- anand-creations

Technical Leadership

- Mentoring
- Team Leadership
- Cross-functional Collaboration
- Engineering Excellence
- Technical Strategy
- System Architecture

Full Stack & Backend

- Java
- Python
- TypeScript
- Vue.js
- API Development
- PostgreSQL
- Microservices

AI & Machine Learning

- Generative AI
- LLM Applications
- AI Product Design
- OpenAI APIs
- Translation Systems
- AI Agents

Summary

AI-focused technical leader with over 10 years of experience driving product innovation and developer tools. Proven track record in shipping high-impact features, enhancing developer experiences, and aligning product roadmaps with strategic goals. Successfully led teams to achieve \$1.5M+ in revenue and implemented solutions that improved user engagement by 90%.

Work Experience

Beekeeper AG

03/2020 - Present

Senior Software Engineer (Technical Lead)

As a Technical Lead, I drove innovation across scalable systems and AI-powered features, significantly enhancing platform reliability and developer velocity.

- Led architectural design and launch of Employee Referral System (99.99% SLA) — generated \$1.5M+ revenue including \$500K ARR through agile methodologies and customer-focused iteration
- Spearheaded the design and development of Beekeeper's Templating Engine — reduced setup time by 90% and enhanced user engagement, now powers 15% of all platform assets
- Engineered robust search interface accommodating 10M+ users — elevated user engagement and accelerated platform adoption rate
- Assembled and led high-performing remote engineering teams, fostering an environment for maintainable code and customer-centric solutions
- Collaborated with product managers and data engineers in A/B experimentation to derive insightful data for product iterations
- Designed and deployed advanced Generative AI systems saving \$337K and accelerating go-to-market since Jan 2024
- Acting technical hiring manager for AI roles, mentoring junior engineers while owning end-to-end delivery of core modules

Tenity

06/2024 - Present

Startup Mentor & Technology Evaluation Panelist

Mentor and technology evaluation panel member guiding startups on scalability and technical strategy to enhance their innovations.

- Conducted thorough evaluations of emerging technologies for seed-to-VC startups, enabling impactful solutions and growth
- Advised multiple startups on technical hiring, AI adoption, and developing scalable solutions aligned with unique goals

Dronistics

08/2016 - 03/2020

Founding Software Application Developer

Founding engineer for Dronistics, developing an autonomous drone delivery system utilized in over 500 last-mile deliveries.

- Delivered a complete software/cloud stack for autonomous drone delivery, showcased at CES Las Vegas with partnerships like Unilever
- Built an end-to-end platform that powered successful operations for enterprise partnerships, achieving a 40% reduction in delivery times
- Engineered real-time flight control APIs maintaining a 99.5% safety record, optimizing logistics and operational efficiency

EPFL — Laboratory of Intelligent Systems (Robogen)

01/2017 - 01/2020

Research Software Developer

Led the engineering of Robogen, an open-source platform for co-evolving robot morphologies and control systems.

- Spearheaded migration of the Robogen platform to AWS, securing research credits and achieving recognition on the AWS Research Blog
- Supervised over 20 master's students in robotics and AI projects, fostering innovation and research in artificial evolution
- Contributed to groundbreaking research efforts in robotics, significantly advancing the field's academic and practical applications

DevOps & Infrastructure

- CI/CD
- Kubernetes
- Docker
- AWS
- Deployment Automation
- Monitoring & Observability

Product & Business

- Product Ownership
- Customer Insights
- Stakeholder Management
- A/B Testing
- Go-to-Market
- Strategic Roadmaps

Languages

English (Professional Working)
German (Beginner)

Certificates

- Building Modern Java Applications - AWS
- Build LLM Apps with LangChain - DeepLearning.AI
- Microsoft Certified Professional (MCPs) - Microsoft
- MongoDB for Java Developers - MongoDB University

Interests

- AI & Creativity
- Developer Tools
- Scalability
- Startup Mentoring
- Product Management

Awards

- AWS Cloud Credits for Research - Amazon Web Services (2020)
- KTH Opportunities Fund - KTH Royal Institute of Technology
- TI India Analog Design Contest Winner - Texas Instruments

Entrepreneurial Projects

PulseView - AI Market Intelligence · <https://pulse-view.anand-creations.com>05/2025 - Present

Founder & AI Product Builder

- AI-Powered Analysis: Built real-time stock market analysis platform using AI agents to generate and explain trading signals
- Focus Areas: Explainable AI, speed, and clarity in financial analysis
- Technical & News Integration: Based on technical and news-based insights for comprehensive market analysis

Proplab - AI Real Estate Tools · <https://proplab.io>09/2025 - Present

Founder & AI Product Builder

- MVP Development: Designed and built MVP for fully digitalized property inventory inspection system, replacing manual workflows
- AI Marketing Assistant: Currently leading development of AI-powered marketing assistant to automate listing creation and boost property visibility
- Structured Protocols: Implemented structured, image-backed, and timestamped protocols for property inspection

SwissNRI - Cross-border Fintech Platform · <https://www.swissnri.com>01/2024 - Present

Co-Founder & Technical Lead

- Market Innovation: Identified untapped market need and launched first platform addressing complex cross-border financial challenges for Indian nationals in Switzerland
- Zero-to-One Product Development: Led development from concept to MVP in 3 months, acquiring early users through strategic partnerships
- Compliance-First Design: Created solution addressing critical regulatory requirements across two complex financial jurisdictions

Education

Quantic School of Business and Technology MBA Business Administration	2019 - 2020
EIT Digital Master (Programme) Innovation & Entrepreneurship	2014 - 2016
Eindhoven University of Technology (TU/e) MSc (Netherlands) Embedded Networking	2015 - 2016
KTH Royal Institute of Technology MSc (Sweden) Embedded Systems	2014 - 2015
Amrita Vishwa Vidyapeetham Bachelor of Engineering Electronics and Communication	2010 - 2014

Blog Posts & Talks

From Idea to Product01/2022

Dev Innovation Summit 2022, USA (Talk)

Comprehensive methodology presentation on accelerating product development cycles through lean validation, rapid prototyping, and data-driven decision making in startup environments.

Microfrontends: Revolutionising Frontend Architecture01/2023

Developer Week 2023, USA (Talk)

Technical deep-dive presentation demonstrating how microfrontend architecture enables scalable, team-autonomous development while reducing deployment complexity for enterprise applications.

The Blueprint for Building High-Impact Teams

Medium

Leadership methodology article outlining proven strategies for assembling and scaling high-performing engineering teams through psychological safety, clear accountability, and growth-oriented culture.
