

Anand Bhaskaran

SENIOR SOFTWARE ENGINEER | TECHNICAL LEAD | STARTUP MENTOR | MBA | AI

Technical leader with 10+ years architecting and deploying agentic AI systems in production, delivering \$337K+ cost savings and automation at scale. Led cross-functional teams on regulated SaaS and fintech platforms, integrating LLMs and governance frameworks to accelerate financial workflows, enhance audit integrity, and drive measurable operational efficiency for global organizations.

AGENTIC AI SYSTEMS

- Agentic Workflows
- LLM Orchestration
- Multi-Agent Systems
- OpenAI APIs
- Claude
- LangChain
- AI Governance
- RAG Pipelines
- Auditability
- Failure Detection

SYSTEMS ARCHITECTURE & AUTOMATION

- System Architecture
- Distributed Systems
- API Integration
- Microservices
- Workflow Automation
- DevOps
- Kubernetes
- CI/CD
- Terraform
- AWS

FINANCE & PRODUCT STRATEGY

- Finance Operations
- Scalable Architecture
- Regulatory Compliance
- Go-to-Market
- Stakeholder Management
- Revenue Generation
- Process Optimization
- Product Ownership
- A/B Testing
- Cross-functional Collaboration

BACKEND & DATA ENGINEERING

WORK EXPERIENCE

Beekeeper AG

08/2022 - Present

Senior Software Engineer (Technical Lead)

Technical Lead architecting scalable, reliable systems and deploying production-ready AI-powered features driving operational efficiency and automation for a SaaS platform used by millions. Led end-to-end delivery of agentic AI onboarding, resilient workflows, and cross-functional initiatives, improving platform velocity and accelerating digital transformation.

- Architected Employee Referral System (99.99% SLA), unlocking \$1.5M+ in revenue including \$500K ARR and supporting compliance-ready reporting.
- Built LLM-powered template translations using GitHub Actions and OpenAI APIs—translated 12K+ key-value pairs, saving \$337K and expediting launch cycles.
- Designed distributed templating engine serving 10M+ users, reducing setup time by 90% and powering 15% of platform assets, supporting scaling and audits.
- Developed an Agentic AI Onboarding specialist utilizing multi-step reasoning to automate user setup, reducing onboarding time and scaling personalized, auditable guidance to 100% of signups.
- Spearheaded Search Platform Revamp, leading teams to deliver scalable architecture—improving reliability and user engagement across regulated enterprise clients.
- Acted as technical hiring manager for AI roles and deputy tech lead, mentoring engineering teams and enhancing delivery of secure, audit-ready modules.
- Drove cross-functional go-to-market initiatives (Seasonal Templates, Re-ignite Revenue, Sentiment Analysis), streamlining sales pipeline and tracking impact metrics with operational dashboards.

Tenity

06/2024 - Present

Startup Mentor & Technology Evaluation Panelist

Technology mentor and evaluation panelist supporting startups with technical strategy, scalability, and automation, accelerating product delivery and operational readiness for regulated environments.

- Conducted thorough evaluations of emerging technologies for seed-to-VC startups, benchmarking infrastructure and advising on auditability and automation.
- Advised multiple startups—including guiding engineering teams on scaling algorithmic trading systems, optimizing reliability, and integrating AI for operational leverage.

Dronistics

08/2018 - 03/2020

Founding Engineer

Founding engineer for autonomous drone delivery platform, building robust, auditable and scalable end-to-end systems powering operational last-mile deliveries in demanding, regulated scenarios.

- Built and architected full-stack autonomous drone delivery system (Vue/Java/PostgreSQL), powering 500+ successful and auditable deliveries.
- Delivered cloud infrastructure and DevOps pipelines, enabling high reliability and scalable operations for enterprise partners including Unilever and CES showcase.
- Engineered real-time flight control APIs and logistics optimization, reducing delivery times by 40% while achieving a documented 99.5% safety record.

