Product Management

- Product Ownership
- Roadmap Development
- Stakeholder Collaboration
- Project Planning
- Resource Allocation
- Business Impact

AI & Machine Learning

- Generative AI
- Conversational AI
- Natural Language Processing
- AI Product Design
- OpenAI APIs
- Translation Systems

Technical Leadership

- Team Leadership
- Mentoring
- Cross-functional Collaboration
- Innovation Practices
- Agile Methodologies
- Engineering Excellence

Summary

AI-focused Product Owner with 10+ years in software development and a proven track record of delivering high-impact AI solutions. Successfully led cross-functional teams in launching scalable systems, driving \$1.5M+ in revenue, and enhancing user experiences. Expertise in generative AI and NLP, aligning product strategies with business goals for transformative outcomes.

Work Experience

Beekeeper AG

03/2020 - Present

Senior Software Engineer (Technical Lead)

Technical Lead focused on delivering an AI-powered assistant that improves workplace collaboration and productivity, driving substantial revenue growth and innovation.

- Led architectural design and launch of Employee Referral System, generating \$1.5M+ revenue including \$500K ARR through agile methodologies and customer-focused iteration.
- Spearheaded development of Templating Engine, reducing setup time by 90% and increasing user engagement, now powering 15% of all platform assets.
- Engineered robust search interface accommodating 10M+ users, significantly enhancing user engagement and platform adoption.
- Assembled and mentored high-performing remote engineering teams, improving code quality and fostering a growth mindset.
- Collaborated on A/B experiments, deriving insightful data to inform product iterations and user needs.
- Designed and deployed advanced Generative AI translation systems, saving \$337K and accelerating go-to-market by translating 12K+ key-value pairs.

Tenity

06/2024 - Present

Startup Mentor & Technology Evaluation Panelist

Mentor for startups focusing on AI and technology strategy to foster innovation and ensure scalable development.

- Guided startups on scalability and core technical strategies, enhancing their potential for impactful, scalable solutions.
- Conducted thorough evaluations of emerging technologies, facilitating growth and strategic direction for seed-to-VC startups.

Dronistics

08/2016 - 03/2020

Founding Software Application Developer

Founding engineer behind Dronistics, focusing on autonomous drone delivery systems that increased operational efficiency in last-mile logistics.

- Engineered a full-stack autonomous drone delivery platform, successfully powering 500+ deliveries.
- Optimized real-time flight control APIs, reducing delivery times by 40% while ensuring a 99.5% safety record.
- Established cloud infrastructure enabling scalable operations for enterprise partnerships.

EPFL – Laboratory of Intelligent Systems (Robogen)

01/2017 - 01/2020

Research Software Developer

Led development of the Robogen platform, advancing research in robotics through artificial evolution methodologies.

- Pioneered engineering of an open-source platform for co-evolution of robot morphologies, enhancing AI robotics research.
- Spearheaded migration to AWS, improving research capabilities and securing industry recognition.
- Supervised 20+ master's students in robotics and AI projects, fostering academic growth and innovation.

Full Stack & Backend Development

- Java
- Python
- API Development
- Microservices
- PostgreSQL
- Elastic Search

DevOps & Infrastructure

- CI/CD
- Kubernetes
- AWS
- Monitoring & Observability
- Docker
- Deployment Automation

Languages

English (Professional Working)
German (Beginner)

Certificates

- Building Modern Java Applications - AWS
- Build LLM Apps with LangChain - DeepLearning.AI
- Microsoft Certified Professional (MCPS) - Microsoft
- MongoDB for Java Developers - MongoDB University

Interests

AI & Creativity

Startup Mentoring

Conversational AI

Product Innovation

Scalable Solutions

Awards

- AWS Cloud Credits for Research - Amazon Web Services (2020)
- KTH Opportunities Fund - KTH Royal Institute of Technology
- TI India Analog Design Contest Winner - Texas Instruments

Entrepreneurial Projects

PulseView - AI Market Intelligence · <https://pulse-view.anand-creations.com>05/2025 - Present

Founder & AI Product Builder

- Built a real-time stock market analysis platform using AI agents, enhancing decision-making for traders.
- Integration of technical and news insights for comprehensive market analysis, driving engagement and value.
- Transitioned from personal use to a public tool, broadening its impact across retail investors.

Proplab - AI Real Estate Tools · <https://proplab.io>09/2025 - Present

Founder & AI Product Builder

- Developed an MVP for a digital property inspection system, replacing outdated manual workflows.
- Led the creation of an AI-powered marketing assistant to automate listing processes and enhance visibility.

SwissNRI - Cross-border Fintech Platform · <https://www.swissnri.com>01/2024 - Present

Co-Founder & Technical Lead

- Launched a platform addressing financial challenges for Indian nationals in Switzerland, meeting a critical market need.
- Developed the product from concept to MVP in 3 months, leveraging strategic partnerships to drive adoption.
- Focused on compliance across multiple jurisdictions, ensuring the product met stringent regulatory requirements.

Education

Quantic School of Business and Technology MBA Business Administration	2019 - 2020
EIT Digital Master (Programme) Innovation & Entrepreneurship	2014 - 2016
Eindhoven University of Technology (TU/e) MSc (Netherlands) Embedded Networking	2015 - 2016
KTH Royal Institute of Technology MSc (Sweden) Embedded Systems	2014 - 2015
Amrita Vishwa Vidyapeetham Bachelor of Engineering Electronics and Communication	2010 - 2014

Blog Posts & Talks

AI and creativity
Front Conference (Talk)
Keynote presentation exploring the intersection of artificial intelligence and human creativity, demonstrating how AI can augment rather than replace creative processes in product development.

From Infinite possibilities to finite Results
AI for the rest of Us, UK (Talk)
Strategic framework presentation on transforming unlimited AI potential into measurable business outcomes through systematic implementation and practical constraint design.

From Idea to Product01/2022
Dev Innovation Summit 2022, USA (Talk)
Comprehensive methodology presentation on accelerating product development cycles through lean validation, rapid prototyping, and data-driven decision making in startup environments.
