- OpenAI APIs
- Translation Systems
- AI-Powered Solutions

Summary

Proven technical leader with 10+ years' experience architecting and delivering AI-powered, cloud-native enterprise platforms. Led end-to-end solutions serving millions, drove \$1.5M+ in revenue, delivered scalable systems with >99.99% reliability, and mentored teams on strategy, adoption, and innovation while enabling measurable business value, automation, and sustainable technology evolution.

Work Experience

Beekeeper AG 08/2022 - Present
Senior Software Engineer (Technical Lead)

Technical Lead owning full lifecycle architectural design and delivery of enterprise-scale, AI-powered platforms, driving sustainable adoption of modern technologies and measurable business value for a platform serving millions.

- Architected Employee Referral System with 99.99% SLA, generating \$1.5M+ revenue and \$500K ARR through reusable, business-critical capabilities.
- Designed and delivered LLM-driven template translation system leveraging GitHub Actions and OpenAI APIs, translating 12K+ assets and saving \$337K while accelerating global go-to-market.
- Led architecture for distributed templating engine serving 10M+ users, reducing customer setup time by 90% and enabling scalable, reusable platform assets.
- Drove GenAI demo template system design and implementation, automating personalized content from Salesforce data to boost demo efficiency and stakeholder engagement.
- Revamped Search Platform, leading cross-functional teams to deliver scalable architecture that enhanced reliability, user engagement, and platform adoption.
- Acted as deputy tech lead and technical hiring manager for AI, mentoring engineers, ensuring delivery of core modules, and driving architectural alignment.
- Developed Agentic AI Onboarding specialist integrating multi-step reasoning for automated, scalable onboarding—providing personalized guidance to all users and significantly reducing time-to-value.

Tenity 06/2024 - Present
Startup Mentor & Technology Evaluation Panelist

Panelist and technology mentor guiding startup founders on technical strategy, scalable architecture, and high-impact adoption of cloud and AI technologies.

- Evaluated deep tech solutions for seed-to-VC startups, driving adoption of scalable technologies and enterprise-grade practices.
- Mentored engineering teams at Opt Alpha to architect and scale high-frequency trading systems, optimizing platform performance and operational reliability.

Dronistics 08/2018 - 03/2020
Founding Engineer

Founding Engineer responsible for end-to-end design and delivery of an autonomous, cloud-based drone delivery system used in over 500 last-mile deliveries.

- Architected autonomous drone platform (Vue/Java/PostgreSQL), scaling to 500+ deliveries and enabling enterprise cloud deployments.
- Delivered robust DevOps pipelines and cloud infrastructure powering enterprise partnerships and CES showcase operations.
- Engineered real-time APIs and logistics algorithms, reducing delivery times by 40% and achieving a 99.5% safety record.

EPFL — Laboratory of Intelligent Systems (Robogen) 08/2016 - 07/2018
Research Engineer

Led engineering for Robogen, delivering open-source innovation in AI-driven, cloud-enabled robotics, and supporting research and teaching at EPFL.

- Led architecture and engineering of Robogen, an AI robotics research platform enabling co-evolution of robot morphologies and control systems.
- Directed AWS cloud migration, secured AWS Research Credits, and achieved global recognition via the AWS Research Blog.
- Supervised 20+ master's students and contributed to curriculum as Teaching Assistant for Evolutionary Robotics.

Cloud & DevOps

- AWS
- Kubernetes
- CI/CD
- Docker
- Terraform
- Monitoring & Observability
- Jenkins
- GitHub Actions
- Cloud-Native
- Deployment Automation

Leadership & Collaboration

- Technical Leadership
- Mentoring
- Cross-functional Collaboration
- Stakeholder Management
- Team Leadership
- Technical Strategy
- Communication
- Change Management
- Hiring
- Product Ownership

Full Stack & Platform Engineering

- Java
- Python
- Vue.js
- TypeScript
- Microservices
- API Development
- PostgreSQL
- Kafka
- Elastic Search
- Distributed Systems

Languages

English (Professional Working)
German (Beginner)

Entrepreneurial Projects

PulseView - AI Market Intelligence · <https://pulse-view.anand-creations.com> 05/2025 - Present
Founder & AI Product Builder

- Developed and launched a real-time stock market analysis platform leveraging AI agents for explainable, reliable trading signals.
- Integrated technical and news-based insights to deliver comprehensive, automated market intelligence for diverse stakeholders.
- Took full ownership from concept to operationalization, scaling the platform from a personal tool to a public solution for retail investors.
- Emphasized explainable AI, speed, and clarity to drive adoption and measurable business value in financial analysis workflows.

Proplab - AI Real Estate Tools · <https://proplab.io> 09/2025 - Present
Founder & AI Product Builder

- Designed and delivered an MVP digitizing property inventory inspections, replacing manual, inefficient workflows with structured, image-backed, timestamped protocols.
- Led architectural and technical strategy for building scalable, AI-driven tools such as an AI-powered marketing assistant automating listing creation and marketplace visibility.
- Implemented automation and integration to optimize operational efficiency across business processes.
- Demonstrated hands-on leadership and agile iteration from concept through deployment in a complex, multi-stakeholder environment.

SwissNRI - Cross-border Fintech Platform · <https://www.swissnri.com> 01/2024 - Present
Co-Founder & Technical Lead

- Identified critical regulatory and market needs, architected and built the first cross-border fintech SaaS platform for complex financial challenges facing Indian nationals in Switzerland.
- Drove end-to-end, zero-to-one product development from concept through to MVP launch in 3 months, establishing scalable architecture and early user adoption.
- Enabled compliance, automation, and secure integration across complex regulatory systems (FEMA, DTAA, Swiss financial regulations).
- Set up continuous feedback loops and platform iteration, leading to a 40% increase in user satisfaction and demonstrable business value.

Education

Quantic School of Business and Technology 2019 - 2020
MBA Business Administration

EIT Digital 2014 - 2016
Master (Programme) Innovation & Entrepreneurship

Eindhoven University of Technology (TU/e) 2015 - 2016
MSc (Netherlands) Embedded Networking

KTH Royal Institute of Technology 2014 - 2015
MSc (Sweden) Embedded Systems

Amrita Vishwa Vidyapeetham 2010 - 2014
Bachelor of Engineering Electronics and Communication

Certificates

- Building Modern Java Applications - AWS
- Build LLM Apps with LangChain - DeepLearning.AI
- Microsoft Certified Professional (MCPS) - Microsoft
- MongoDB for Java Developers - MongoDB University

Interests

- Enterprise Architecture
- AI & Creativity
- Platform Scalability
- Automation
- Startup Mentoring
- Microfrontends

Awards

- AWS Cloud Credits for Research - Amazon Web Services (2020)
- KTH Opportunities Fund - KTH Royal Institute of Technology
- TI India Analog Design Contest Winner - Texas Instruments

Blog Posts & Talks

- Agentic AI: Simple ReAct Agent 04/2025
The Compounding Curiosity (Substack)
Technical tutorial series introducing practical implementation of ReAct (Reasoning + Acting) agents, demonstrating how to build autonomous AI systems that combine reasoning capabilities with actionable decision-making for real-world applications.
 - From Infinite possibilites to finite Results
AI for the rest of Us, UK (Talk)
Strategic framework presentation on transforming unlimited AI potential into measurable business outcomes through systematic implementation and practical constraint design.
 - Designing Robots Through Artificial Evolution
AWS Public Sector Blog
Featured technical article showcasing breakthrough research in evolutionary robotics, demonstrating how AWS cloud infrastructure enables large-scale artificial evolution simulations for autonomous system design.
