\$1.5M+

REVENUE SHIPPED

\$337K

COSTS ELIMINATED

10M+

USERS SERVED

3

COMPANIES FOUNDED

Engineer who builds from the customer backward. Shipped AI products to millions at Beekeeper, founded three companies, and co-evolved robot bodies at EPFL — each chapter driven by the same question: what does the person on the other side actually need? Track record: \$1.5M+ in revenue generated, \$337K in vendor costs eliminated, 90% reduction in customer setup friction. I bring the systems rigour of an architect, the urgency of a founder, and an MBA-calibrated eye for what makes a feature worth shipping.

WORK EXPERIENCE

Beekeeper AG

08/2022 - Present

Senior Software Engineer (Technical Lead)

Java Python Vue Kubernetes AWS OpenAI LangChain Kafka PostgreSQL Elastic Search Jenkins GitHub Actions ClickHouse Claude Langfuse CrewAI Strands Agents

- Architected Employee Referral System end-to-end — became the platform's top revenue channel (\$1.5M+ generated, \$500K ARR); designed for 99.99% SLA because customer trust is measured in uptime
- Replaced \$337K in annual vendor translation costs with an LLM pipeline built in 6 weeks — 12K+ assets translated, product team now iterates without external gatekeepers
- Built AI Onboarding Specialist giving every new signup personalized, high-touch guidance at scale — 100% of customers guided through setup; reduced time-to-first-value without adding headcount
- Designed distributed templating engine that cut customer setup time 90% — powers 15% of all platform assets for 10M+ users; customers go from zero to live in minutes, not days
- Built GenAI demo system for sales — auto-generates personalized content from Salesforce data so every pitch feels custom-built for that customer; improved demo speed and close rates
- Led Search Platform revamp across 3 teams — redesigned indexing and ranking to surface what users mean to find, not just what they typed; measurably improved user engagement
- Built and mentored the AI engineering cohort — hired for craft and curiosity, grew engineers who now lead features independently
- Co-owned GTM launches with Product and Sales (Seasonal Templates, Re-ignite Revenue, Sentiment Analysis) — each shipped with instrumentation so we knew within a week if it moved the needle

Tenity

06/2024 - Present

Startup Mentor & Technology Evaluation Panelist

- Evaluated 20+ startups on technical architecture, scalability, and AI readiness to inform seed-to-VC investment decisions
- Mentored Opt Alpha on scaling algorithmic trading systems — optimized reliability and performance for high-frequency production workloads
- Advised multiple portfolio companies on technical hiring, AI strategy, and building engineering cultures that actually ship

Dronistics

08/2018 - 03/2020

Founding Engineer

- Shipped end-to-end autonomous drone delivery platform (Vue/Java/PostgreSQL) — 500+ successful deliveries; every flight was a live UX test for autonomous systems in the real world
- Built cloud infrastructure and DevOps pipeline from scratch — enterprise-grade reliability that enabled partnerships with Unilever and a CES showcase
- Engineered real-time flight control APIs and logistics optimization algorithms — 40% faster deliveries, 99.5% safety record, zero incidents

Research Engineer

- Migrated Robogen to AWS and secured AWS Research Credits — work featured on the AWS Public Sector Blog
- Teaching Assistant for Evolutionary Robotics at EPFL — supervised 20+ master's students through hands-on AI and robotics research

ENTREPRENEURIAL PROJECTS

PulseView - AI Market Intelligence · <https://pulse-view.anand-creations.com>

05/2025 - Present

Founder & Builder

Built for my own trading portfolio first: a platform that explains its signals, not just shows them. Retail traders deserve the same explainable analysis that institutions pay for.

AI Agents

Financial Analysis

Technical Analysis

News Processing

Trading Signals

Explainable AI

React

Automation

- Real-time market analysis via AI agents that generate and justify trading signals using technical and news-based data
- Core product principle: if the model can't explain the signal, it doesn't ship — explainability over complexity
- Opened to retail traders after self-validating; now serving live users with real-time market feeds

Proplab - AI Real Estate Tools · <https://proplab.io>

09/2025 - Present

Founder & Builder

Property inspections run on paper, clipboards, and WhatsApp photos. Built MVP for a fully digital, image-backed, timestamped inspection protocol that replaces the entire manual workflow.

AI

Real Estate Tech

Image Processing

Marketing Automation

Property Management

- Shipped MVP replacing paper-based inspection workflows with structured, image-backed, timestamped records
- Building AI marketing assistant that auto-generates property listings from inspection data — one workflow, zero copy-paste

SwissNRI - Cross-border Fintech Platform · <https://www.swissnri.com>

01/2024 - Present

Co-Founder & Technical Lead

Swiss-Indian families navigating FEMA, DTAA, and Swiss regulations had zero digital help — just spreadsheets and expensive advisors. Built the first platform addressing this.

SaaS Architecture

Fintech

Compliance Systems

Tax Automation

DTAA

FEMA

- Zero-to-MVP in 3 months; early users acquired through Swiss-Indian community partnerships
- Compliance-first design: regulatory guardrails for both jurisdictions built before features
- Customer feedback loops drove 40% uplift in satisfaction — roadmap owned by what users actually asked for

SKILLS

TECHNICAL LEADERSHIP	System Architecture	Team Leadership	Technical Strategy	Mentoring	Cross-functional Collaboration		
	Engineering Excellence						
FULL STACK & BACKEND	Java	Python	TypeScript	Vue.js	Microservices	API Development	PostgreSQL
	Elastic Search						Kafka
AI & MACHINE LEARNING	Generative AI	LLM Applications	RAG Pipelines	AI Agents	OpenAI APIs	AI Product Design	
	Translation Systems						
DEVOPS & INFRASTRUCTURE	CI/CD	Kubernetes	Docker	Terraform	AWS	Monitoring & Observability	ClickHouse
	Deployment Automation						
PRODUCT & BUSINESS	Product Ownership	A/B Testing	Revenue Generation	Go-to-Market	Stakeholder Management		
	Strategic Roadmaps						

EDUCATION		CERTIFICATES	AWARDS
Quantic School of Business and Technology	2019 - 2020	Building Modern Java Applications - AWS	AWS Cloud Credits for Research - Amazon Web Services (2020)
<i>MBA Business Administration</i>		Build LLM Apps with LangChain - DeepLearning.AI	KTH Opportunities Fund - KTH Royal Institute of Technology
EIT Digital	2014 - 2016	Microsoft Certified Professional (MCPS) - Microsoft	TI India Analog Design Contest Winner - Texas Instruments
<i>Master (Programme) Innovation & Entrepreneurship</i>		MongoDB for Java Developers - MongoDB University	
Eindhoven University of Technology (TU/e)	2015 - 2016		
<i>MSc (Netherlands) Embedded Networking</i>			
KTH Royal Institute of Technology	2014 - 2015		
<i>MSc (Sweden) Embedded Systems</i>			
Amrita Vishwa Vidyapeetham	2010 - 2014		
<i>Bachelor of Engineering Electronics and Communication</i>
