Technical Leadership

- Mentoring
- Team Leadership
- Engineering Excellence
- Technical Strategy
- Stakeholder Management
- Technical Standards
- Cross-functional Collaboration
- End-to-End Delivery
- Knowledge Sharing
- Hiring

AI & Machine Learning

- Generative AI
- LLM Applications
- AI Agents
- MLOps
- Model Monitoring
- RAG Pipelines
- NLP

Software Engineering & Architecture

- System Architecture
- API Development
- Microservices
- Clean Architecture
- Distributed Systems
- Code Review
- Testing
- TDD
- Prototyping

Summary

AI engineer with 10+ years' experience building and operating production-scale systems, combining deep technical proficiency in Software Systems, GenAI and cloud infrastructure. Delivered \$1.5M+ in business value, led cross-functional teams, and drove GenAI innovations that cut costs, accelerated delivery, and fostered high-performing systems through hands-on mentorship and technical ownership.

Work Experience

Beekeeper AG

08/2022 - Present

Senior Software Engineer (Technical Lead)

Technical Lead overseeing AI engineering excellence, scalable platforms, and team growth for products serving 10M+ users. Championed hands-on architecture, delivery, and mentoring to accelerate product innovation and operational reliability.

- Architected Employee Referral System (99.99% SLA) — generated \$1.5M+ revenue and \$500K ARR through robust backend and scalable cloud-native design
- Designed and delivered LLM-powered template translation system using GitHub Actions and OpenAI APIs — translated 12K+ key-value pairs, saving \$337K and expediting global product launch
- Built distributed templating engine serving 10M+ users — reduced initial setup time by 90% and scaled platform adoption across clients
- Drove Search Platform Revamp — led teams of 2–4 engineers to modernize search architecture, boosting user engagement and system resilience
- Developed agentic AI onboarding specialist utilizing multi-step reasoning — automated onboarding for 100% of signups, reducing time-to-value by integrating advanced GenAI techniques
- Led GenAI demo template system for sales — enabled auto-generated, data-driven content from Salesforce to accelerate sales cycles and boost demo personalization
- Acted as technical hiring manager and deputy tech lead for AI talent — mentored engineers, instituted code standards, and elevated delivery quality through hands-on leadership

Tenity

06/2024 - Present

Startup Mentor & Technology Evaluation Panelist

Mentored engineering teams and evaluated technical strategy for AI-driven startups, with a focus on scalable systems and innovation best practices.

- Evaluated emerging technologies and scalability for seed-to-VC startups, ensuring technical soundness and business alignment
- Provided technical guidance on hiring, AI adoption, and operational reliability, including hands-on mentorship for algorithmic trading teams

Dronistics

08/2018 - 03/2020

Founding Engineer

Led full-stack engineering for autonomous drone delivery platform, powering 500+ last-mile deliveries with robust AI and cloud-native architecture.

- Engineered autonomous drone delivery platform (Vue/Java/PostgreSQL) — supported 500+ successful real-world deliveries
- Developed scalable cloud infrastructure and DevOps pipelines — enabled secure enterprise deployments and accelerated product iteration
- Implemented real-time flight control APIs and logistics optimization — cut delivery times by 40% while achieving 99.5% operational safety

EPFL — Laboratory of Intelligent Systems (Robogen)

08/2016 - 07/2018

Research Engineer

Drove engineering for Robogen, an open-source platform advancing AI robotics research and co-evolution of robot morphologies and controllers.

- Led Robogen engineering to support AI-driven co-evolution of robot morphologies and control systems
- Migrated platform to AWS Cloud, securing AWS Research Credits and enhancing scalability featured by AWS
- Supervised 20+ master's students in AI and robotics, promoting knowledge sharing and upskilling within the lab

Cloud & Infrastructure

- AWS
- Kubernetes
- CI/CD
- Docker
- Terraform
- Scalable Systems
- Deployment Automation
- Monitoring & Observability

Data Engineering & Product Delivery

- Data Pipelines
- PostgreSQL
- Kafka
- Elastic Search
- Versioning
- A/B Testing
- Product Ownership
- Revenue Generation
- Go-to-Market
- Strategic Roadmaps

Certificates

- Building Modern Java Applications - AWS
- Build LLM Apps with LangChain - DeepLearning.AI
- Microsoft Certified Professional (MCPS) - Microsoft
- MongoDB for Java Developers - MongoDB University

Interests

- Generative AI Systems
- Technical Leadership
- Scalable Architecture
- MLOps & Model Monitoring

Awards

- AWS Cloud Credits for Research - Amazon Web Services (2020)
- KTH Opportunities Fund - KTH Royal Institute of Technology
- TI India Analog Design Contest Winner - Texas Instruments

Entrepreneurial Projects

PulseView - AI Market Intelligence

· <https://pulse-view.anand-creations.com>

05/2025 - Present

Founder & AI Product Builder

- Developed a scalable, production-grade AI platform for real-time stock market analysis leveraging AI agents to generate and explain trading signals.
- Integrated technical and news-based data sources to deliver comprehensive, explainable financial insights for retail traders and investors.
- Prioritized explainable AI, robustness, and speed to support high-stakes financial decision-making.
- Built and deployed end-to-end workflows using automation and modern technologies, demonstrating hands-on capability in AI solutions architecture.

Proplab - AI Real Estate Tools

· <https://proplab.io>

09/2025 - Present

Founder & AI Product Builder

- Architected and delivered the MVP for a fully digitalized, AI-powered property inspection platform, automating previously manual workflows.
- Implemented structured, image-backed, timestamped protocols for reliable, auditable data capture in real estate processes.
- Demonstrated leadership in product strategy, technical delivery, and iterative improvement cycles.

SwissNRI - Cross-border Fintech Platform

· <https://www.swissnri.com>

01/2024 - Present

Co-Founder & Technical Lead

- Led the zero-to-one development and launch of an innovative fintech platform solving complex cross-border financial challenges for Indian nationals in Switzerland.
- Architected SaaS and compliance-first systems addressing regulatory requirements across multiple jurisdictions (FEMA, DTAA, Swiss regulations).
- Drove rapid MVP execution, established feedback loops with early adopters, and directed technical teams to deliver product iterations with measurable increases in user satisfaction.
- Demonstrated hands-on technical leadership and excellence in building scalable, regulated cloud-native platforms.

Education

Quantic School of Business and Technology

2019 - 2020

MBA Business Administration

EIT Digital

2014 - 2016

Master (Programme) Innovation & Entrepreneurship

Eindhoven University of Technology (TU/e)

2015 - 2016

MSc (Netherlands) Embedded Networking

KTH Royal Institute of Technology

2014 - 2015

MSc (Sweden) Embedded Systems

Amrita Vishwa Vidyapeetham

2010 - 2014

Bachelor of Engineering Electronics and Communication

Blog Posts & Talks

Agentic AI: Simple ReAct Agent

04/2025

The Compounding Curiosity (Substack)

Technical tutorial series introducing practical implementation of ReAct (Reasoning + Acting) agents, demonstrating how to build autonomous AI systems that combine reasoning capabilities with actionable decision-making for real-world applications.

AI and creativity

Front Conference (Talk)

Keynote presentation exploring the intersection of artificial intelligence and human creativity, demonstrating how AI can augment rather than replace creative processes in product development.

The Blueprint for Building High-Impact Teams

Medium

Leadership methodology article outlining proven strategies for assembling and scaling high-performing engineering teams through psychological safety, clear accountability, and growth-oriented culture.