CERTIFICATES

- Building Modern Java Applications - AWS
- Build LLM Apps with LangChain - DeepLearning.AI
- Microsoft Certified Professional (MCPS) - Microsoft
- MongoDB for Java Developers - MongoDB University

INTERESTS

- AI & Creativity
- Agentic AI Systems
- Finance Automation
- Microfrontends
- Startup Mentoring
- Distributed Systems

AWARDS

- AWS Cloud Credits for Research - Amazon Web Services (2020)
- KTH Opportunities Fund - KTH Royal Institute of Technology
- TI India Analog Design Contest Winner - Texas Instruments

EPFL – Laboratory of Intelligent Systems (Robogen)

08/2016 - 07/2018

Research Engineer

Led Robogen engineering, delivering open-source research software for robotics and automating experiments on scalable cloud infrastructure, with a focus on reproducibility, auditability, and technical mentorship.

- Engineered the Robogen AI & Robotics Research Platform, enabling reproducible co-evolution of robot morphologies and controls for research and education.
- Spearheaded AWS migration and secured research credits, resulting in recognition on the AWS Research Blog and supporting audit-ready data handling.
- Supervised 20+ master's students and served as TA for Evolutionary Robotics, scaling adoption and process documentation to drive operational and research standards.

ENTREPRENEURIAL PROJECTS

PulseView - AI Market Intelligence · <https://pulse-view.anand-creations.com>
Founder & AI Product Builder

05/2025 - Present

- Developed and deployed a production-grade, real-time stock market analysis platform leveraging AI agents to generate and explain trading signals.
- Integrated technical and news-based data streams for comprehensive financial market analytics, with a strong focus on explainable AI and auditability.
- Engineered the system for speed, clarity, and robust automation, making advanced financial intelligence accessible to retail and professional users.
- Utilized React, automation frameworks, and modern AI orchestration tools for scalable, user-centric delivery.

SwissNRI - Cross-border Fintech Platform · <https://www.swissnri.com>
Co-Founder & Technical Lead

01/2024 - Present

- Led architecture and technical development of a SaaS fintech platform addressing complex, multi-jurisdictional financial and regulatory challenges.
- Delivered a secure, compliant MVP in 3 months for cross-border finance, prioritizing automation, controls validation, and audit-ready design.
- Established feedback-driven roadmap and increased user satisfaction by 40% through rapid iteration and strategic partnership integration.
- Designed and implemented compliance-first solutions supporting FEMA, DTAA, and Swiss regulatory requirements.

Proplab - AI Real Estate Tools · <https://proplab.io>
Founder & AI Product Builder

09/2025 - Present

- Built MVP for a digital property inventory inspection system, automating manual financial data capture and supporting structured, image-backed, timestamped protocols.
- Currently leading the development of an AI-powered marketing assistant automating listing creation and boosting multi-marketplace property visibility.
- Applied AI and image processing to streamline compliance workflows and reduce manual intervention in property management operations.

EDUCATION

Quantic School of Business and Technology
MBA Business Administration

2019 - 2020

EIT Digital
Master (Programme) Innovation & Entrepreneurship

2014 - 2016

Eindhoven University of Technology (TU/e)
MSc (Netherlands) Embedded Networking

2015 - 2016

KTH Royal Institute of Technology
MSc (Sweden) Embedded Systems

2014 - 2015

Amrita Vishwa Vidyapeetham
Bachelor of Engineering Electronics and Communication

2010 - 2014

Agentic AI: Simple ReAct Agent

The Compounding Curiosity (Substack)

Technical tutorial series introducing practical implementation of ReAct (Reasoning + Acting) agents, demonstrating how to build autonomous AI systems that combine reasoning capabilities with actionable decision-making for real-world applications.

AI and creativity

Front Conference (Talk)

Keynote presentation exploring the intersection of artificial intelligence and human creativity, demonstrating how AI can augment rather than replace creative processes in product development.

From Infinite possibilites to finite Results

AI for the rest of Us, UK (Talk)

Strategic framework presentation on transforming unlimited AI potential into measurable business outcomes through systematic implementation and practical constraint design.
