- Microservices
- API Development
- Cloud Infrastructure

AI & Machine Learning

- Generative AI
- LLM Applications
- Machine Learning Pipelines
- AI Product Design
- Model Integration
- OpenAI APIs

Summary

Results-driven Senior Software Engineer with 10+ years of experience leading high-impact projects. Spearheaded scalable features for B2B platforms reaching 10M+ users, drove \$1.5M+ in revenue, and ensured 99.99% reliability. Proven expertise in mentoring teams, optimizing infrastructure, and integrating AI technologies to enhance product efficiency and performance.

Work Experience

Beekeeper AG

08/2022 - Present

Senior Software Engineer (Technical Lead)

As Technical Lead at Beekeeper, I drive the development of core features for a B2B social media platform that serves over 10M users, focusing on scalability and reliability.

- Architected Employee Referral System (99.99% SLA) – generated \$1.5M+ revenue including \$500K ARR
- Built LLM-powered template translations using GitHub Actions and OpenAI APIs – translated 12K+ key-value pairs, saved \$337K and accelerated go-to-market
- Designed distributed templating engine serving 10M+ users – reduced setup time by 90%, powers 15% of all platform assets
- Led GenAI demo template system for sales team – auto-generates customized content from Salesforce data, boosting demo speed and personalization
- Spearheaded Search Platform Revamp – led teams of 2-4 engineers delivering scalable architecture for enhanced user engagement
- Acting technical hiring manager for AI roles and deputy tech lead – mentored engineers while owning end-to-end delivery of core modules
- Drove cross-functional GTM initiatives – Seasonal Templates, Re-ignite Revenue, Sentiment Analysis, resulting in streamlined sales pipeline

Tenity

06/2024 - Present

Startup Mentor & Technology Evaluation Panelist

As a mentor and panelist at Tenity, I guide startups on technical strategy and innovation, ensuring their solutions are scalable and impactful.

- Conducted thorough evaluations of emerging technologies for seed-to-VC startups.
- Advised multiple startups on technical hiring, AI adoption, and scalable solution development.

Dronistics

08/2018 - 03/2020

Founding Engineer

At Dronistics, I was responsible for the entire technology stack of an autonomous drone delivery system, ensuring high reliability in over 500 last-mile deliveries.

- Built end-to-end autonomous drone delivery platform – architected full-stack solution (Vue/Java/PostgreSQL) powering 500+ successful deliveries.
- Delivered complete cloud infrastructure and DevOps pipeline – enabled scalable operations for enterprise partnerships with Unilever and CES showcase.
- Engineered real-time flight control APIs and logistics optimization algorithms – reduced delivery times by 40% while maintaining 99.5% safety record.

EPFL – Laboratory of Intelligent Systems (Robogen)

08/2016 - 07/2018

Research Engineer

Led engineering of Robogen, an open-source platform for co-evolving robot designs, which enhanced AI and robotics research capabilities.

- Robogen – AI & Robotics Research Platform: Led engineering of an open-source platform for co-evolution of robot morphologies and control systems.
- Spearheaded its migration to AWS, securing AWS Research Credits and being featured on the AWS Research Blog.
- Supervised 20+ master's students at EPFL, fostering the next generation of engineering talent.

Full Stack Development

- React
- Vue.js
- API Development
- Microfrontends
- UI Prototyping
- Frontend Engineering

DevOps & Infrastructure

- CI/CD
- Kubernetes
- Docker
- Terraform
- Monitoring & Observability
- Deployment Automation

Languages

English (Professional Working)
German (Beginner)

Certificates

- Building Modern Java Applications - AWS
- Build LLM Apps with LangChain - DeepLearning.AI
- Microsoft Certified Professional (MCPS) - Microsoft
- MongoDB for Java Developers - MongoDB University

Interests

AI & Creativity

Scalable Systems

Startup Mentoring

Product Development

Cloud Infrastructure

Awards

- AWS Cloud Credits for Research - Amazon Web Services (2020)
- KTH Opportunities Fund - KTH Royal Institute of Technology
- TI India Analog Design Contest Winner - Texas Instruments

Entrepreneurial Projects

- PulseView - AI Market Intelligence · <https://pulse-view.anand-creations.com>

05/2025 - Present

Founder & AI Product Builder

- Developed a real-time stock market analysis platform leveraging AI agents for trading signals.
 - Integrated technical and news-based insights for comprehensive financial analysis.
 - Transitioned from a personal tool to a public platform serving retail traders and investors.
- Proplab - AI Real Estate Tools · <https://proplab.io>

09/2025 - Present

Founder & AI Product Builder

- Designed and built MVP for a digital property inspection system, automating workflows with AI.
 - Currently developing an AI-powered marketing assistant to enhance property visibility on marketplaces.
 - Implemented structured, image-backed protocols for reliable property inspection.
- SwissNRI - Cross-border Fintech Platform · <https://www.swissnri.com>

01/2024 - Present

Co-Founder & Technical Lead

- Launched a platform addressing complex cross-border financial challenges for Indian nationals in Switzerland.
 - Led MVP development within 3 months, driving user acquisition through strategic community partnerships.
 - Focused on compliance with critical regulatory requirements across multiple jurisdictions.

Education

- Quantic School of Business and Technology

2019 - 2020

MBA Business Administration
- EIT Digital

2014 - 2016

Master (Programme) Innovation & Entrepreneurship
- Eindhoven University of Technology (TU/e)

2015 - 2016

MSc (Netherlands) Embedded Networking
- KTH Royal Institute of Technology

2014 - 2015

MSc (Sweden) Embedded Systems
- Amrita Vishwa Vidyapeetham

2010 - 2014

Bachelor of Engineering Electronics and Communication

Blog Posts & Talks

- Microfrontends: Revolutionising Frontend Architecture

01/2023

Developer Week 2023, USA (Talk)

Technical deep-dive presentation demonstrating how microfrontend architecture enables scalable, team-autonomous development while reducing deployment complexity for enterprise applications.
- From Idea to Product

01/2022

Dev Innovation Summit 2022, USA (Talk)

Comprehensive methodology presentation on accelerating product development cycles through lean validation, rapid prototyping, and data-driven decision making in startup environments.
- AI and creativity

Front Conference (Talk)

Keynote presentation exploring the intersection of artificial intelligence and human creativity, demonstrating how AI can augment rather than replace creative processes in product development.
