AI & Machine Learning

- Generative AI
- Large Language Models
- Retrieval-Augmented Generation
- Fine-Tuning
- AI Adoption
- OpenAI APIs
- AI Product Design

Technical Leadership

- Team Leadership
- Project Management
- Mentoring
- Cross-functional Collaboration
- Technical Strategy
- Innovation Initiatives

Full Stack & Backend

- Java
- Python
- API Development
- Microservices
- Vue.js
- PostgreSQL

Summary

Hands-on AI Strategist and Technical Lead with 10+ years of high-impact engineering. Delivered \$1.5M+ revenue and \$337K savings via Generative AI integrations (LLMs, RAG). Expert in AI Governance, full-stack solution architecture, and leading teams. I mentor startups and invest in disruptive companies (including OpenAI, Anthropic) ready to drive AI innovation for your portfolio.

Work Experience

Beekeeper AG

08/2022 - Present

Senior Software Engineer (Technical Lead)

Technical Lead focusing on AI-driven features and systems optimization, enhancing platform performance and developer efficiency in a high-impact environment.

- Architected AI-driven Employee Referral System (99.99% SLA) — generated \$1.5M+ revenue including \$500K in recurring annual revenue by automating candidate-job matching using LLMs and RAG
- Built LLM-powered translator using GitHub Actions and OpenAI APIs — translated 12K+ key-value pairs, saved \$337K and accelerated go-to-market
- Designed and implemented templating engine serving 10M+ users — reduced setup time by 90%, powers 15% of all platform assets
- Led GenAI demo template system for sales team — auto-generates customized content from Salesforce data, boosting demo speed and personalization
- Spearheaded Search Platform Revamp — led team of engineers delivering scalable architecture for enhanced user engagement
- Technical hiring manager for AI roles and deputy tech lead — mentored engineers while owning end-to-end delivery of core modules
- Drove cross-functional GTM initiatives — Seasonal Templates, Re-ignite Revenue, Sentiment Analysis, resulting in streamlined sales pipeline

Tenity

06/2024 - Present

Startup Mentor & Technology Evaluation Panelist

AI Strategist and Technical Panelist guiding FinTech startups; evaluating emerging companies in Generative AI and LLM technologies for strategic adoption, scalability, and fostering innovation across investment domains.

- Conducted thorough technical and business evaluations of emerging AI Fintech companies for potential investment and strategic partnership.
- Advised C-suite founders on cutting-edge AI strategies, Responsible AI Governance, and scalable solution development to optimize operations and accelerate market entry.

Dronistics

08/2018 - 03/2020

Founding Engineer

Founding Engineer and Architect for an autonomous delivery platform, leveraging advanced algorithms and full-stack engineering to drive operational efficiency and high-stakes innovation.

- Architected and built the end-to-end full-stack solution (Vue/Java/PostgreSQL) for the autonomous drone delivery platform, powering 500+ successful, real-world deployments.
- Engineered logistics optimization algorithms and real-time flight control APIs that directly reduced delivery times by 40% while ensuring a 99.5% safety record.
- Delivered complete cloud infrastructure and DevOps pipeline, enabling scalable operations for enterprise partnerships and major technology showcases (e.g., Unilever, CES).

EPFL — Laboratory of Intelligent Systems (Robogen)

08/2016 - 07/2018

Research Engineer

Led the engineering and platform architecture for Robogen, an innovative robotics platform central to artificial evolution research, demonstrating expertise in scalable cloud solutions and academic leadership.

- Spearheaded the engineering and architectural design of Robogen, creating a robust open-source platform that enhanced robot morphology co-evolution research capabilities.
- Successfully migrated the Robogen platform to AWS, securing credits and achieving exposure on the AWS Research Blog, proving ability to drive scalable cloud adoption.
- Acted as a Technical Supervisor, fostering educational growth and hands-on experience by mentoring over 20 master's students at EPFL in cutting-edge research.

DevOps & Infrastructure

- CI/CD
- AWS
- Kubernetes
- Deployment Automation
- Monitoring & Observability
- Terraform

Product & Business

- Product Ownership
- Go-to-Market
- Revenue Generation
- Stakeholder Management
- Strategic Roadmaps
- Market Research

Languages

- English (Professional Working)
- German (Beginner)

Certificates

- Building Modern Java Applications - AWS
- Build LLM Apps with LangChain - DeepLearning.AI
- Microsoft Certified Professional (MCPS) - Microsoft
- MongoDB for Java Developers - MongoDB University

Interests

AI & Creativity

Investment Strategies

Blockchain Innovation

Tech Startups

Scalable Systems

Awards

- AWS Cloud Credits for Research - Amazon Web Services (2020)
- KTH Opportunities Fund - KTH Royal Institute of Technology
- TI India Analog Design Contest Winner - Texas Instruments

Entrepreneurial Projects

PulseView - AI Market Intelligence · <https://pulse-view.anand-creations.com>05/2025 - Present

Founder & AI Product Builder

- Built a real-time stock market analysis platform using AI agents to enhance trading signals and insights.
- Integrated technical and news-based insights for comprehensive market analysis, significantly improving trading decision-making.
- Expanded the tool from personal use to a public platform utilized by retail traders and investors.

SwissNRI - Cross-border Fintech Platform · <https://www.swissnri.com>01/2024 - Present

Co-Founder & Technical Lead

- Launched the first platform addressing cross-border financial challenges for Indian nationals in Switzerland.
- Developed the solution from concept to MVP in 3 months, facilitating regulatory compliance across multiple jurisdictions.
- Implemented customer-driven feedback processes, leading to a 40% increase in user satisfaction and adoption.

Proplab - AI Real Estate Tools · <https://proplab.io>09/2025 - Present

Founder & AI Product Builder

- Designed and built an MVP for a digitalized property inventory inspection system, automating traditional workflows.
- Developing an AI-powered marketing assistant to automate listing creation, greatly enhancing property visibility.
- Implemented image-backed protocols for property inspections, improving accuracy and efficiency.

Education

Quantic School of Business and Technology2019 - 2020

MBA Business Administration

EIT Digital2014 - 2016

Master (Programme) Innovation & Entrepreneurship

Eindhoven University of Technology (TU/e)2015 - 2016

MSc (Netherlands) Embedded Networking

KTH Royal Institute of Technology2014 - 2015

MSc (Sweden) Embedded Systems

Amrita Vishwa Vidyapeetham2010 - 2014

Bachelor of Engineering Electronics and Communication

Blog Posts & Talks

From Idea to Product01/2022

Dev Innovation Summit 2022, USA (Talk)

Comprehensive methodology presentation on accelerating product development cycles through lean validation, rapid prototyping, and data-driven decision making in startup environments.

Agentic AI: Simple ReAct Agent04/2025

The Compounding Curiosity (Substack)

Technical tutorial series introducing practical implementation of ReAct (Reasoning + Acting) agents, demonstrating how to build autonomous AI systems that combine reasoning capabilities with actionable decision-making for real-world applications.

AI and creativity

Front Conference (Talk)

Keynote presentation exploring the intersection of artificial intelligence and human creativity, demonstrating how AI can augment rather than replace creative processes in product development.
