Technical Leadership

- Team Leadership
- Mentoring
- Cross-functional Collaboration
- Stakeholder Management
- Vision Communication
- Engineering Excellence

Product Management

- Product Ownership
- Agile Methodologies
- Roadmap Development
- Customer-Centric Design
- User Journey Optimization
- A/B Testing

Full Stack & Backend

- JavaPython
- Vue.js
- API Development
- Microservices
- PostgreSQL

Summary

Accomplished product leader with over 10 years in software engineering and development, driving innovation in digital platforms. Successfully led cross-functional teams to enhance user experiences, generating \$1.5M+ in revenue and achieving 99.99% SLA. Expert in data-driven optimization and customer-centric solutions within agile environments, fostering collaboration and delivering impactful results.

Work Experience

- Beekeeper AG

Senior Software Engineer (Technical Lead)

03/2020 - Present

As Technical Lead, I drive product-led growth through innovative digital solutions that enhance user engagement and optimize development processes.

- Led architectural design and launch of Employee Referral System (99.99% SLA) — generated \$1.5M+ revenue including \$500K ARR through agile methodologies and customer-focused iteration
 - Spearheaded conceptualization, design, and development of Beekeeper's Templating Engine — reduced setup time by 90% and significantly enhanced user engagement, now powers 15% of all platform assets
 - Engineered robust search interface accommodating 10M+ users — substantially elevated user engagement and accelerated platform adoption rate
 - Assembled and led high-performing remote engineering teams, fostering environment for high-quality, maintainable code and customer-centric solutions
 - Collaborated with product managers and data engineers in creating hypotheses and running A/B experiments to derive insightful data for product iterations
 - Designed and deployed advanced, production-quality Generative AI translation systems using GitHub Actions and OpenAI APIs — saved \$337K and accelerated go-to-market since Jan 2024
 - Led key initiatives across Product and GTM including Employee Lifecycle GTM and Sentiment Analysis GTM

- Tenity

Startup Mentor & Technology Evaluation Panelist

06/2024 - Present

Mentoring startups in technical strategy and scalable solutions, leveraging my industry expertise to enhance product growth.

- Guided startups towards scalability and innovative practices, fostering alignment with unique technical strategies
 - Conducted thorough evaluations of emerging technologies for seed-to-VC startups, facilitating impactful growth and solution development

- Dronistics

Founding Software Application Developer

08/2016 - 03/2020

Developed an autonomous drone delivery system, driving innovation in logistics and enhancing operational efficiencies.

- Built autonomous drone delivery platform — architected full-stack solution powering 500+ successful deliveries
 - Engineered real-time flight control APIs and logistics optimization algorithms — reduced delivery times by 40% while maintaining 99.5% safety record
 - Enabled scalable operations for enterprise partnerships by delivering complete cloud infrastructure and DevOps pipeline

- EPFL — Laboratory of Intelligent Systems (Robogen)

Research Software Developer

01/2017 - 01/2020

Led the engineering of an AI and robotics research platform, contributing to groundbreaking advancements in evolving robotic systems.

- Spearheaded migration to AWS, securing research credits and enhancing platform accessibility
 - Supervised 20+ master's students in robotics and AI research projects, fostering innovation and learning
 - Contributed to open-source platform for co-evolution of robot morphologies and control systems

Data Analysis & Strategy

- ROI-Based Prioritization
- Data-Driven Decision Making
- Customer Feedback Analysis
- Performance Metrics
- Agile Iteration
- Engagement Metrics

Digital Experience Optimization

- User Experience Design
- Mobile Development
- Engagement Enhancements
- Digital Product Development
- Customer Lifecycle Optimization
- Scalable Solutions

Languages

English (Professional Working)
German (Beginner)

Certificates

- Building Modern Java Applications - AWS
- Build LLM Apps with LangChain - DeepLearning.AI
- Microsoft Certified Professional (MCPS) - Microsoft
- MongoDB for Java Developers - MongoDB University

Interests

AI & Creativity

Product Growth Strategies

Digital Banking Innovations

Startup Mentoring

Awards

- AWS Cloud Credits for Research - Amazon Web Services (2020)
- KTH Opportunities Fund - KTH Royal Institute of Technology
- TI India Analog Design Contest Winner - Texas Instruments

Entrepreneurial Projects

PulseView - AI Market Intelligence · <https://pulse-view.anand-creations.com>

05/2025 - Present

Founder & AI Product Builder

- Built a real-time stock market analysis platform using AI agents, enhancing decision-making for users.
- Integrated technical and news-based insights for comprehensive market analysis.
- Transitioned from a personal tool to a public platform, broadening access for retail traders.

SwissNRI - Cross-border Fintech Platform · <https://www.swissnri.com>

01/2024 - Present

Co-Founder & Technical Lead

- Led the development of a platform addressing complex cross-border financial challenges, directly improving user engagement.
- Achieved a 40% increase in user satisfaction by establishing regular customer feedback loops.
- Navigated regulatory challenges across multiple jurisdictions, enhancing compliance and user trust.

Obermatt - Fintech Product Development · <https://obermatt.com/en/home.html>

07/2018 - 01/2021

Product Owner & Technical Lead

- Enhanced CI/CD pipelines resulting in a 30% reduction in deployment times, optimizing product delivery.
- Introduced agile methodologies increasing team productivity by 20%, ensuring timely project updates.
- Developed strategic roadmaps boosting customer satisfaction and fostering lasting retention.

Education

Quantic School of Business and Technology

2019 - 2020

MBA Business Administration

EIT Digital

2014 - 2016

Master (Programme) Innovation & Entrepreneurship

Eindhoven University of Technology (TU/e)

2015 - 2016

MSc (Netherlands) Embedded Networking

KTH Royal Institute of Technology

2014 - 2015

MSc (Sweden) Embedded Systems

Amrita Vishwa Vidyapeetham

2010 - 2014

Bachelor of Engineering Electronics and Communication

Blog Posts & Talks

From Idea to Product

01/2022

Dev Innovation Summit 2022, USA (Talk)

Comprehensive methodology presentation on accelerating product development cycles through lean validation, rapid prototyping, and data-driven decision making in startup environments.

AI and creativity

Front Conference (Talk)

Keynote presentation exploring the intersection of artificial intelligence and human creativity, demonstrating how AI can augment rather than replace creative processes in product development.

From Infinite possibilites to finite Results

AI for the rest of Us, UK (Talk)

Strategic framework presentation on transforming unlimited AI potential into measurable business outcomes through systematic implementation and practical constraint design.

The Blueprint for Building High-Impact Teams

Medium

Leadership methodology article outlining proven strategies for assembling and scaling high-performing engineering teams through psychological safety, clear accountability, and growth-oriented culture.
