Technical Leadership

- System Architecture
- Team Leadership
- Technical Strategy
- Mentoring
- Cross-functional Collaboration
- Engineering Excellence

Full Stack & Backend

- Java
- Python
- Microservices
- API Development
- PostgreSQL
- Kafka

AI & Machine Learning

- Generative AI
- OpenAI APIs
- AI Product Design
- Translation Systems
- AI Agents
- RAG Pipelines

DevOps & Infrastructure

- CI/CD
- Kubernetes
- Docker
- AWS
- Monitoring & Observability
- Deployment Automation

Summary

Accomplished senior software engineer and technical lead with 10+ years in high-impact software architecture and development. Proven expertise in designing scalable cloud solutions, leading teams, and driving innovation in microservices and AI. Delivered \$1.5M+ in revenue and \$337K in cost savings through strategic implementation and agile methodologies in complex environments.

Work Experience

Beekeeper AG

03/2020 - Present

Senior Software Engineer (Technical Lead)

As a Technical Lead, drive innovation in scalable systems and AI-powered features, enhancing platform reliability and user engagement.

- Led architectural design of Employee Referral System, achieving 99.99% SLA and generating \$1.5M+ revenue, including \$500K ARR.
- Spearheaded development of Beekeeper's Templating Engine, reducing setup time by 90% and increasing user engagement, powering 15% of platform assets.
- Engineered robust search interface for 10M+ users, significantly elevating user engagement and adoption rate.
- Assembled and led high-performing remote engineering teams, ensuring high-quality, maintainable code while cultivating a growth mindset.
- Collaborated in A/B testing to derive data-driven insights for product iterations and improvements.
- Designed advanced Generative AI translation systems, translating 12K+ key-value pairs, saving \$337K in costs and accelerating the GTM process.
- Acted as technical hiring manager for AI roles, mentoring junior engineers while owning core module deliveries.

Tenity

06/2024 - Present

Startup Mentor & Technology Evaluation Panelist

Provide strategic mentorship and technology evaluations for startups, enhancing their scalability and innovation strategies.

- Guided startups towards scalability, fostering technical strategies aligned with unique business goals.
- Advised multiple startups on AI adoption and technical hiring, facilitating impactful solution development.

Dronistics

08/2016 - 03/2020

Founding Software Application Developer

As a founding engineer, developed an autonomous drone delivery system that successfully handled over 500 last-mile deliveries.

- Built a full-stack solution for an autonomous drone delivery platform, driving 500+ successful deliveries.
- Engineered real-time flight control APIs, optimizing delivery performance and reducing times by 40% while maintaining a 99.5% safety record.
- Established robust cloud infrastructure and DevOps pipelines, facilitating scalable operations with enterprise partners.

EPFL — Laboratory of Intelligent Systems (Robogen)

01/2017 - 01/2020

Research Software Developer

Led the engineering of Robogen, an innovative platform for co-evolving robot designs, enhancing AI and robotics research capabilities.

- Spearheaded migration of Robogen to AWS, securing research credits and increasing platform capabilities.
- Supervised 20+ master's students in robotics and AI projects, contributing to educational and research advancements.
- Contributed to significant research in artificial evolution, resulting in industry recognition and an AWS blog feature.

Product & Business

- Product Ownership
- A/B Testing
- Revenue Generation
- Go-to-Market
- Stakeholder Management
- Strategic Roadmaps

Languages

English (Professional Working)
German (Beginner)

Certificates

- Building Modern Java Applications - AWS
- Build LLM Apps with LangChain - DeepLearning.AI
- Microsoft Certified Professional (MCPS) - Microsoft
- MongoDB for Java Developers - MongoDB University

Interests

- AI & Creativity
- Startup Mentoring
- Scalability & Innovation

Technical Strategy

Awards

- AWS Cloud Credits for Research - Amazon Web Services (2020)
- KTH Opportunities Fund - KTH Royal Institute of Technology
- TI India Analog Design Contest Winner - Texas Instruments

Entrepreneurial Projects

PulseView - AI Market Intelligence · https://pulse-view.anand-creations.com Founder & AI Product Builder	05/2025 - Present
- Built a real-time stock market analysis platform using AI agents to generate and explain trading signals. - Integrates technical and news-based insights for comprehensive market analysis. - Focused on explainable AI to enhance clarity in financial analysis.	
Obermatt - Fintech Product Development · https://obermatt.com/en/home.html Product Owner & Technical Lead	07/2018 - 01/2021
- Enhanced CI/CD pipelines with Docker implementation, reducing deployment times by 30%. - Implemented agile methodologies, increasing team productivity by 20%. - Developed strategic roadmaps that boosted customer satisfaction and retention rates.	
SwissNRI - Cross-border Fintech Platform · https://www.swissnri.com Co-Founder & Technical Lead	01/2024 - Present
- Identified market need and launched the first platform addressing cross-border financial challenges for Indian nationals in Switzerland. - Led product development from concept to MVP, acquiring early users through strategic partnerships. - Established customer feedback loops driving a 40% increase in user satisfaction.	
Education	
Quantic School of Business and Technology MBA Business Administration	2019 - 2020
EIT Digital Master (Programme) Innovation & Entrepreneurship	2014 - 2016
Eindhoven University of Technology (TU/e) MSc (Netherlands) Embedded Networking	2015 - 2016
KTH Royal Institute of Technology MSc (Sweden) Embedded Systems	2014 - 2015
Amrita Vishwa Vidyapeetham Bachelor of Engineering Electronics and Communication	2010 - 2014
Blog Posts & Talks	
Microfrontends: Revolutionising Frontend Architecture Developer Week 2023, USA (Talk) Technical deep-dive presentation demonstrating how microfrontend architecture enables scalable, team-autonomous development while reducing deployment complexity for enterprise applications.	01/2023
From Idea to Product Dev Innovation Summit 2022, USA (Talk) Comprehensive methodology presentation on accelerating product development cycles through lean validation, rapid prototyping, and data-driven decision making in startup environments.	01/2022
