AI & Machine Learning

- Generative AI
- LLM Applications
- AI Agents
- OpenAI APIs
- NLP
- Automation Frameworks

Technical Leadership

- System Architecture
- Team Leadership
- Mentoring
- Cross-functional Collaboration
- Technical Strategy
- Product Vision

Full Stack & Backend

- Python
- Java
- API Development
- Microservices
- PostgreSQL
- Node.js

DevOps & Infrastructure

- CI/CD
- Kubernetes
- AWS
- Monitoring & Observability
- Deployment Automation
- Cloud Platforms

Summary

Innovative technology leader with over 10 years in AI and full-stack development, successfully driving architecture and product vision. Spearheaded high-impact AI solutions generating \$1.5M+ in revenue while mentoring and scaling high-performing engineering teams. Expertise in LLMs, automation, and cloud platforms, combined with entrepreneurial mindset to thrive in fast-paced startup environments.

Work Experience

Beekeeper AG

03/2020 - Present

Senior Software Engineer (Technical Lead)

Led technical innovation and AI-driven features for Beekeeper's platform, enhancing reliability and user engagement while mentoring engineers.

- Delivered Employee Referral System (99.99% SLA), generating \$1.5M+ in revenue including \$500K ARR through customer-focused iteration.
- Designed and implemented Beekeeper's Templating Engine, reducing setup time by 90% and boosting user engagement to 15% of all platform assets.
- Engineered robust search interface for 10M+ users, significantly accelerating platform adoption rate and enhancing user experience.
- Mentored junior engineers while leading high-performing remote teams, fostering a culture of high-quality and maintainable code.
- Collaborated on A/B experiments, driving insightful data for product iterations and improvements.
- Developed Generative AI translation systems, translating 12K+ key-value pairs and saving \$337K, expediting go-to-market efforts.
- Built an AI-driven template system for sales, enhancing demo speed and personalization through automation.

Tenity

06/2024 - Present

Startup Mentor & Technology Evaluation Panelist

Mentor and evaluator guiding startups on technical strategies and scalability, ensuring alignment with innovative practices.

- Evaluated emerging technologies for startups, enabling scalable solutions and impactful growth.
- Advised startups on AI adoption and technical hiring to enhance operational efficiency and innovation.

Dronistics

08/2016 - 03/2020

Founding Software Application Developer

Contributed as a founding engineer to the Dronistics autonomous drone delivery system, achieving significant operational milestones.

- Architected full-stack solution for drone delivery, completing over 500 last-mile successful deliveries.
- Engineered real-time flight control APIs, resulting in a 40% reduction in delivery times and maintaining a 99.5% safety record.
- Delivered complete cloud infrastructure and DevOps pipeline, facilitating scalable operations for enterprise partnerships.

EPFL — Laboratory of Intelligent Systems (Robogen)

01/2017 - 01/2020

Research Software Developer

Led the engineering of Robogen, an influential open-source platform for robotic systems, managing significant research initiatives.

- Directed migration to AWS, securing research credits and enhancing platform capabilities.
- Supervised over 20 master's students on robotics and AI projects, fostering the next generation of engineers.
- Contributed to award-winning research in artificial evolution, recognized through features on major industry blogs.

Product & Business

- Product Ownership
- Go-to-Market
- Revenue Generation
- Strategic Roadmaps
- Customer-Centric Solutions
- Startup Environment

Languages

English (Professional Working)
German (Beginner)

Certificates

- Building Modern Java Applications - AWS
- Build LLM Apps with LangChain - DeepLearning.AI
- Microsoft Certified Professional (MCPS) - Microsoft
- MongoDB for Java Developers - MongoDB University

Interests

- AI & Creativity
- Startup Mentoring
- SaaS Development
- Marketing Automation

Awards

- AWS Cloud Credits for Research - Amazon Web Services (2020)
- KTH Opportunities Fund - KTH Royal Institute of Technology
- TI India Analog Design Contest Winner - Texas Instruments

Entrepreneurial Projects

PulseView - AI Market Intelligence · https://pulse-view.anand-creations.com Founder & AI Product Builder	05/2025 - Present
- Built real-time stock market analysis platform using AI agents to generate and explain trading signals - Focus on explainable AI for financial analysis, enhancing trader decision-making - Technical and news-based insights for comprehensive market analysis	
Proplab - AI Real Estate Tools · https://proplab.io Founder & AI Product Builder	09/2025 - Present
- Designed and built MVP for fully digitalized property inventory inspection system, replacing manual workflows - Developing an AI-powered marketing assistant to automate listing creation and boost property visibility - Implemented structured and image-backed protocols for enhanced property inspection efficiency	
SwissNRI - Cross-border Fintech Platform · https://www.swissnri.com Co-Founder & Technical Lead	01/2024 - Present
- Launched first platform addressing complex cross-border financial challenges for Indian nationals in Switzerland - Led zero-to-one product development from concept to MVP in just 3 months with early user acquisition - Established customer feedback loops driving product roadmap prioritization and improved user satisfaction	
Education	
Quantic School of Business and Technology MBA Business Administration	2019 - 2020
EIT Digital Master (Programme) Innovation & Entrepreneurship	2014 - 2016
Eindhoven University of Technology (TU/e) MSc (Netherlands) Embedded Networking	2015 - 2016
KTH Royal Institute of Technology MSc (Sweden) Embedded Systems	2014 - 2015
Amrita Vishwa Vidyapeetham Bachelor of Engineering Electronics and Communication	2010 - 2014
Blog Posts & Talks	
AI and creativity Front Conference (Talk) Keynote presentation exploring the intersection of artificial intelligence and human creativity, demonstrating how AI can augment rather than replace creative processes in product development.	
From Infinite possibilites to finite Results AI for the rest of Us, UK (Talk) Strategic framework presentation on transforming unlimited AI potential into measurable business outcomes through systematic implementation and practical constraint design.
