-  anandbhaskaran
- anand-creations

Technical Leadership

- System Architecture
- Team Leadership
- Technical Strategy
- Mentoring
- Cross-functional Collaboration
- Engineering Excellence

Full Stack & Backend

- Python
- Java
- Microservices
- API Development
- PostgreSQL
- Kubernetes
- Elastic Search

AI & Machine Learning

- Generative AI
- AI Agents
- OpenAI APIs
- LLM Applications
- AI Product Design
- Translation Systems

Summary

AI-focused software engineer with over 10 years of experience in designing scalable systems and leading high-performing teams. Delivered impactful features generating \$1.5M+ in revenue and \$337K in cost savings. Proven expertise in product-driven development, agile methodologies, and innovating AI solutions, ensuring high-quality engineering processes and customer-centric outcomes.

Work Experience

Beekeeper AG

03/2020 - Present

Senior Software Engineer (Technical Lead)

Technical Lead driving innovation in AI-powered features and scalable systems, ensuring robust platform reliability while mentoring engineering teams.

- Led architectural design and launch of Employee Referral System (99.99% SLA) — generated \$1.5M+ revenue including \$500K ARR through agile methodologies and customer-focused iteration
- Spearheaded development of Beekeeper's Templating Engine — reduced setup time by 90% and significantly enhanced user engagement, now powers 15% of all platform assets
- Engineered robust search interface accommodating 10M+ users — substantially elevated user engagement and accelerated platform adoption rate
- Assembled and led high-performing remote engineering teams to deliver maintainable code and customer-centric solutions
- Collaborated in creating A/B experiments, deriving insightful data for product iterations, enhancing user satisfaction
- Designed advanced Generative AI translation systems saving \$337K and accelerating go-to-market since Jan 2024, increasing operational efficiency
- Led cross-functional initiatives improving features like Seasonal Templates and Employee Lifecycle GTM, enhancing customer experience and functionality

Tenity

06/2024 - Present

Startup Mentor & Technology Evaluation Panelist

Mentor and evaluator guiding startups on building scalable AI solutions and optimizing technical strategy for growth.

- Conducted evaluations of emerging technologies, facilitating growth for seed-to-VC startups by aligning technical strategies with business goals
- Advised startups on AI adoption and scalable solution development, enhancing their operational efficiency and market readiness

Dronistics

08/2016 - 03/2020

Founding Software Application Developer

Founding engineer for Dronistics, developing an autonomous drone delivery platform utilized in over 500 last-mile deliveries.

- Delivered a complete software/cloud stack and infrastructure for an autonomous drone delivery system, successfully completing 500+ deliveries
- Optimized real-time flight control APIs, reducing delivery times by 40% while maintaining a 99.5% safety record
- Established enterprise partnerships by delivering scalable cloud infrastructure and DevOps pipelines

EPFL — Laboratory of Intelligent Systems (Robogen)

01/2017 - 01/2020

Research Software Developer

Led the development of Robogen, an open-source platform for co-evolving robotic morphologies and control systems.

- Spearheaded migration to AWS, featuring in the AWS Research Blog and enhancing computational capabilities for AI research
- Supervised 20+ master's students at EPFL in robotics and AI projects, fostering the next generation of engineers
- Contributed to impactful research in artificial evolution and robotics, leading to industry recognition and collaboration opportunities

DevOps & Infrastructure

- CI/CD
- Kubernetes
- Docker
- AWS
- Monitoring & Observability
- Deployment Automation

Product & Business

- Product Ownership
- A/B Testing
- Strategic Roadmaps
- Stakeholder Management
- Revenue Generation
- Go-to-Market

Languages

English (Professional Working)
German (Beginner)

Certificates

- Building Modern Java Applications - AWS
- Build LLM Apps with LangChain - DeepLearning.AI
- Microsoft Certified Professional (MCPS) - Microsoft
- MongoDB for Java Developers - MongoDB University

Interests

- AI & Security
- AI & Creativity
- Startup Mentoring
- Algorithmic Problem Solving
- Scalable Systems Design

Awards

- AWS Cloud Credits for Research - Amazon Web Services (2020)
- KTH Opportunities Fund - KTH Royal Institute of Technology
- TI India Analog Design Contest Winner - Texas Instruments

Entrepreneurial Projects

PulseView - AI Market Intelligence · <https://pulse-view.anand-creations.com>05/2025 - Present

Founder & AI Product Builder

- Built real-time stock market analysis platform using AI agents to generate and explain trading signals
- Focused on explainable AI to enhance speed and clarity in financial analysis
- Integrated technical and news-based insights for comprehensive market analysis

SwissNRI - Cross-border Fintech Platform · <https://www.swissnri.com>01/2024 - Present

Co-Founder & Technical Lead

- Led development of the first platform addressing complex cross-border financial challenges for Indian nationals in Switzerland
- Focused on compliance-first design while ensuring product innovation and user-driven iteration
- Achieved a 40% increase in user satisfaction through strategic partnerships and customer feedback loops

Obermatt - Fintech Product Development · <https://obermatt.com/en/home.html>07/2018 - 01/2021

Product Owner & Technical Lead

- Enhanced CI/CD pipelines with Docker implementation, reducing deployment times by 30%
- Introduced agile methodologies to increase team productivity by 20%
- Developed strategic roadmaps leading to improved customer satisfaction and retention rates

Education

Quantic School of Business and Technology2019 - 2020

MBA Business Administration

EIT Digital2014 - 2016

Master (Programme) Innovation & Entrepreneurship

Eindhoven University of Technology (TU/e)2015 - 2016

MSc (Netherlands) Embedded Networking

KTH Royal Institute of Technology2014 - 2015

MSc (Sweden) Embedded Systems

Amrita Vishwa Vidyapeetham2010 - 2014

Bachelor of Engineering Electronics and Communication

Blog Posts & Talks

AI and creativity

Front Conference (Talk)

Keynote presentation exploring the intersection of artificial intelligence and human creativity, demonstrating how AI can augment rather than replace creative processes in product development.

From Infinite possibilites to finite Results

AI for the rest of Us, UK (Talk)

Strategic framework presentation on transforming unlimited AI potential into measurable business outcomes through systematic implementation and practical constraint design.

Microfrontends: Revolutionising Frontend Architecture01/2023

Developer Week 2023, USA (Talk)

Technical deep-dive presentation demonstrating how microfrontend architecture enables scalable, team-autonomous development while reducing deployment complexity for enterprise applications.
