Summary

AI-focused Senior Software Engineer with over 10 years of experience delivering scalable, high-impact solutions. Spearheaded architectural innovations leading to \$1.5M revenue, enhanced user experiences using React and Typescript, and developed complex systems for 10M+ users. Proven team leader, driving product iterations through effective collaboration and data-driven decision-making.

Work Experience

- Beekeeper AG**

03/2020 - Present

Senior Software Engineer (Technical Lead)

Technical Lead enhancing platform reliability and driving innovation through scalable systems and AI-powered features, used by millions of users.

 - Led architectural design and launch of Employee Referral System (99.99% SLA) — generated \$1.5M+ revenue including \$500K ARR through agile methodologies and customer-focused iteration
 - Spearheaded Beekeeper's Templating Engine — reduced setup time by 90% and enhanced user engagement significantly, now powers 15% of all platform assets
 - Engineered robust search interface accommodating 10M+ users, elevating user engagement and accelerating platform adoption rate
 - Assembled and led remote engineering teams, fostering an environment for high-quality code and customer-centric solutions
 - Collaborated with product managers on A/B experiments to derive insightful data for product iterations
 - Designed and deployed production-quality Generative AI translation systems — translated 12K+ key-value pairs, saved \$337K and accelerated go-to-market
 - Built AI-driven stream template system for the sales team, boosting demo speed and personalization

- Tenity**

06/2024 - Present

Startup Mentor & Technology Evaluation Panelist

Contributed as a mentor and evaluator, fostering scalability and technical innovation among startups.

 - Guided startups in developing core technical strategies aligned with unique goals, enhancing their scalability and innovation practices
 - Conducted thorough evaluations of emerging technologies for startups, facilitating growth and enabling impactful solutions

- Dronistics**

08/2016 - 03/2020

Founding Software Application Developer

Founding engineer for an autonomous drone delivery system, executing over 500 last-mile deliveries.

 - Engineered the autonomous drone delivery platform — architected complete software/cloud stack powering 500+ successful deliveries
 - Delivered cloud infrastructure enabling scalable operations for enterprise partnerships
 - Engineered real-time flight control APIs, optimizing delivery times by 40% and maintaining a 99.5% safety record

- EPFL — Laboratory of Intelligent Systems (Robogen)**

01/2017 - 01/2020

Research Software Developer

Led the development of an open-source platform for robot co-evolution, significantly contributing to advancements in AI and robotics.

 - Spearheaded AWS migration for Robogen, securing AWS Research Credits and featured on the AWS Research Blog
 - Supervised 20+ master's students in robotics and AI research, fostering innovation and hands-on experience
 - Contributed to groundbreaking research leading to industry recognition in artificial evolution and robotics

User Experience Design

- UI/UX Design
- WYSIWYG Components
- Performance Profiling
- Scalable Solutions
- Customer Experience
- Product Development

Languages

English (Professional Working)
German (Beginner)

Certificates

- Building Modern Java Applications - AWS
- Build LLM Apps with LangChain - DeepLearning.AI
- Microsoft Certified Professional (MCPS) - Microsoft
- MongoDB for Java Developers - MongoDB University

Interests

- AI & Creativity
- Scalability & Innovations
- User Experience
- Startup Mentoring

Microfrontends

Awards

- AWS Cloud Credits for Research - Amazon Web Services (2020)
- KTH Opportunities Fund - KTH Royal Institute of Technology
- TI India Analog Design Contest Winner - Texas Instruments

Entrepreneurial Projects

PulseView - AI Market Intelligence · https://pulse-view.anand-creations.com Founder & AI Product Builder	05/2025 - Present
- Built a real-time stock market analysis platform using AI agents, generating and explaining trading signals. - Focused on explainable AI for clarity in financial analysis, enhancing user experience. - Transitioned from a personal tool to a public platform for retail traders and investors.	
Proplab - AI Real Estate Tools · https://proplab.io Founder & AI Product Builder	09/2025 - Present
- Developed an MVP for a fully digitalized property inspection system, replacing manual workflows. - Currently leading an AI-powered marketing assistant project to automate listing creation, improving property visibility. - Implemented structured, image-backed protocols to enhance data integrity.	
SwissNRI - Cross-border Fintech Platform · https://www.swissnri.com Co-Founder & Technical Lead	01/2024 - Present
- Launched the first platform for cross-border financial challenges for Indian nationals in Switzerland, addressing a significant market need. - Developed the MVP in just 3 months, focusing on customer feedback for iterative improvements. - Designed the solution with compliance in mind, navigating multiple complex financial regulations.	
Education	
Quantic School of Business and Technology MBA Business Administration	2019 - 2020
EIT Digital Master (Programme) Innovation & Entrepreneurship	2014 - 2016
Eindhoven University of Technology (TU/e) MSc (Netherlands) Embedded Networking	2015 - 2016
KTH Royal Institute of Technology MSc (Sweden) Embedded Systems	2014 - 2015
Amrita Vishwa Vidyapeetham Bachelor of Engineering Electronics and Communication	2010 - 2014
Blog Posts & Talks	
Microfrontends: Revolutionising Frontend Architecture Developer Week 2023, USA (Talk) Technical deep-dive presentation demonstrating how microfrontend architecture enables scalable, team-autonomous development while reducing deployment complexity for enterprise applications.	01/2023
AI and creativity Front Conference (Talk) Keynote presentation exploring the intersection of artificial intelligence and human creativity, demonstrating how AI can augment rather than replace creative processes in product development.	
From Idea to Product Dev Innovation Summit 2022, USA (Talk) Comprehensive methodology presentation on accelerating product development cycles through lean validation, rapid prototyping, and data-driven decision making in startup environments.	01/2022
