Technical Leadership

- System Architecture
- Team Leadership
- Technical Strategy
- Mentoring
- Cross-functional Collaboration
- Engineering Excellence

Distributed Systems

- Java
- Python
- Microservices
- API Development
- PostgreSQL
- Kafka
- Elastic Search
- Real-time Data Processing

AI & Machine Learning

- Generative AI
- LLM Applications
- AI Agents
- OpenAI APIs
- AI Product Design
- RAG Pipelines

Summary

AI-focused Senior Software Engineer with over 10 years of experience in building and scaling distributed systems. Successfully led the architecture of high-performance solutions that delivered \$1.5M+ in revenue and achieved a 99.99% SLA. Proficient in Java, Python, and real-time data processing, driving innovation in data pipelines and catalog management.

Work Experience

Beekeeper AG

08/2022 - Present

Senior Software Engineer (Technical Lead)

Technical Lead focused on scaling infrastructure and driving innovation in AI-powered features for millions of users, enhancing developer velocity and platform reliability.

- Architected Employee Referral System (99.99% SLA) – generated \$1.5M+ revenue including \$500K ARR
- Built LLM-powered template translations using GitHub Actions and OpenAI APIs – translated 12K+ key-value pairs, saved \$337K and accelerated go-to-market
- Designed distributed templating engine serving 10M+ users – reduced setup time by 90%, powers 15% of all platform assets
- Led GenAI demo template system for sales team – auto-generates customized content from Salesforce data, boosting demo speed and personalization
- Spearheaded Search Platform Revamp – led teams of 2-4 engineers delivering scalable architecture for enhanced user engagement
- Acting technical hiring manager for AI roles and deputy tech lead – mentored engineers while owning end-to-end delivery of core modules
- Drove cross-functional GTM initiatives – Seasonal Templates, Re-ignite Revenue, Sentiment Analysis, resulting in streamlined sales pipeline

Tenity

06/2024 - Present

Startup Mentor & Technology Evaluation Panelist

Mentoring startups and evaluating emerging technologies to drive innovation in scalability and technical strategy.

- Conducted thorough evaluations of emerging technologies for seed-to-VC startups
- Advised multiple startups on technical hiring, AI adoption, and scalable solution development

Dronistics

08/2018 - 03/2020

Founding Engineer

Founding engineer for an autonomous drone delivery system, facilitating over 500 last-mile deliveries.

- Built end-to-end autonomous drone delivery platform – architected full-stack solution (Vue/Java/PostgreSQL) powering 500+ successful deliveries
- Delivered complete cloud infrastructure and DevOps pipeline – enabled scalable operations for enterprise partnerships with Unilever and CES showcase
- Engineered real-time flight control APIs and logistics optimization algorithms – reduced delivery times by 40% while maintaining 99.5% safety record

EPFL – Laboratory of Intelligent Systems (Robogen)

08/2016 - 07/2018

Research Engineer

Led engineering efforts for Robogen, advancing robot co-evolution research and AI applications.

- Led engineering of Robogen, an open-source platform for the co-evolution of robot morphologies and control systems
- Spearheaded its migration to AWS, securing AWS Research Credits and gaining visibility on the AWS Research Blog
- Supervised 20+ master's students at EPFL, enhancing educational initiatives in evolutionary robotics

DevOps & Infrastructure

- CI/CD
- Kubernetes
- AWS
- Monitoring & Observability
- Deployment Automation
- Flink
- Spark

Product & Business

- Product Ownership
- Revenue Generation
- Go-to-Market
- Stakeholder Management
- Cross-functional Collaboration
- Strategic Roadmaps

Languages

- English (Professional Working)
- German (Beginner)

Certificates

- Building Modern Java Applications - AWS
- Build LLM Apps with LangChain - DeepLearning.AI
- Microsoft Certified Professional (MCPS) - Microsoft
- MongoDB for Java Developers - MongoDB University

Interests

- AI & Creativity
- Startup Mentoring
- Large-scale Systems

Data Processing Technologies

Awards

- AWS Cloud Credits for Research - Amazon Web Services (2020)
- KTH Opportunities Fund - KTH Royal Institute of Technology
- TI India Analog Design Contest Winner - Texas Instruments

Entrepreneurial Projects

PulseView - AI Market Intelligence · <https://pulse-view.anand-creations.com>

05/2025 - Present

Founder & AI Product Builder

- Built real-time stock market analysis platform using AI agents to generate and explain trading signals
- Integrated technical and news-based insights for comprehensive market analysis
- Transitioned from a personal tool to a public platform for retail traders and investors

SwissNRI - Cross-border Fintech Platform · <https://www.swissnri.com>

01/2024 - Present

Co-Founder & Technical Lead

- Developed a platform addressing complex cross-border financial challenges for Indian nationals in Switzerland
- Led product development from concept to MVP in 3 months, focusing on customer-driven iterations
- Implemented regulatory compliance across multiple financial jurisdictions

Proplab - AI Real Estate Tools · <https://proplab.io>

09/2025 - Present

Founder & AI Product Builder

- Designed and built MVP for a digitalized property inventory inspection system, replacing manual workflows
- Currently leading development of an AI-powered marketing assistant to automate property listing creation
- Implemented structured and image-backed protocols for property inspections

Education

Quantic School of Business and Technology

MBA Business Administration

2019 - 2020

EIT Digital

Master (Programme) Innovation & Entrepreneurship

2014 - 2016

Eindhoven University of Technology (TU/e)

MSc (Netherlands) Embedded Networking

2015 - 2016

KTH Royal Institute of Technology

MSc (Sweden) Embedded Systems

2014 - 2015

Amrita Vishwa Vidyapeetham

Bachelor of Engineering Electronics and Communication

2010 - 2014

Blog Posts & Talks

Microfrontends: Revolutionising Frontend Architecture

01/2023

Developer Week 2023, USA (Talk)

Technical deep-dive presentation demonstrating how microfrontend architecture enables scalable, team-autonomous development while reducing deployment complexity for enterprise applications.

From Idea to Product

01/2022

Dev Innovation Summit 2022, USA (Talk)

Comprehensive methodology presentation on accelerating product development cycles through lean validation, rapid prototyping, and data-driven decision making in startup environments.

AI and creativity

Front Conference (Talk)

Keynote presentation exploring the intersection of artificial intelligence and human creativity, demonstrating how AI can augment rather than replace creative processes in product development.
