- Scalable Solution Development
- Stakeholder Relationships

Summary

Experienced entrepreneur, technical leader, and startup mentor with a proven record in venture development, driving \$1.5M+ revenue and leading high-impact AI-enabled products. Extensive cross-functional collaboration, mentoring, and global advisory roles supporting founders and investors. Adept at leveraging AI for strategic analysis and opportunity development across diverse innovation ecosystems.

Work Experience

Beekeeper AG 08/2022 - Present
Senior Software Engineer (Technical Lead)

Technical Lead responsible for architecting scalable systems, driving AI adoption, and delivering platform features utilized by millions globally. Mentored engineering teams, led mission-critical initiatives, and supported go-to-market strategy to accelerate business growth.

- Architected Employee Referral System meeting 99.99% SLA — generated \$1.5M+ in revenue, including \$500K ARR onboarding enterprise clients
- Built LLM-powered template translation workflows with OpenAI and GitHub Actions — translated 12K+ key-value pairs, saving \$337K and accelerating international rollouts
- Designed a distributed templating engine serving 10M+ users — reduced asset setup time by 90%, now powering 15% of all platform assets
- Led GenAI demo content automation for sales — auto-generated tailored templates from Salesforce data, increasing demo personalization and speed
- Directed Search Platform Revamp — managed teams of 2-4 engineers in delivering scalable architectures that improved user engagement
- Acted as technical hiring manager for AI roles and deputy tech lead — mentored engineers and ensured timely, high-quality delivery of core modules
- Developed Agentic AI Onboarding specialist leveraging multi-step LLMs — automated user setup, scaling personalized guidance to 100% of signups, reducing time-to-value

Tenity 06/2024 - Present
Startup Mentor & Technology Evaluation Panelist

Panelist and mentor providing strategic evaluation and technical guidance to growth-stage startups, with a focus on scalability, innovation, and operational excellence.

- Conducted in-depth technology assessments for seed-to-VC backed startups, identifying strategic opportunities and risks
- Advised Opt Alpha on optimizing algorithmic trading system performance, reliability, and tech team scaling to enhance operational efficiency

Dronistics 08/2018 - 03/2020
Founding Engineer

Founding engineer delivering an autonomous drone delivery platform, leading development from concept to deployment for enterprise and research use cases.

- Built end-to-end autonomous delivery solution (Vue/Java/PostgreSQL) — powered 500+ successful last-mile drone deliveries
- Engineered real-time flight control APIs and logistics algorithms — reduced delivery times by 40% and maintained 99.5% safety record
- Led cloud infrastructure and DevOps rollout — enabled scalable enterprise deployments and showcased at CES

EPFL — Laboratory of Intelligent Systems (Robogen) 08/2016 - 07/2018
Research Engineer

Led engineering of Robogen, an open-source AI-enabled robotics research platform, contributing to pioneering academic and industry collaborations.

- Directed Robogen platform migration to AWS, securing AWS Research Credits and recognition on AWS Research Blog
- Supervised over 20 master's students and facilitated industry-academic research at EPFL
- Served as Teaching Assistant for Evolutionary Robotics, advancing foundational AI and robotics education

Technical Architecture & Scalability

- System Architecture
- Scalable Systems
- Microservices
- API Development
- Cloud Infrastructure
- Kubernetes
- CI/CD
- AWS
- DevOps
- Distributed Systems

Certificates

- Building Modern Java Applications - AWS
- Build LLM Apps with LangChain - DeepLearning.AI
- Microsoft Certified Professional (MCPs) - Microsoft
- MongoDB for Java Developers - MongoDB University

Interests

- Venture Building
- Startup Mentoring
- Scalable Systems
- Alternative Investments
- Corporate Strategy
- Distributed Cloud Platforms

Awards

- AWS Cloud Credits for Research - Amazon Web Services (2020)
- KTH Opportunities Fund - KTH Royal Institute of Technology
- TI India Analog Design Contest Winner - Texas Instruments

Entrepreneurial Projects

PulseView - AI Market Intelligence · <https://pulse-view.anand-creations.com>05/2025 - Present

Founder & AI Product Builder

- Built an AI-driven platform for real-time stock market analysis, leveraging AI agents to generate and explain trading signals for investors.
- Integrated technical and news-based insights, focusing on explainability, automation, and actionable financial analysis.
- Transitioned platform from personal research tool to a public service for retail traders, reinforcing technical leadership and product scalability.

Proplab - AI Real Estate Tools · <https://proplab.io>09/2025 - Present

Founder & AI Product Builder

- Developed MVP for digital property inventory inspection, streamlining manual workflows with image-backed, timestamped protocols.
- Currently leading build of AI-powered marketing assistant, automating listing creation and increasing property visibility across key marketplaces.
- Showcased expertise in AI-driven automation and the delivery of technology solutions for asset and property management.

SwissNRI - Cross-border Fintech Platform · <https://www.swissnri.com>01/2024 - Present

Co-Founder & Technical Lead

- Launched first platform addressing cross-border financial challenges for Indian nationals in Switzerland, targeting a complex niche market.
- Led zero-to-one product development from concept to MVP in 3 months, establishing strategic partnerships with community organizations.
- Designed compliance-first fintech solutions, aligning with regulatory frameworks (FEMA, DTAA, Swiss law) and achieving a 40% increase in user satisfaction through customer-driven iteration.

Education

Quantic School of Business and Technology MBA Business Administration	2019 - 2020
EIT Digital Master (Programme) Innovation & Entrepreneurship	2014 - 2016
Eindhoven University of Technology (TU/e) MSc (Netherlands) Embedded Networking	2015 - 2016
KTH Royal Institute of Technology MSc (Sweden) Embedded Systems	2014 - 2015
Amrita Vishwa Vidyapeetham Bachelor of Engineering Electronics and Communication	2010 - 2014

Blog Posts & Talks

From Infinite possibilites to finite Results
AI for the rest of Us, UK (Talk)
Strategic framework presentation on transforming unlimited AI potential into measurable business outcomes through systematic implementation and practical constraint design.
