apps with LangChain - DeepLearning.AI
- Microsoft Certified Professional (MCPS) - Microsoft
- MongoDB for Java Developers - MongoDB University

Interests

AI & Creativity

Scalable Solutions

Startup Mentorship

Generative AI Applications

Awards

- AWS Cloud Credits for Research - Amazon Web Services (2020)
- KTH Opportunities Fund - KTH Royal Institute of Technology
- TI India Analog Design Contest Winner - Texas Instruments

Entrepreneurial Projects

PulseView - AI Market Intelligence · https://pulse-view.anand-creations.com	05/2025 - Present
Founder & AI Product Builder	
- Built real-time stock market analysis platform utilizing AI agents to generate and explain trading signals. - Focused on explainable AI, ensuring clarity in financial analysis for retail traders and investors. - Integrated technical and news insights for comprehensive market assessments.	
Proplab - AI Real Estate Tools · https://proplab.io	09/2025 - Present
Founder & AI Product Builder	
- Developed an MVP for a digital property inspection system, streamlining workflows through AI. - Leading the creation of an AI-powered marketing assistant to automate property listing processes. - Implemented structured protocols for property inspections using image processing and automation.	
SwissNRI - Cross-border Fintech Platform · https://www.swissnri.com	01/2024 - Present
Co-Founder & Technical Lead	
- Launched the first platform addressing cross-border financial challenges for Indian nationals in Switzerland. - Led product development from concept to MVP in 3 months, establishing key strategic partnerships. - Designed compliance-first solutions navigating complex regulatory frameworks (FEMA, DTAA, Swiss regulations).	
Education	
Quantic School of Business and Technology	2019 - 2020
MBA Business Administration	
EIT Digital	2014 - 2016
Master (Programme) Innovation & Entrepreneurship	
Eindhoven University of Technology (TU/e)	2015 - 2016
MSc (Netherlands) Embedded Networking	
KTH Royal Institute of Technology	2014 - 2015
MSc (Sweden) Embedded Systems	
Amrita Vishwa Vidyapeetham	2010 - 2014
Bachelor of Engineering Electronics and Communication	
Blog Posts & Talks	
AI and creativity	
Front Conference (Talk)	
Keynote presentation exploring the intersection of artificial intelligence and human creativity, demonstrating how AI can augment rather than replace creative processes in product development.	
Agentic AI: Simple ReAct Agent	04/2025
The Compounding Curiosity (Substack)	
Technical tutorial series introducing practical implementation of ReAct (Reasoning + Acting) agents, demonstrating how to build autonomous AI systems that combine reasoning capabilities with actionable decision-making for real-world applications.	
From Infinite posibilidades to finite Results	
AI for the rest of Us, UK (Talk)	
Strategic framework presentation on transforming unlimited AI potential into measurable business outcomes through systematic implementation and practical constraint design.
